## **General installation rules:**

Before installation, please read the steps in the instructions and product maintenance. It is imperative to follow the order of the installation steps with the general installation rules:

- Do not install items in case of finding defects or damage to purchased items.
- Check whether the surface (wall) is suitable for mounting suggested by the manufacturer, i.e. on double-sided adhesive tape. It is possible to glue the hook to ceramics, PVC, aluminum and varnished wood.
- The surface for gluing the hook must be smooth. A rough or uneven surface is not suitable.

## **Maintenance and use:**

During use of the towel hook, check the overall condition of the hanger as needed and that the securing tape does not peel from the surface of the hanger. Do not use rough sponges or components containing abrasives for cleaning. This may cause tarnishing or scratching of the surface. Do not use cleaners containing solvents, acids, or cooking vinegar. Test the cleaning agent on an inconspicuous area of the product first. Clean the surface of the hook with a soft cloth or paper towel.

NOTE!!! Excessive load on the hook creates a hazard during use and poses a threat of permanent damage.
