

Grounding Instructions:

Make sure the heater is switched OFF before plugging the heater into the outlet. Connect to properly grounded outlets only. Note: The power cord has a polarized plug (with one blade wider than the other) that will only fit in a polarized outlet one way. If it does not insert easily try reversing the plug. If it still does not fit contact your electrician to replace your outlet.

DO NOT defeat the safety purpose of the polarized plug.

Automatic Overheat Safety Control

- This heater is equipped with an internal heat limiting thermostat and overheat protection circuit. When a potential overheat temperature is reached, the system will automatically shut the heater off.
- **IF SAFETY LIMIT LIGHT ILLUMINATES** an abnormal condition has turned off the heating elements. **TO RESET WAIT 10 MINUTES** to allow the heater to cool down, the heater will automatically reset once the heating element cools down.

**CAUTION:
RISK OF ELECTRIC SHOCK
DO NOT OPEN
NO SERVICEABLE PARTS INSIDE**

Cleaning and Maintenance

Any electrical repairs or rewiring of this unit should be carried out by a licensed electrician and accordance with national and local codes.

- Before cleaning the appliance, disconnect it from the power outlet and let it cool down.
- In order to protect the enclosure, don't splash water onto the heater, and never use a solvent like gasoline, isoamyl acetate, toluene, etc. to clean the heater. **DO NOT** open the heater or attempt to clean the inside of this appliance.
