

3-SHELF STORAGE RACK

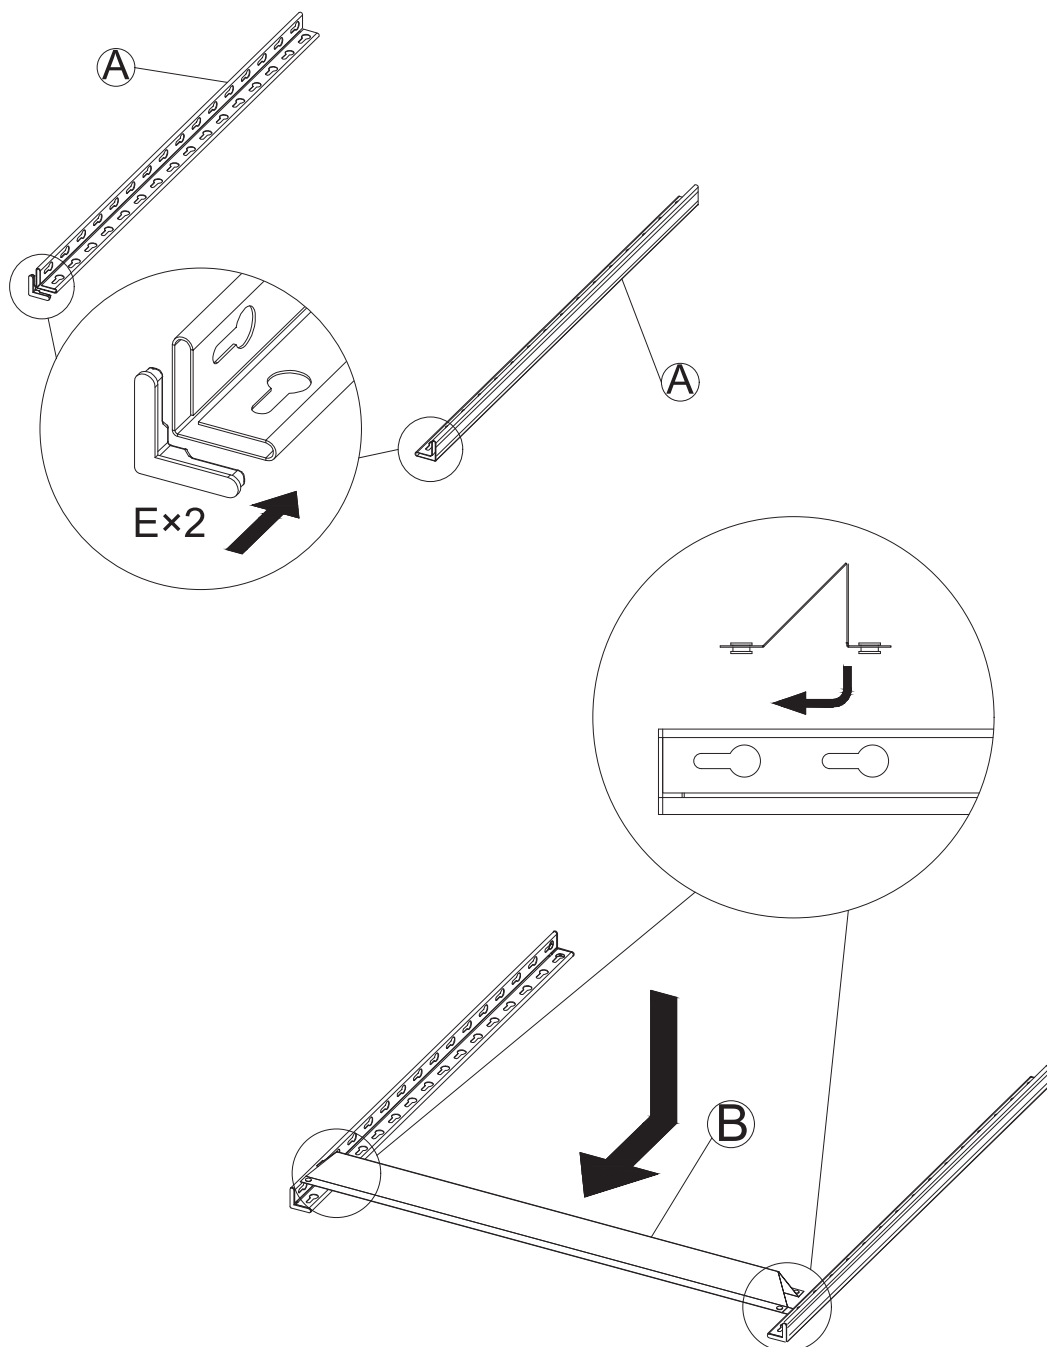

CONTENTS

Before getting started,ensure the package contains the following components

A	Post *4	B	Beam *6	C	Press board *3
					
D	Brace *6	E	Protective cover*8	F	Short fence *4
					
G	Anti-dumping device*2	H	Rubber mallet *1	I	Gloves *1
					

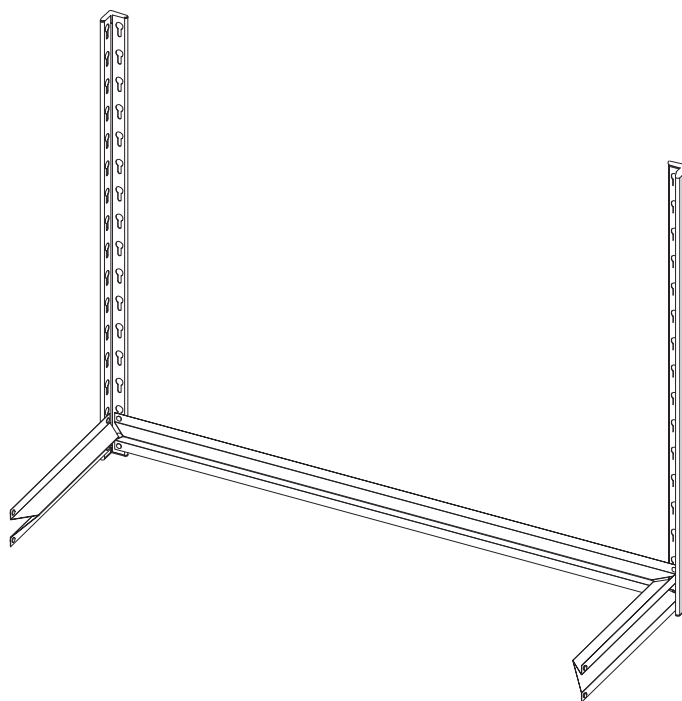

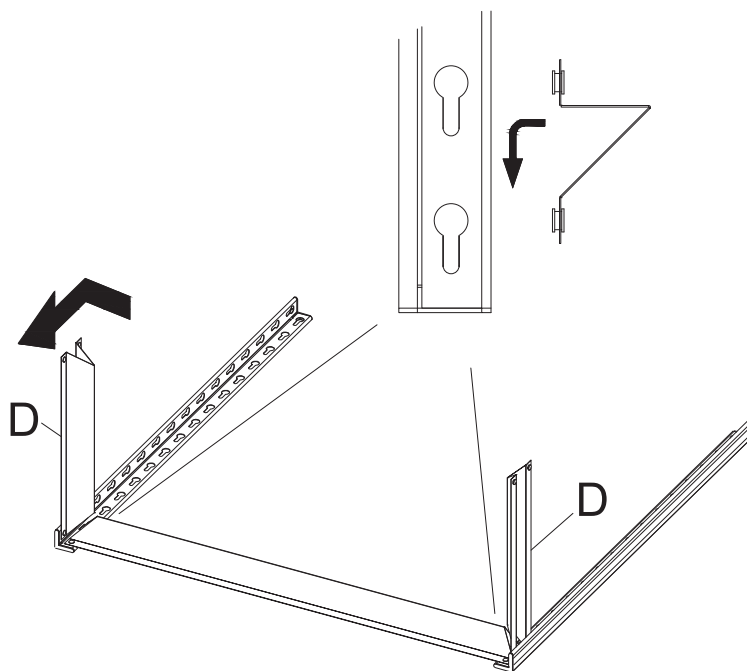

STEP 1

Align part A so that the large parts of the T-shaped hole cut-out face upwards. Insert the protective cover E into the lower slot of part A and tap it with the small hammer until it is fully inserted. Join part B to the two parts A. To do this, insert the two rivets of part B into the round holes of part A and then tap on part B with the small hammer until it is fully engaged. Note that the right-angled support of part B points upwards.

