

## PERFECT FOR PAD ATTACHED FLOORING

### WORKS WELL WITH OTHERS!

QuietWalk LV knows that flooring used in everyday life needs all the muscle it can get. That's why it's the perfect complement to your vinyl floors even with planks that have pre-attached pads.

#### But why use both?

Attached pad flooring is a great start to providing the support your floor needs, however, complete moisture control, sound management, support and insulation can not happen without the uninterrupted coverage of QuietWalk LV.

**This is because QuietWalk LV's dense, uncrushable, construction provides continuous support to the seam and click together mechanism where pre-attached pads can't reach, making it the perfect combo for pad attached floors that can handle everyday life!**

QuietWalk LV protects seams and joints that aren't covered by pre-attached pads
