

## GRACIE MODERN ARBOR ASSEMBLY

Trellises must be placed on a flat, level surface. Gracie Modern Arbor attaches in the center and comes with 6 pre-drilled 1/2" holes on the base plates to secure to ground. Terra Sculpture, LLC is not liable for any injuries or accidents which may occur after trellis is purchased. All metal trellis exposed to salt air or extreme weather may experience oxidation over time. Trellises with Oxide finish may stain porous or light colored surfaces. Our trellises are individually made by hand in our studio. As with anything handmade, you may see slight imperfections.

### HARDWARE INCLUDED:

2 nuts, 2 bolts.

**STEP 1:** Lay two parts of trellis on sides on flat surface. Take care not to scratch finish.

**STEP 2:** Bring 2 sides together, thread bolt/washer through bottom hole first and tighten. Squeeze bars together and repeat for 2nd hole and secure.

**STEP 3:** Stand arbor upright and tighten bolts with wrench. Gently pull sides so base plates are flat to ground and continue to secure bolts tightly. Trellis is ready to be placed in your garden!

### SECURING BASE PLATES TO GROUND (HARDWARE NOT INCLUDED)

**hardscape\*:** 3/8" dia. x 3.5" min. length stainless or galvanized concrete anchor bolts

**softscape:** 3/8" dia. x 12" min. length or longer galvanized nails/stakes

#### \*recommended

\*\*please maintain weight of climbing plants

### DISPLAY SUGGESTION:

Use ground cover or mulch to cover base plates and create a "floating" effect. Skip or walk under your Gracie!