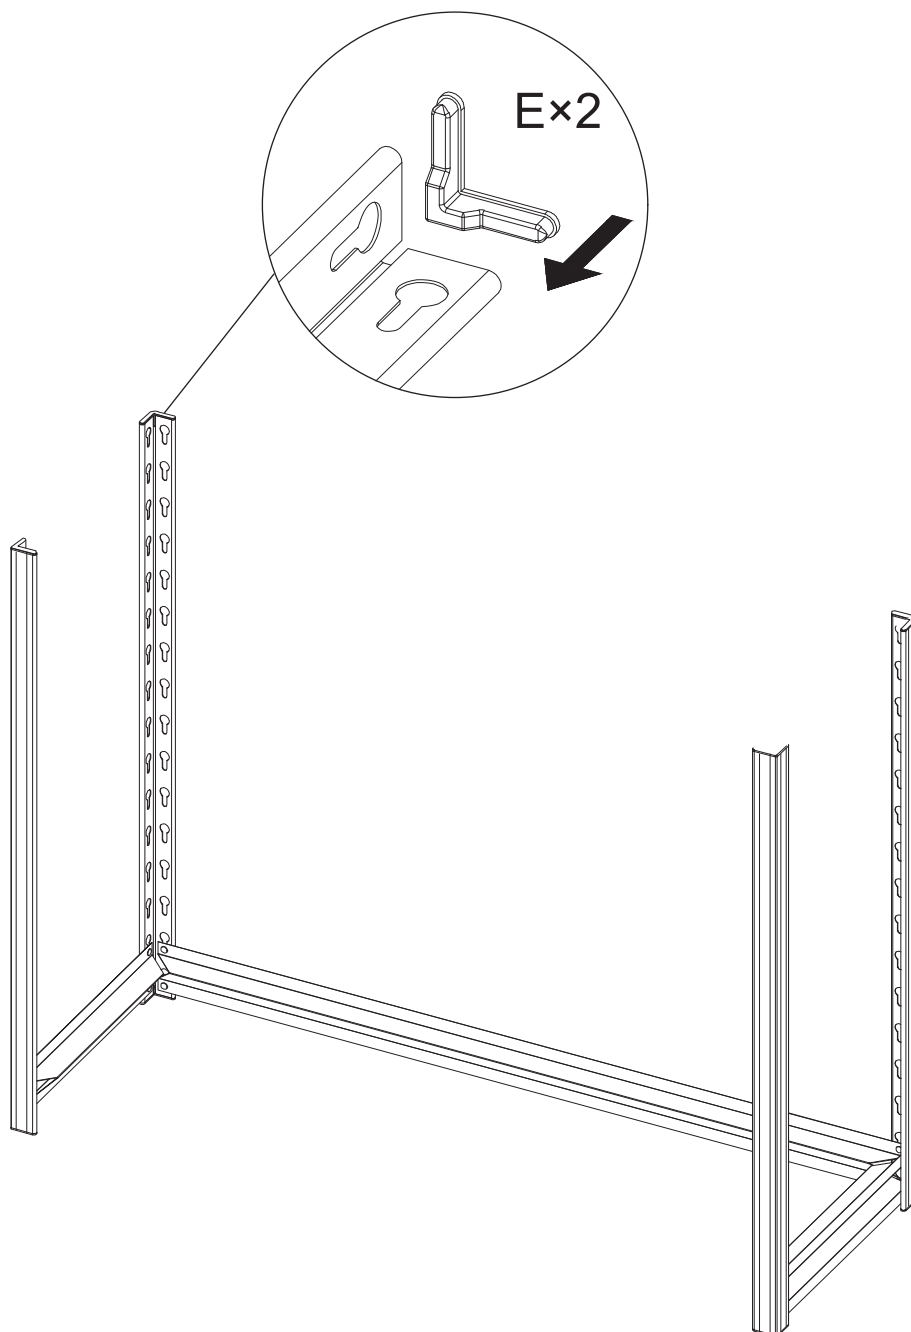

STEP 2

Snap the two rivets of the part D into the round holes in the two parts A and then hammer the part D completely in with the small hammer. Note that the right-angled side of the parts D points upwards.

