

Set-up Your Skye

air+health
SKYE

- 1** Lay Skye down on its side (avoid laying on its face). Unscrew the base cover (turn counterclockwise).

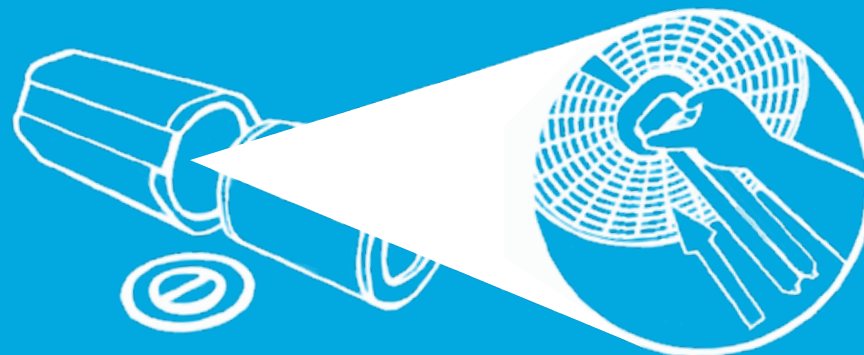

- 2** Remove the PRO-Cell filter from Skye.

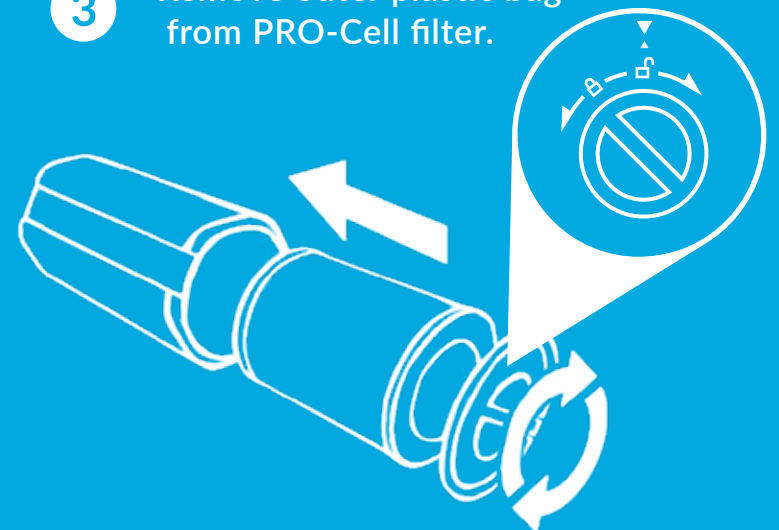

- 3** Remove outer plastic bag from PRO-Cell filter.

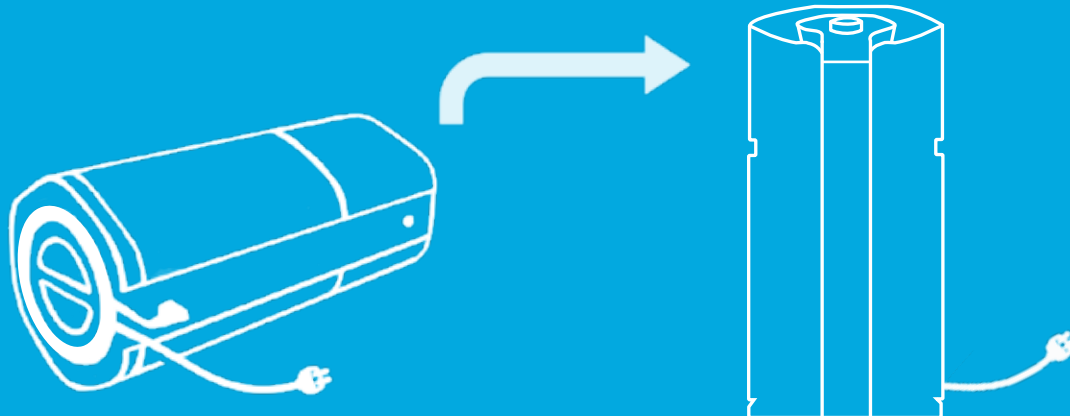

- 4** Remove the UVC lamp from the box.

