

Read the full manual for complete safety and product information before proceeding

1 PLACEMENT & BASE

⚠ DO NOT install within 5 feet of metal or electrical

Keep at least 18" clearance for access

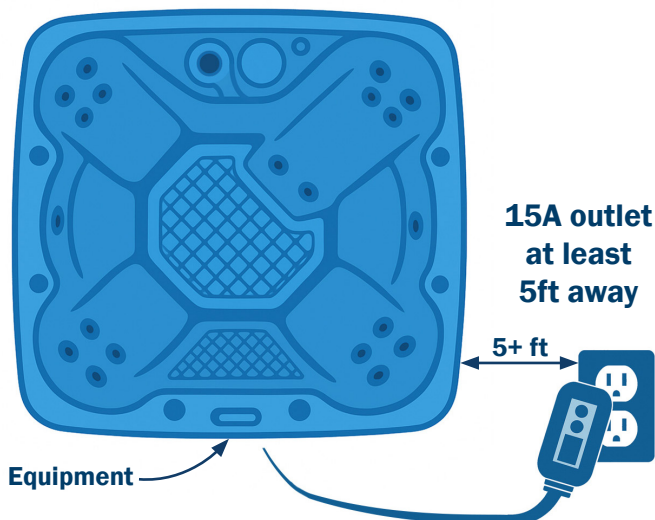

Flat, level and solid load-bearing base

- See manual for base load-bearing requirements
- Placing on an uneven surface can distort the shell and void the warranty
- Consult an engineer if placing your spa on a deck or balcony

2 ELECTRICAL

**⚠ DO NOT plug in until spa is full
DO NOT use an extension cord**

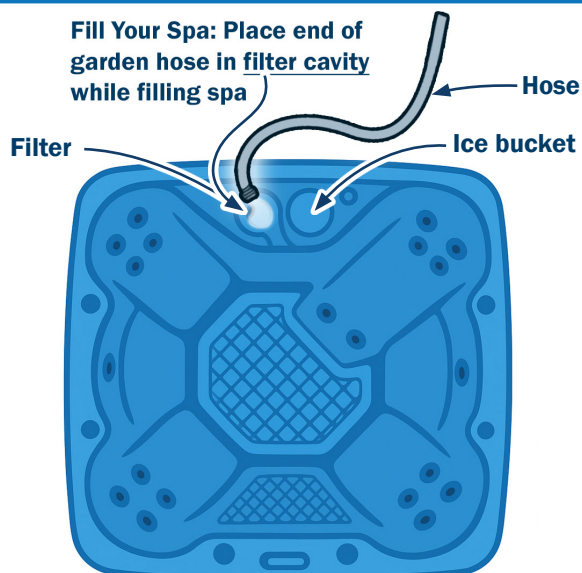

If converting heater to 240V, see manual.

Spa can run on 120V until electrician completes install.

3 FILLING

Fill Your Spa: Place end of garden hose in filter cavity while filling spa

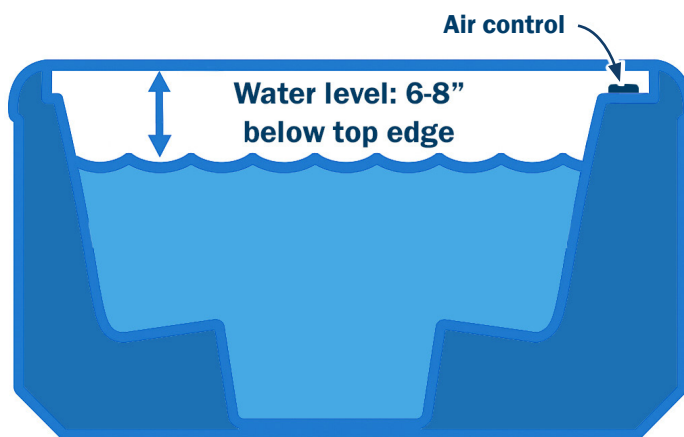

Before filling:
Confirm drain valve is **CLOSED** and **CAPPED**

4 WATER LEVEL

**Once filled, keep air controls closed (no bubbles).
Open only when using the spa for massage.**

⚠ Overfilling your spa can distort the shell and void the warranty.

Read the full manual for complete safety and product information before proceeding

5 INITIAL STARTUP

ON FIRST START: 7-minute self-diagnostic

Control panel will display a series of numbers followed by ("Pr / -") while the pump runs at low speed for 7 min.
DO NOT touch any buttons during the 7 minute startup

If water is not flowing after 7 minutes, see manual for purging instructions.

6 SETTING THE TEMP

**System is preset to 100° F
@ low speed for 1 hour**

**Adjust temp up to 104° F in 1° steps.
Display flashes while setting.**

- Filtration cycles run every 12 hours.

7 JETS AND LIGHTS

**Light: Press to turn On/Off
To adjust color, press immediately
after turning off**

**Jets: Press to power the pump.
Each press will cycle between: Low - High - Off**

- Light turns off automatically after 4 hours.
- See manual to program spa for filtration duration times.
- Jets are set to high: they will automatically shut off after 15 minutes.
- Jets are set to low: they will automatically shut off after 2 hours, unless filter/heat is programmed to run.

8 IMPORTANT GUIDELINES

**Always test GFCI before use.
Never use spa alone
Never use spa under influence of alcohol/drugs
Supervise children at all times.
Keep water above jets to avoid pump damage.
Do not overfill or operate without water.
Do not use extension cords.
Do not sit or stand on spa cover.
Do not let spa freeze.**

***See manual for additional guidelines**