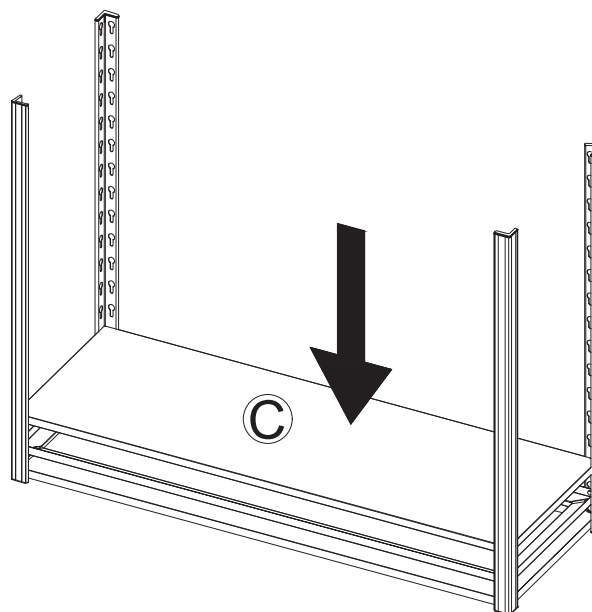

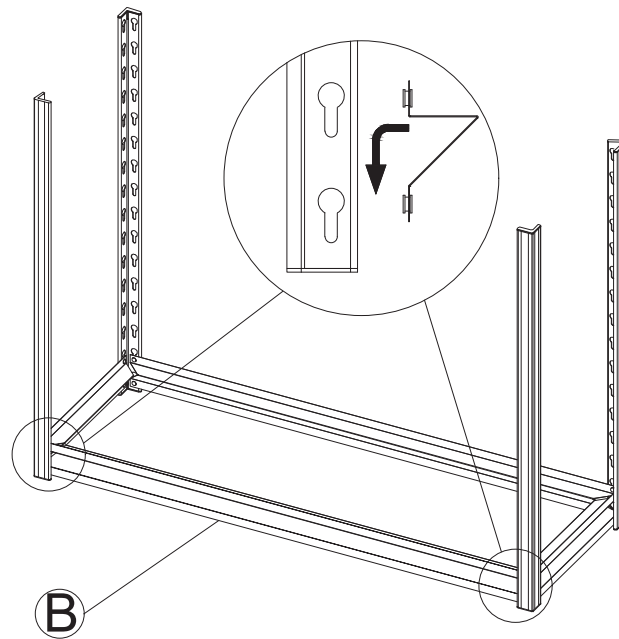

STEP 3

Install the two front parts A. Proceed as in step 1.

