

## OUTDOOR WALL LIGHT ASSEMBLY/INSTALLATION INSTRUCTIONS

Please read carefully and save these instructions, as you may need them at a later date.

### CAUTION

**WARNING:** Risk of Fire. Min 90°C supply conductors. Consult a qualified electrician to ensure correct branch circuit conductor.

Turn off the main power at the circuit breaker before installing the fixture, in order to prevent possible shock.

### GENERAL

All electrical connections must be in accordance with local and National Electrical Code (N.E.C.) standards. If you are unfamiliar with proper electrical wiring connections obtain the services of a qualified electrician.

Remove the fixture and the mounting package from the box and make sure that no parts are missing by referencing the illustrations on the installation instructions.

## ASSEMBLY AND INSTALLATION

### Turn off the power at fuse or circuit breaker.

1. Shut off the power at the circuit breaker and remove existing fixture, including the mounting hardware.
2. Carefully unpack your new fixture and lay out all the parts on a clear area. Be careful not to lose any small parts necessary for installation.
3. Thread out the four mounting screw from the back plate, and then take out the mounting plate.
4. Connect supply wires to fixture wires and insulate with wire nuts. Make sure that all wire connectors are secured. If your outlet box has a green or bare copper ground wire, connect the fixture ground wire. Otherwise, connect the fixture ground wire directly to the mounting plate using the green screw provided. After wires are connected, tuck them carefully inside the outlet box.
5. Mount the fixture base onto the mounting plate and secure it with the four mounting screws.
6. Screw the lamp into the socket. Refer to the label on the socket for Max Wattage Information.
7. Align the glass to the ring and slide it carefully into the ring allowing it to rest on the bottom plate.
8. For wet locations, caulk around the base of the fixture with waterproof construction sealant.

### Turn on the power at fuse or circuit breaker

## ASSEMBLY AND INSTALLATION (CONT.)

**IF IN DOUBT ABOUT ELECTRICAL INSTALLATION,  
CONSULT A LICENSED ELECTRICIAN.**
