

Install the Fixture

1A

- 1 Secure the mounting plate to the junction box (junction box not included). Pre-insert the screws used to connect the fixture base into the mounting plate.
- 2 Connect the fixture power wires correctly in accordance with local electrical codes.
- 3 Carefully tuck all wires into the junction box. Align the fixture base with the pre-positioned screws on the mounting plate, then tighten with nuts to secure it.
- 4 Place the lampshade onto the lamp holder for installation.
- 5 Screw the shade retaining ring into the lamp holder to secure the lampshade. Repeat this step for the remaining shades.
- 6 Install the light bulb into the lamp holder. Refer to the label on the lamp holder for the maximum wattage rating.