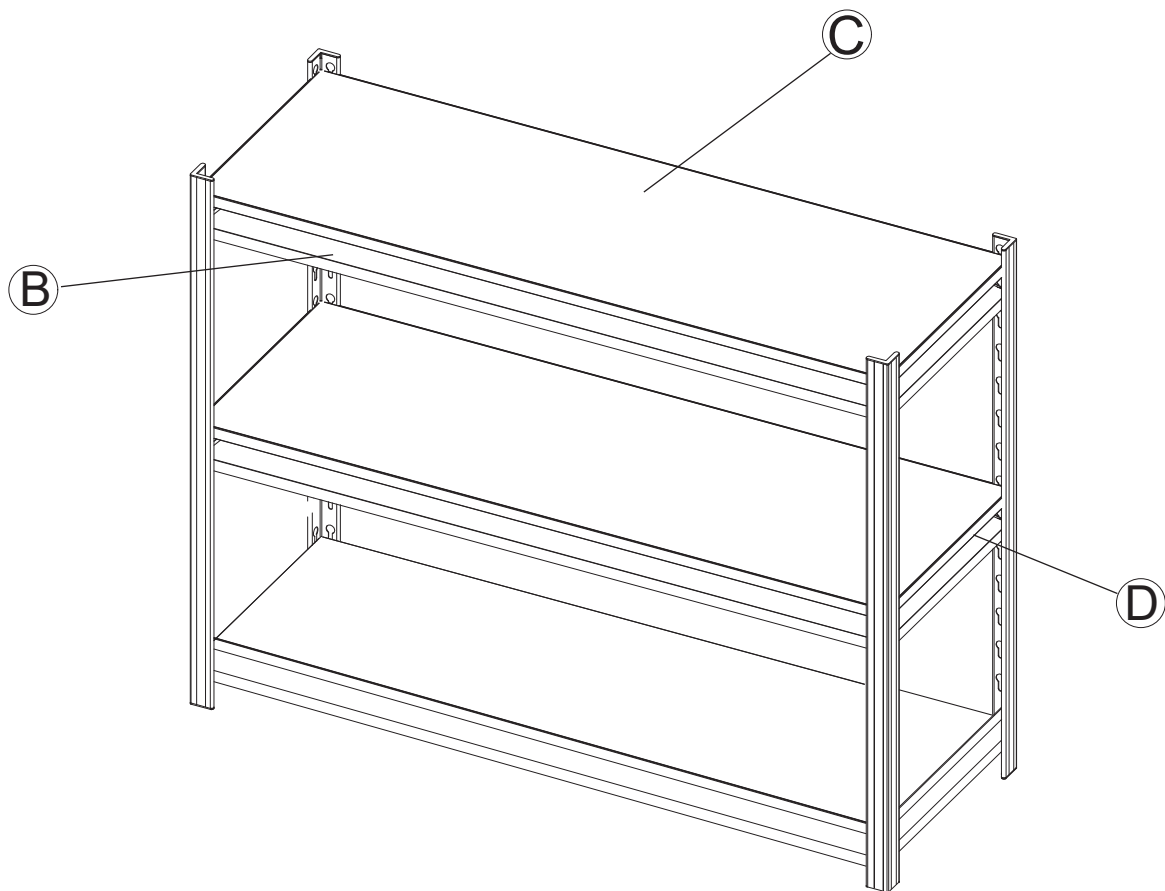

STEP 4

Insert the rivets of part B into the round holes of both part A, then hit part B with the hammer until it is fully engaged. Make sure that the right-angled side of part B is facing upwards. Insert a press board C.

