

# GINKGO LEAF MAGNETIC CURTAIN TIEBACK

Installation Guide

---

## What's Included

### In Your Package:

- 1 or 2 × Ginkgo leaf magnetic tiebacks (depending on selected quantity)
- Metal Ginkgo leaf design elements (2.8" × 2.3" each)
- Flexible metal wire construction (12" total length)
- Strong magnetic closure system (0.10" thickness)
- Available in your selected finish: Silver, Gold, or Black

### Sustainable Packaging

Your tieback arrives in environmentally conscious packaging, reflecting our commitment to nature.

### Your Finish Selection:

Your Ginkgo leaf tieback(s) come in the elegant finish you selected. Each finish features the same premium metal construction and powerful magnetic system.

- **Silver:** Classic, timeless elegance - perfect for modern and contemporary spaces
- **Gold:** Warm, luxurious accent - ideal for traditional and transitional decor
- **Black:** Bold, contemporary style - excellent for modern and minimalist designs

### Tools Needed:

- None required - no drilling or hardware installation needed!
- Clean, dry cloth (for initial cleaning if desired)

### Important Safety Information

- Keep away from children under 3 years - contains strong magnets

- 
- Do not use near pacemakers or electronic devices sensitive to magnets
  - Avoid pinching fingers when magnets snap together
  - Handle wire construction gently to maintain shape
  - Check curtain weight capacity before use

# Step-by-Step Installation

## 1 Prepare Your Curtains

Ensure your curtains are clean and properly hung. The Ginkgo leaf tieback works beautifully with natural fabrics and complements organic, botanical decor themes.

*Tip: If curtains are new, let them hang for 24 hours to settle before installing tiebacks.*

## 2 Determine Tieback Position

Choose where you want the tieback positioned on your curtain:

- **High position:** 1/3 from the top - elegant, natural drape
- **Middle position:** Center of curtain - balanced, organic look
- **Low position:** 2/3 down - relaxed, casual natural style

## 3 Gather the Curtain Fabric

Pull your curtain to one side and gather the fabric at your chosen position. The gathered fabric should be no more than 3 inches thick for optimal fit within the 3.8" wire loop.

**Natural Advantage:** The organic Ginkgo leaf design brings the beauty of nature indoors while the strong magnets ensure secure hold.

## 4 Position the Front Ginkgo Leaf

Place the decorative Ginkgo leaf element on the front-facing side of your gathered curtain where you want it to be visible. The beautiful leaf design becomes a natural accent piece.

Consider the angle - the leaf can be positioned to complement your curtain's natural drape and your room's botanical theme.

## 5 Loop Around the Back

Carefully bring the flexible wire loop around the back of the gathered curtain fabric. The 3.8" loop diameter accommodates most curtain thicknesses while the 12" total length provides flexibility.

The metal wire construction is both durable and flexible, allowing for easy positioning.

## 6 Connect the Magnets

Bring the magnetic elements together behind the curtain. You'll feel the strong magnetic pull as they approach each other - let them snap together securely.

**Caution:** Keep fingers clear when magnets snap together to avoid pinching. The 0.10" thick magnets are very strong.

## 7 Adjust and Perfect

Adjust the curtain draping and the position of the front Ginkgo leaf until you achieve the perfect natural look. The tieback should hold securely while allowing natural curtain movement.

Ensure the leaf element is positioned to showcase its beautiful organic design and complements your room's natural aesthetic.

### Pro Installation Tips

- For optimal hold, ensure curtain gathering fits comfortably within the 3.8" loop
- With a set of 2, install tiebacks at the same height for perfect symmetry
- For wide windows with multiple panels, use one tieback per panel
- The Ginkgo leaf can be angled to complement your curtain's natural flow
- Consider the leaf as part of your room's botanical and natural design elements
- The flexible wire allows for minor adjustments to achieve the perfect position
