## Through Thick Fog 1

D2800S55994-4720

Through Thick Fog 1 displays a mesmerizing coastal scene through an abstracted lens. Along the horizon muted colors of blues and greys break up the composition. In the sky, a darkened cloud in slate draws the viewer's gaze amidst pastel greys and pearls. An overall lightened sky gives the impression of sunlight peeking through while offering balance against the cool greys that trace along an abstracted mountain and sea. A quiet, pensive composition, Through Thick Fog 1 skillfully uses color and tone to convey a meditative spirit. Part of the carefully curated ART by TA collection.
