CAUTION
READ INSTRUCTIONS CAREFULLY FOR
SAFE INSTALLATION AND FAN OPERATION

SAFTY RULES

1. To reduce the risk of electric shock, turn off the electricity to the fan at the main fuse box or circuit panel before beginning.
2. All wiring must be in accordance with the local electrical codes or National Electrical Code. Electrical installation should be performed by a qualified licensed electrician.
3. To avoid personal injury, the use of gloves may be necessary while handling fan parts with sharp edges.
4. Make sure the installation site you choose allows clear space for the blades to rotate and at least seven 7 feet (2.13 meters) of clearance between the floor and the fan blade tips. The fan should be mounted so that the tips of the blades are at least thirty 18 inches (45.72 centimeters) from walls or other upright structures.
5. **WARNING:** To reduce the risk of fire, electric shock, or personal injury, mount fan only to an outlet box marked acceptable for fan support and use mounting screws provided with the outlet box. Most outlet boxes commonly used for the support of lighting fixtures are not acceptable for fan support and may need to be replaced. Consult a qualified electrician if in doubt.
6. The outlet box and ceiling support structure must be securely mounted and capable of supporting at least 45 KGs.
7. To avoid personal injury or damage to the fan and other items, be cautious when working around or cleaning the fan.
8. Do not use water or detergents when cleaning the fan or fan blades. A dry dust cloth or lightly dampened cloth will be suitable for most cleaning.
9. After making electrical connections, spliced conductors should be turned upward and pushed carefully up into the outlet box. The wires should be spread apart with the grounded conductor and the equipment-grounding conductor on one side of the outlet box.
10. Electrical diagrams are for reference only.
11. The fan is suitable for indoor use only.

TOOLS REQUIRED

- 1、Mounting bracket×1
- 2、Motor×1
- 3、Canopy×1
- 4、Blades×5
- 5、Leaf fork×5
- 6、Light×1
- 7、Glass×4
- 8、Lamp head outer ring×4
- 9、Wire cap×3
- 10、Gasket×4
- 11、Spring washer×4
- 12、Wood screws×4
- 13、Expansion bolt×2
- 14、cross screw×15
- 15、Driver×1
- 16、Remote controller×1
- 17、Balance Pack×1

Before operation, it is necessary to cut off the power supply, select a suitable installation position, and fix the installation bracket to the ceiling with screws.

Install the controller bracket onto the card board.

Insert the motor card into the bow shaped hanging plate as shown in the picture and tighten it with screws.

As shown in the figure, first connect the wires on the controller and use double-sided tape to fix the controller to the bracket.

Screw the two-stage ceiling cover into the hanging plate, align the holes and fix them with screws.

Install the blades onto the fork with screws (with paper pads) as shown in the picture, and sequentially install the fan blades with the fork installed onto the motor holes.

Connect the wires of the fan body and the lighting fixtures in the same color as shown in the diagram, cover them on the switch, and tighten them with screws.

Install the glass lampshade on the lamp head and lock it with the outer ring of the lamp head.

Done.

REMOTE CONTROL

· **Pairing Code:**
Turn on the power, and the light will turn on. Within 5 seconds, press and hold the "FANOFF" button for 3 seconds until you hear a beep. Then press the "Light On/Off" button to confirm that the remote has been paired successfully.