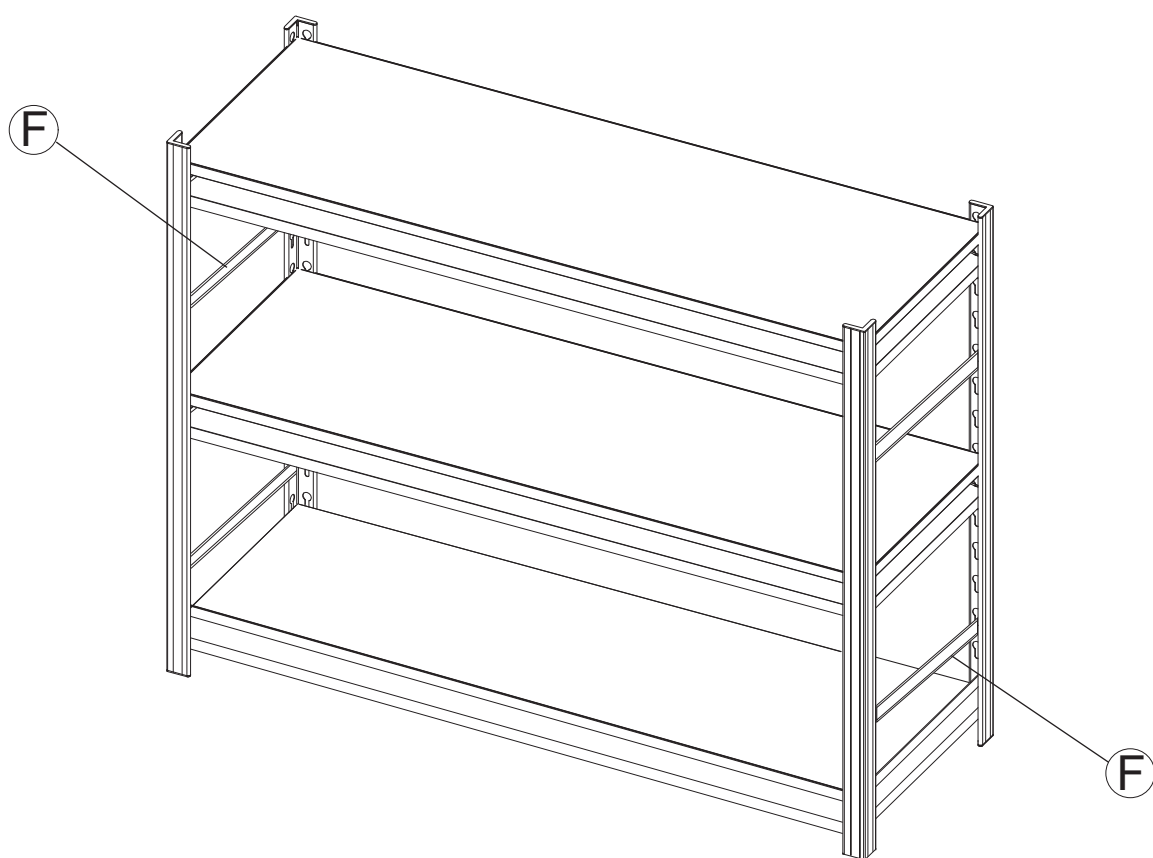

STEP 5

Follow the same steps to install the second and third layers.

