

The **Energy Labeling Rule**<sup>i</sup> requires manufacturers of **certain** appliances to disclose a product's annual energy cost or efficiency information on EnergyGuide labels based on Department of Energy (DOE) test procedures and to report their findings to the Federal Trade Commission (FTC).

The bright yellow EnergyGuide labels for covered products contain three key disclosures: Estimated annual energy cost; a product's energy consumption or energy efficiency rating as determined from Department of Energy (DOE) test procedures; and a comparability range displaying the highest and lowest energy costs or efficiency ratings for all similar models.

The Energy Labeling Rule applies to consumer products, i.e. appliances distributed in commerce for personal use. Products designed and marketed exclusively for medical, scientific and research purposes are not subject to the same Energy Labeling Rule.

If you require additional information about this product and its energy usage, contact us at [info@eqtemp.com](mailto:info@eqtemp.com)
