

Laminate Sizes:
12"x12" / 5 -1/2 x 9-1/2 / 8"x8" / 3"x6" subway tile

Shell Laminate Use Guide

With or Without Self-Adhesive

The Shell Laminate is designed to adhere to vertical surfaces with self-adhesive or contact cement and comes standard without self-adhesive. The self-adhesive is optional, except for subway size tiles. The face of the tile is authentic shell which has a clear lacquer coating that can be sanded lightly and recoated. You can also sand any rough edges. This product is made from actual shell and therefore has certain fragility, so care should be taken when working with it.

The 3" x 6" Subway tile comes in a package of eight pieces equal one square foot of surface placed area in a vertical application and comes standard with self-adhesive back.

FOR INTERIOR – VERTICAL APPLICATIONS – DRY AREA ONLY
ALIGN FIRST - PLACE CAREFULLY YOU WILL NOT BE ABLE TO REMOVE AFTER
PLACEMENT
STANDARD CEMENT GLUE MAY ALLOW FOR MOVEMENT ON PLACEMENT
TEST FIRST -THERE IS NO GUARANTY AFTER INSTALLATION.

Cutting:

Use either a craft knife or sharp scissors. With a craft knife score the back of the laminate gently first, then progressively apply more pressure until cut is complete. For curves draw shape on masking tape. Laser cutting can be used for intricate designs.

Surface Preparation:

Laminate shell with adhesive backing will adhere well to prepared surfaces that are clean, flat and smooth including acrylic painted surfaces.

Cleaning surface shell laminate: Clean only with non-abrasive cleaners such as soap & water wipe excess carefully.

Our company is committed to ecological sustainability in all our products. Our mission, inspired by creative energy and focused vision, is to create awareness of protecting our environment through recycled natural products.
