

### Materials Needed:

blade

cleaning cloth

masking tape

plastic squeegee or plastic card

**Thank you for your purchase.** Your peel and stick wall mural set contains multiple panels. For your convenience, we've numbered the back of each panel. Simply hang the panels in the right sequential order to achieve the perfect wall mural.

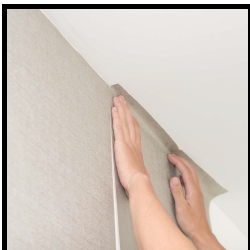

Numbered Back Panels

## Peel and Stick Installation Instructions

### Step 1

Designs work best with smooth, eggshell, satin or semi-gloss paints. Assuming your walls meet these minimum requirements, wipe them down with a water-dampened cloth or sponge to ensure there are no debris or foreign objects remaining. Allow walls to fully dry prior to application.

### Step 2

Place your first panel in the top corner and peel the backing down about 4"-6" from the top, while smoothing out with your hands as you apply. Pro Tip: To ensure your wall mural looks great on uneven wall heights, allow for a 1" margin at the top and bottom of panels. Wall murals must match up side-by-side with no overlap.

### Step 3

To avoid wall mural bubbles, use a plastic squeegee or credit card and apply pressure in an outward motion. Repeat until all bubbles have been eliminated. When continuing on to the next panel, make sure to line up the new panel with the previous panel's artwork. Repeat process on the remaining panels.

### Step 4

Excess wall mural should be trimmed from the top and bottom (if applicable). Use an Exacto knife or any blade that you are comfortable cutting with. Safely discard the excess wallpaper. Enjoy your wall mural from Casa Fine Arts!