- 5** Hold the base of the lamp and plug into Skye until you hear a click.

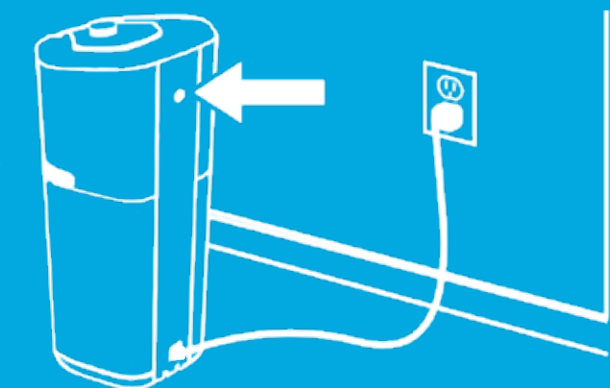

- 6** Place the "PRO-Cell" filter back into Skye. Close the base cover by aligning the arrows and then turning clockwise into the locked position. If the cover is not completely flush with the base, the unit will not operate.

- 7** Plug power cord into Skye and wrap any excess cord around the base.

- 8** Lift Skye back up and place it in an open space to aid airflow.

- 9** Plug the power cord into a power outlet and tap the power button (on back).

Download the "air health IAQ" app to complete set-up and enable controls from your phone.

FLIP OVER FOR
HOW TO USE SKYE

How to Use

Click to change modes.

Smart Mode

Manual Mode

On this setting, you set the minimum fan speed and Skye will automatically increase fan speed if it measures poor air quality. The fan will never decrease below this speed.

On this setting, you set the fan speed and Skye will not change speed.

Filter Life

Color will change to alert when the filter needs to be replaced.

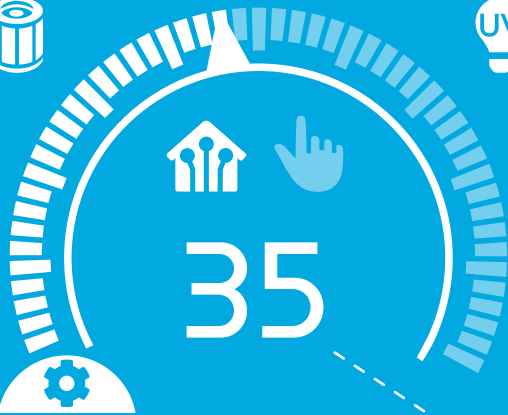

Lamp Life

Color will change to alert when the lamp needs to be replaced.

Fan Level

On the home page, turning the dial changes the fan level.

Settings

Turn all the way left until the ⚙️ (cog) icon is selected and click to enter settings.

WiFi Status

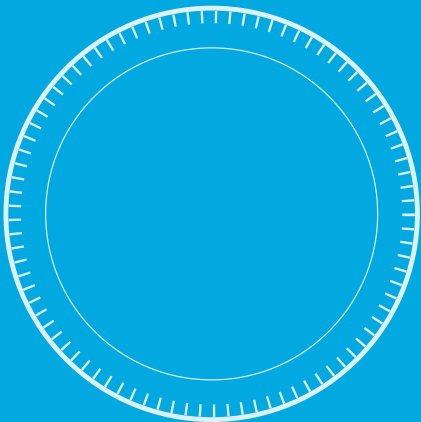

Lamp On/Off

Filter Life

Lamp Life

Air Quality Indicator

0-500 scale, the number will change colors to indicate different levels of air quality. 0 is great air, 500 is hazardous.

Control Dial
turn & click

READ SKYE USER MANUAL FOR FURTHER INSTRUCTIONS ABOUT CONTROLS, SETUP, AND SAFETY.
