Safety Information

- The product is intended for household use.
- Assembly should be carried out according to the manufacturer's instructions and in the sequence shown therein.
- Assembly and moving the product to its location or installation should be performed by a minimum of 2 people. Some cases may require more people. Information on this subject can be found in the assembly instructions.
- Maintain order during assembly. After unpacking the packages, sort and arrange the components and fittings.
- During assembly, pay special attention to small children. Keep them away from the area where assembly work is being carried out. Do not let them play with fittings, components, or packaging materials – children may swallow small parts.
- Dispose of packaging materials in accordance with applicable waste segregation laws.
- Use only original parts supplied by the manufacturer for product assembly. The only exception to this rule may be fasteners (e.g., wall plugs with screws) used to attach furniture to the wall or hang it on the wall (if required). In some situations, you need to obtain these fasteners on your own.
- The product is intended to be wall-mounted.
  Proper execution of this task requires specialized knowledge and tools. Therefore, hanging the product on the wall should be done by a competent and qualified person who can assess the wall, i.e., its material, strength, and stability, and correctly select appropriate fasteners.
  You must:
  - ✓ use all hangers (suspension points) provided by the manufacturer,
  - ✓ ensure that at each suspension point, all components used for hanging the product work properly together,
  - ✓ ensure before loading the product that it hangs stably on all designated hangers.

  NOTE!!!
  If wall plugs with screws are included with the product, they are intended only for walls made of solid and homogeneous materials covered with thin-layer plaster.
- Product use can begin only after it is completely assembled and installed in its final location.
- The product should be used according to its intended purpose.
- Do not allow children to use the product for play.
- Exercise special caution with products containing glass or mirrors. Do not allow children to play near such products.
- The furniture is made of materials that may emit small amounts of substances used in production processes into the environment. The emission level is tested and meets applicable standards. After assembling the furniture, it is recommended to increase the intensity and frequency of ventilation in the room where it is located. This should last about four weeks or until the odor is eliminated.
- Do not use the product with serious damage (cracks, breaks, compromised and weakened fastener attachments, etc.).
- Regularly check all connections in the product and mounting points to the building structure (if any). If necessary, tighten or adjust them according to manufacturer's recommendations.
- For maintenance, follow the recommendations of the product manufacturer and the care product manufacturer.
- Caution should be exercised according to the nature and severity of the disability, as well as to age and resulting personal aptitude. Gender does not affect the safe use of the product.
- After the end of its useful life, dispose of the product in accordance with applicable waste segregation laws.
