

2.4G RGB CW remote control controller instruction manual

Match the code between the remote control and the light source:

1. Turn on the power and press the ON key for 5 seconds to match the light bar. If the light source flashes twice, the match is successful.

Remote control and light source clear code operation:

2. Cancel the light source match to turn on the light source power again, press and hold the OFF key for 5 seconds, and the lamp flashes 3 times to cancel the code successfully.
