THE NATURE OF WATER

In the same way rivers carve curves and waves into canyons and rock, the Seros bath captures the rippling motion of water in sculpted form. Its oval silhouette is surrounded by the flowing lines and contours of currents, for an organic shape that encapsulates the fluid expression of water. The finely detailed waves encourage a play of light and shadow, echoing nature and bringing the outside in. Seros is designed to enhance the serenity of a bath, and calm mind and body in a lush, spa-like experience.
