PRE-ASSEMBLY TIPS

POST & COUPLER

Connecting Direction

The shape of the Post hole should look like this **qp**

Disassembling the Post

- (1) Fix the lowest bottom Support-Beam by the foot
- (2) Hold the upper and lower Posts.
- (3) Shake them apart.

Disassembling the Coupler

With a Support Beam and Mallet, gently hit the connected Post Coupler to separate it.

SUPPORT BEAM

Please make sure the protrusions on the Support Beams are fully locked into the Post holes.

For safety, make sure the Support Beams are assembled into the holes at the same height on both posts.
(The small circular hole that appears every five post holes can be used as a height reference.)

ASSEMBLING 5-TIER SHELF

*If the product you purchased contains the LiftBeam, please refer to the LiftBeam assembly instructions when assembling the shelf.

ASSEMBLING LiftBeam

* You can assemble as many LiftBeams as you want per tier.

* You can assemble only the Basic style(in the Support Beam assembly method) when using a LiftBeams.

Before assemble, please check the top and bottom of LiftBeam to not getting confused.

Put up and combine it from the bottom to the top so that the Hooked part of LiftBeam protrudes outward.

Let faced the Slanted direction of both the LiftBeam and Long Support-Beam each other.

- Put the Slanted part of LiftBeam on top of Long Support Beam.
- Move the combined LiftBeam to where need to be load distribution.

Tips

Various Ways to Assemble the SUPPORT BEAM

You can assemble it in various ways depending on how you connect the Support Beams.

* You can assemble only the **Basic** style when using a LiftBeams

Tip Wall Fixing Bracket

Make sure to install wall fixing brackets on the wall to prevent the product from falling forward.
