Assembling the top and bottom sections:

Since the cabinet body is quite heavy, we recommend laying it down for assembly. You will need multiple people to help connect the 14 connection points between the top and bottom sections. This can be a bit challenging, but don't worry—you can do it!

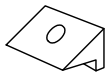

First, insert the 12 wooden dowels (C) as shown in the illustration.

Please be patient and gently move the top and bottom parts to ensure they align and fit together properly. Once you've confirmed that all connection points are tightly secured, finally tighten all the eccentric wheels (B).
