Assembly step : When assemble at the soil
3*5ft (90*150cm)

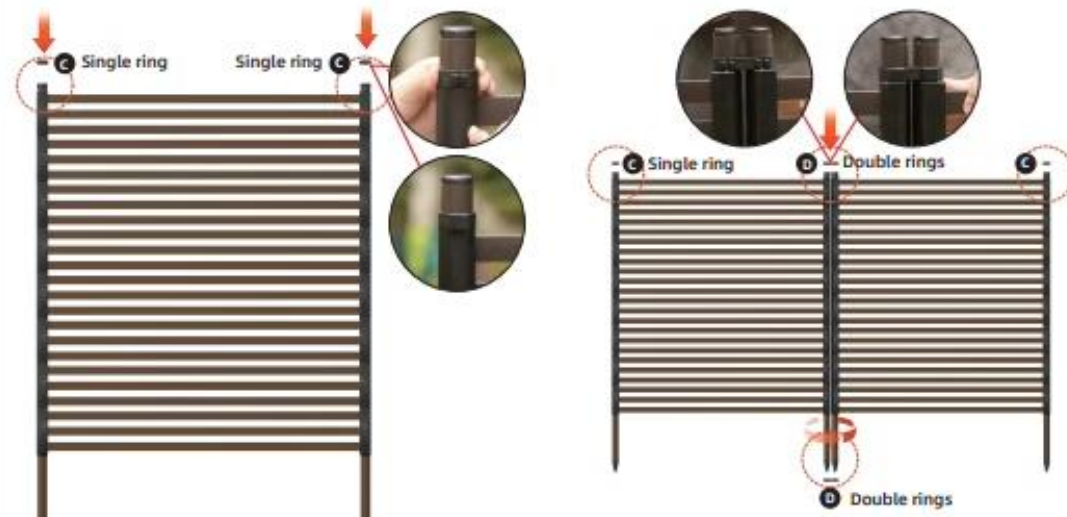

1 Combine A1, A2, and A3 together to form A (the side pole of the screen).
 (The above steps require installing two)

2 Install B into the two assembled side rods (please ensure that the rubber ring on A3 is about 30cm away from the tip of the rod before installation, Used to insert into soil or metal base to fix the screen) .

③ Fix C at the top of both ends of the screen (if you want to connect multiple sets of screen together, use D at the connection of the two screens).

You can change the direction of the screen according to your own needs.

④ Make a hole in the installation location in advance to ensure that the screen can be inserted approximately 30 cm.
