

1. Lightly put baking soda on the interior's compartments. Leave for a couple of hours.
2. Remove the baking soda.
3. Dilute a cup of white vinegar in a gallon of water. Dip a clean cloth in the solution and ring out as much as possible. Wipe down the entire piece and completely dry with a clean dry cloth.

Please understand, this is a natural occurrence of a newly built piece of furniture. Unlike the imports that sit in overseas warehouse, and up to 45 days crossing the ocean by ship, which allow the furniture stains additional time to fully cure.

Your furniture ordered from us was in the form of raw lumber, and the building process did not start until an order was placed by your retailer