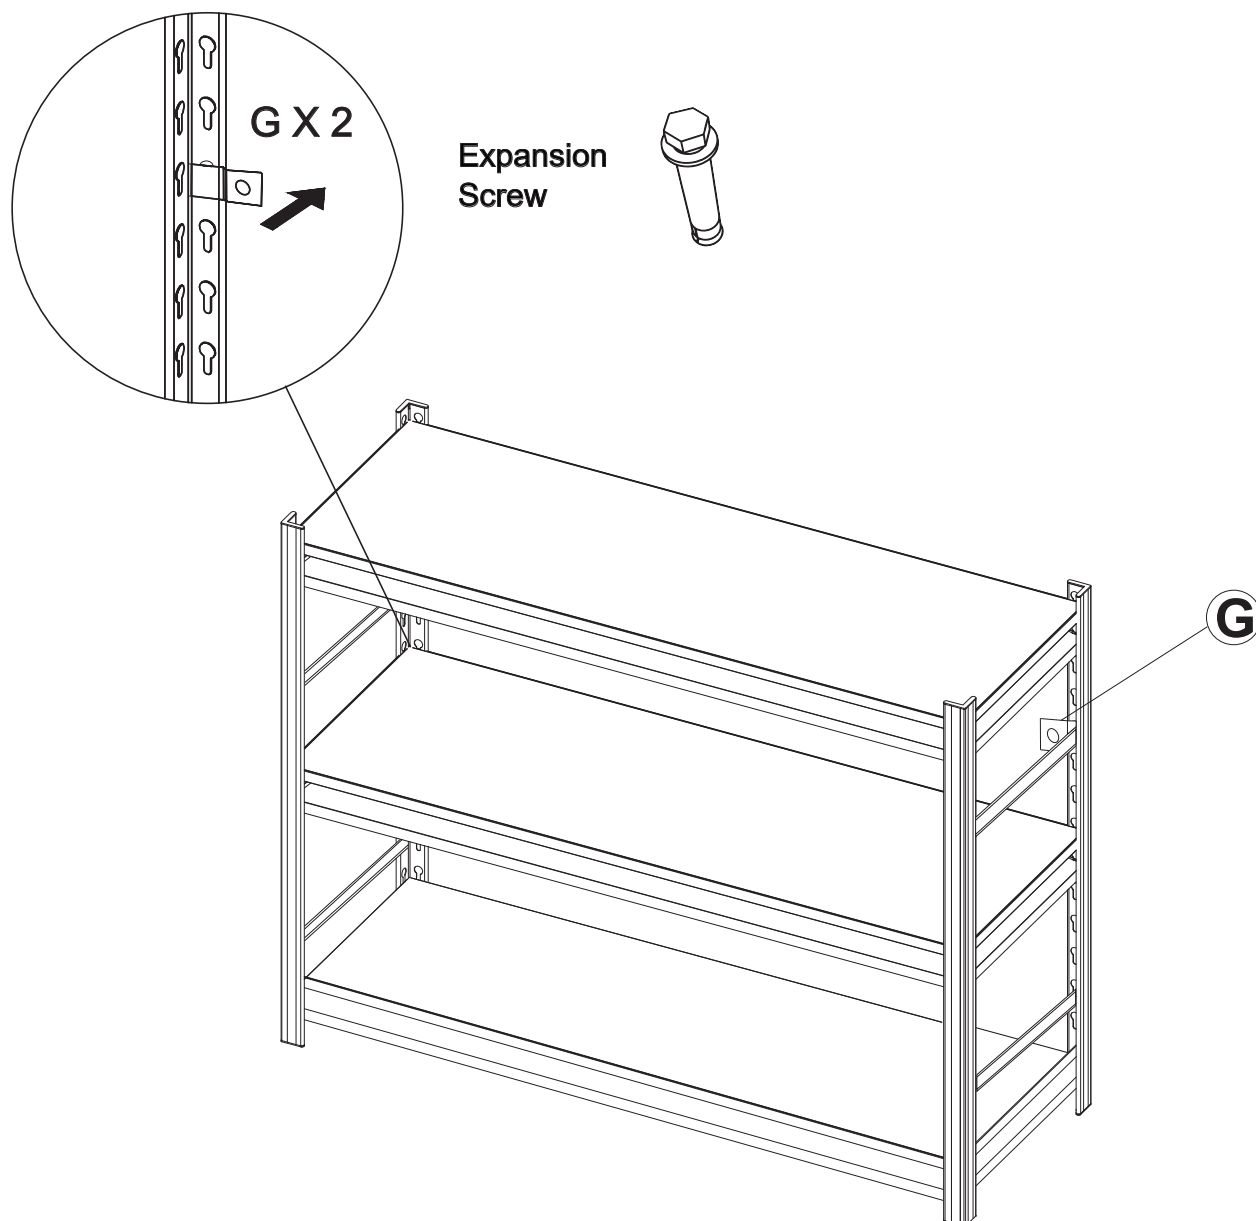

STEP 6

Installation of short fence F

STEP 7

Fixed to the wall

SAFETY AND COMPLIANCE

Please read and understand this entire manual before using the product.

CAUTION

- Be aware of dynamic loading! Sudden load movement may briefly create excess load causing product failure.
- Evenly distribute the weight on each shelf, and keep the heaviest loads on the bottom shelf.
- Use only on flat, level and hard surface capable of supporting the shelving and any items placed on it. Remember to only use the shelf on level ground with evenly distributed weight.
- Do not store flammable liquids in the unit unless they are secured in an approved container.
- Keep bystanders out of the area during assembly.
- This product is not a toy. Do not allow children to play with, on or near the unit.

WARNING

Do not stand on, step on, or alter this unit for anything outside the designed function of storage.

Use care when handling and assembling metal parts.

The metal may have sharp edges or corners. The use of protective gloves is recommended.

Always remember to use proper lifting techniques when moving the boxed or assembled unit.

PREPARATION

- Before beginning assembly of product, make sure all parts are present. Compare parts with package contents list. If any part is missing or damaged, do not attempt to assemble the product. It is recommended that this product be assembled on a clean, soft surface, such as a piece of cardboard. The assembling task can be performed by one person but availability of a second person will make the task simpler.

TROUBLESHOOTING

PROBLEM	POSSIBLE CAUSE	PROBLEM
Shelf is not level	- Beam(s) or brace(s) used for the same level are not at the same height or they are assembled upside down. - Rivets on the beam(s) or brace(s) are not fully seated into the post slots. - The ground is uneven or too soft.	- Re-assemble beam(s) or brace(s). - Fully seat the rivets. - Move the shelf to a flat, level and hard surface.
