

4-SHELF STORAGE RACK

User Guide

4-Shelf Storage Rack

Contents:

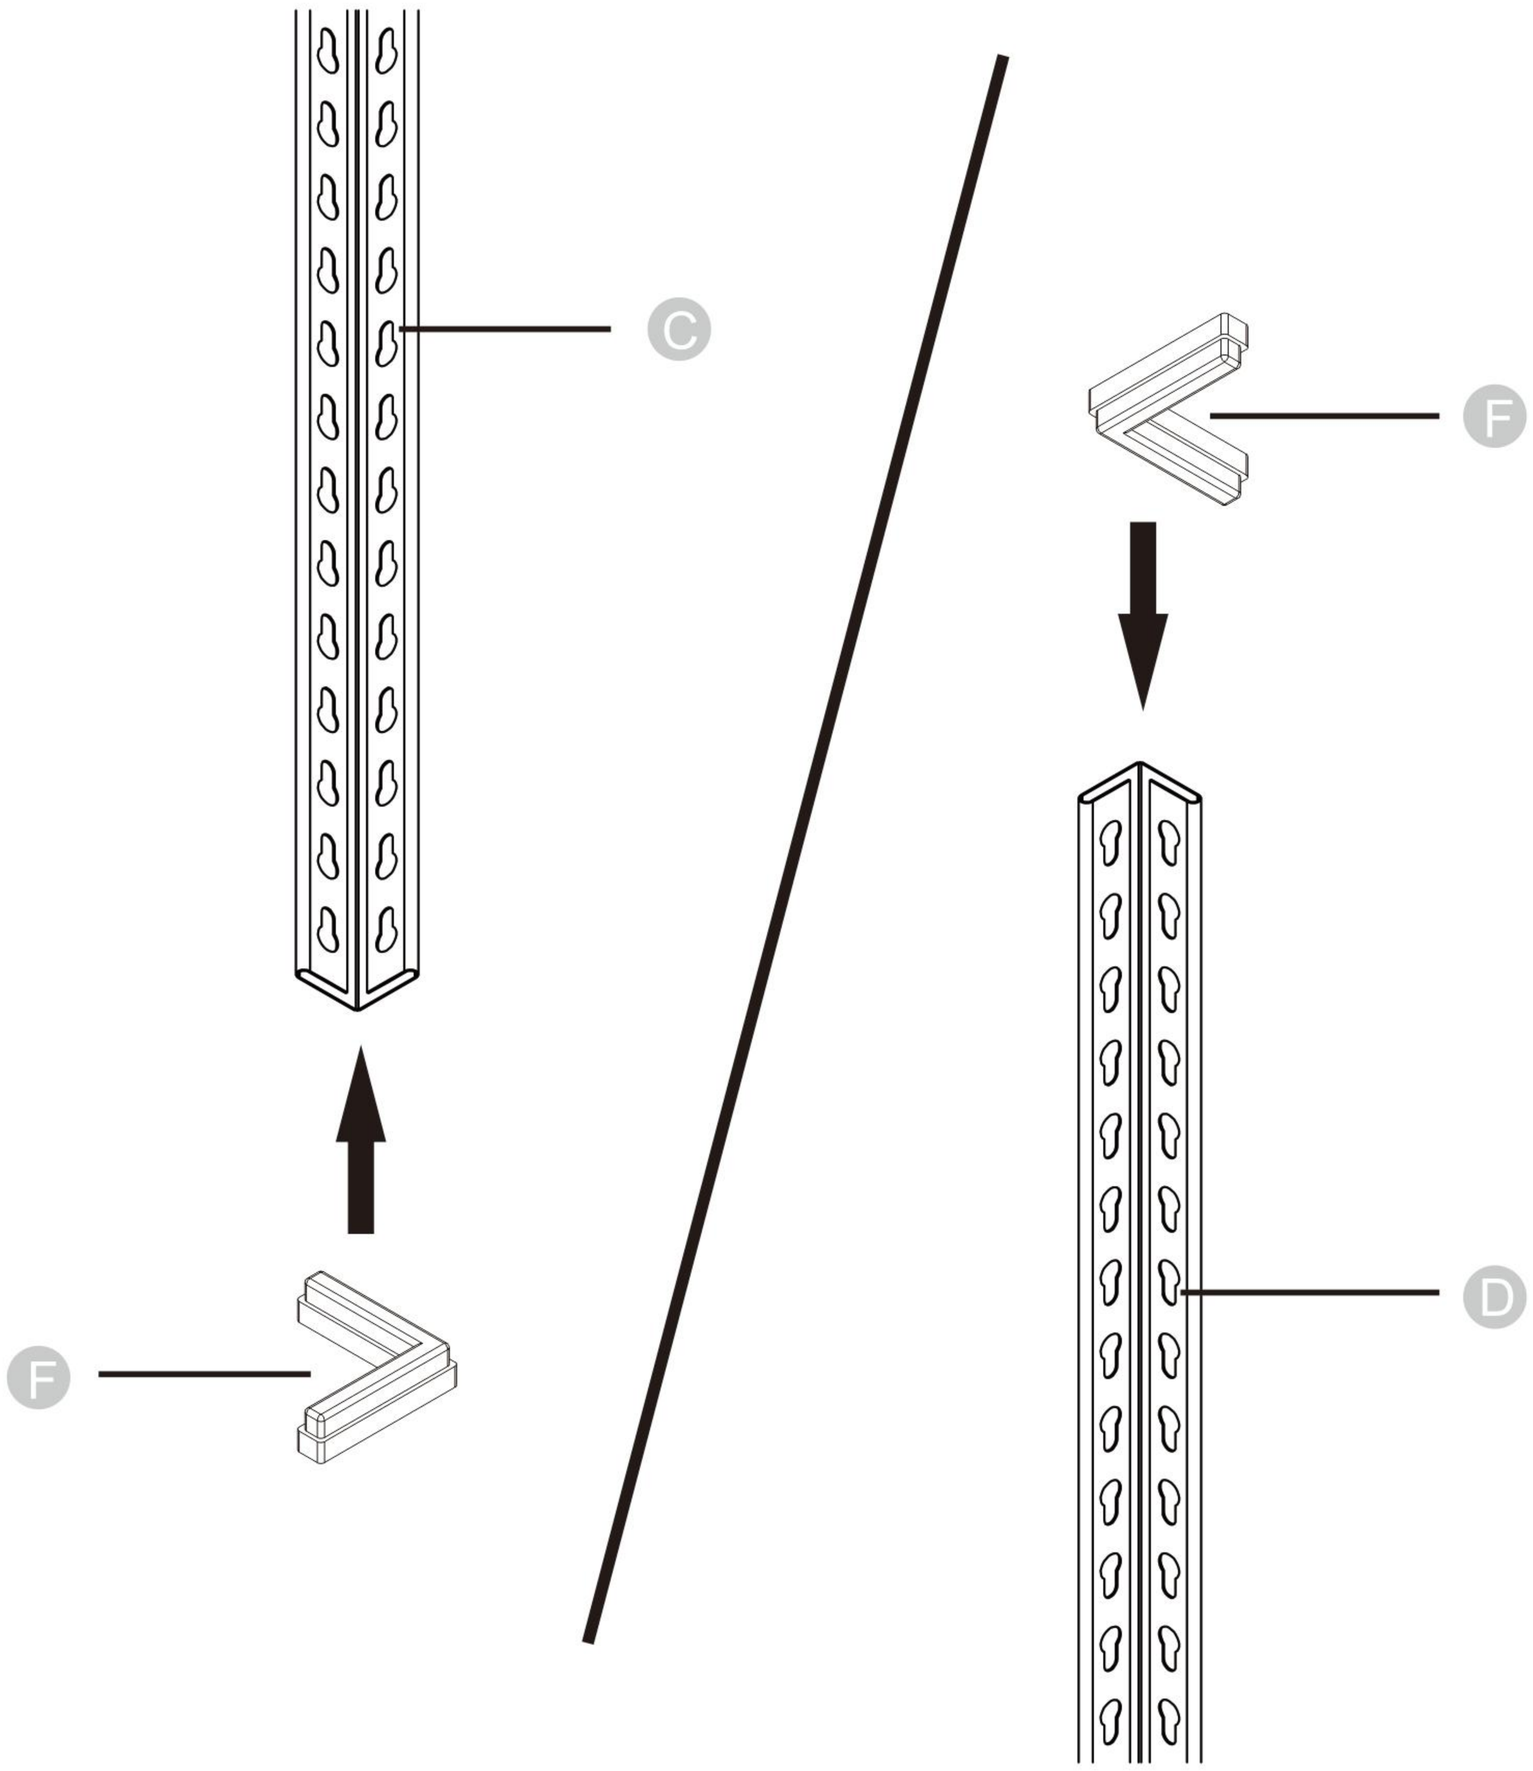

Before getting started,ensuren the package contains the following components:

	Part	Qty
A	Beam 	8
B	Brace 	8
C	Post 	4
D	Post 	4
E	Press board 	4
F	Protective cover 	16 (8 Spare parts)
G	Anti-dumping device 	2
H	Connector 	5 (8 Spare parts)
I	Rubber mallet 	1
J	Gloves 	1

Assembly

Step1:

Insert the protective covers

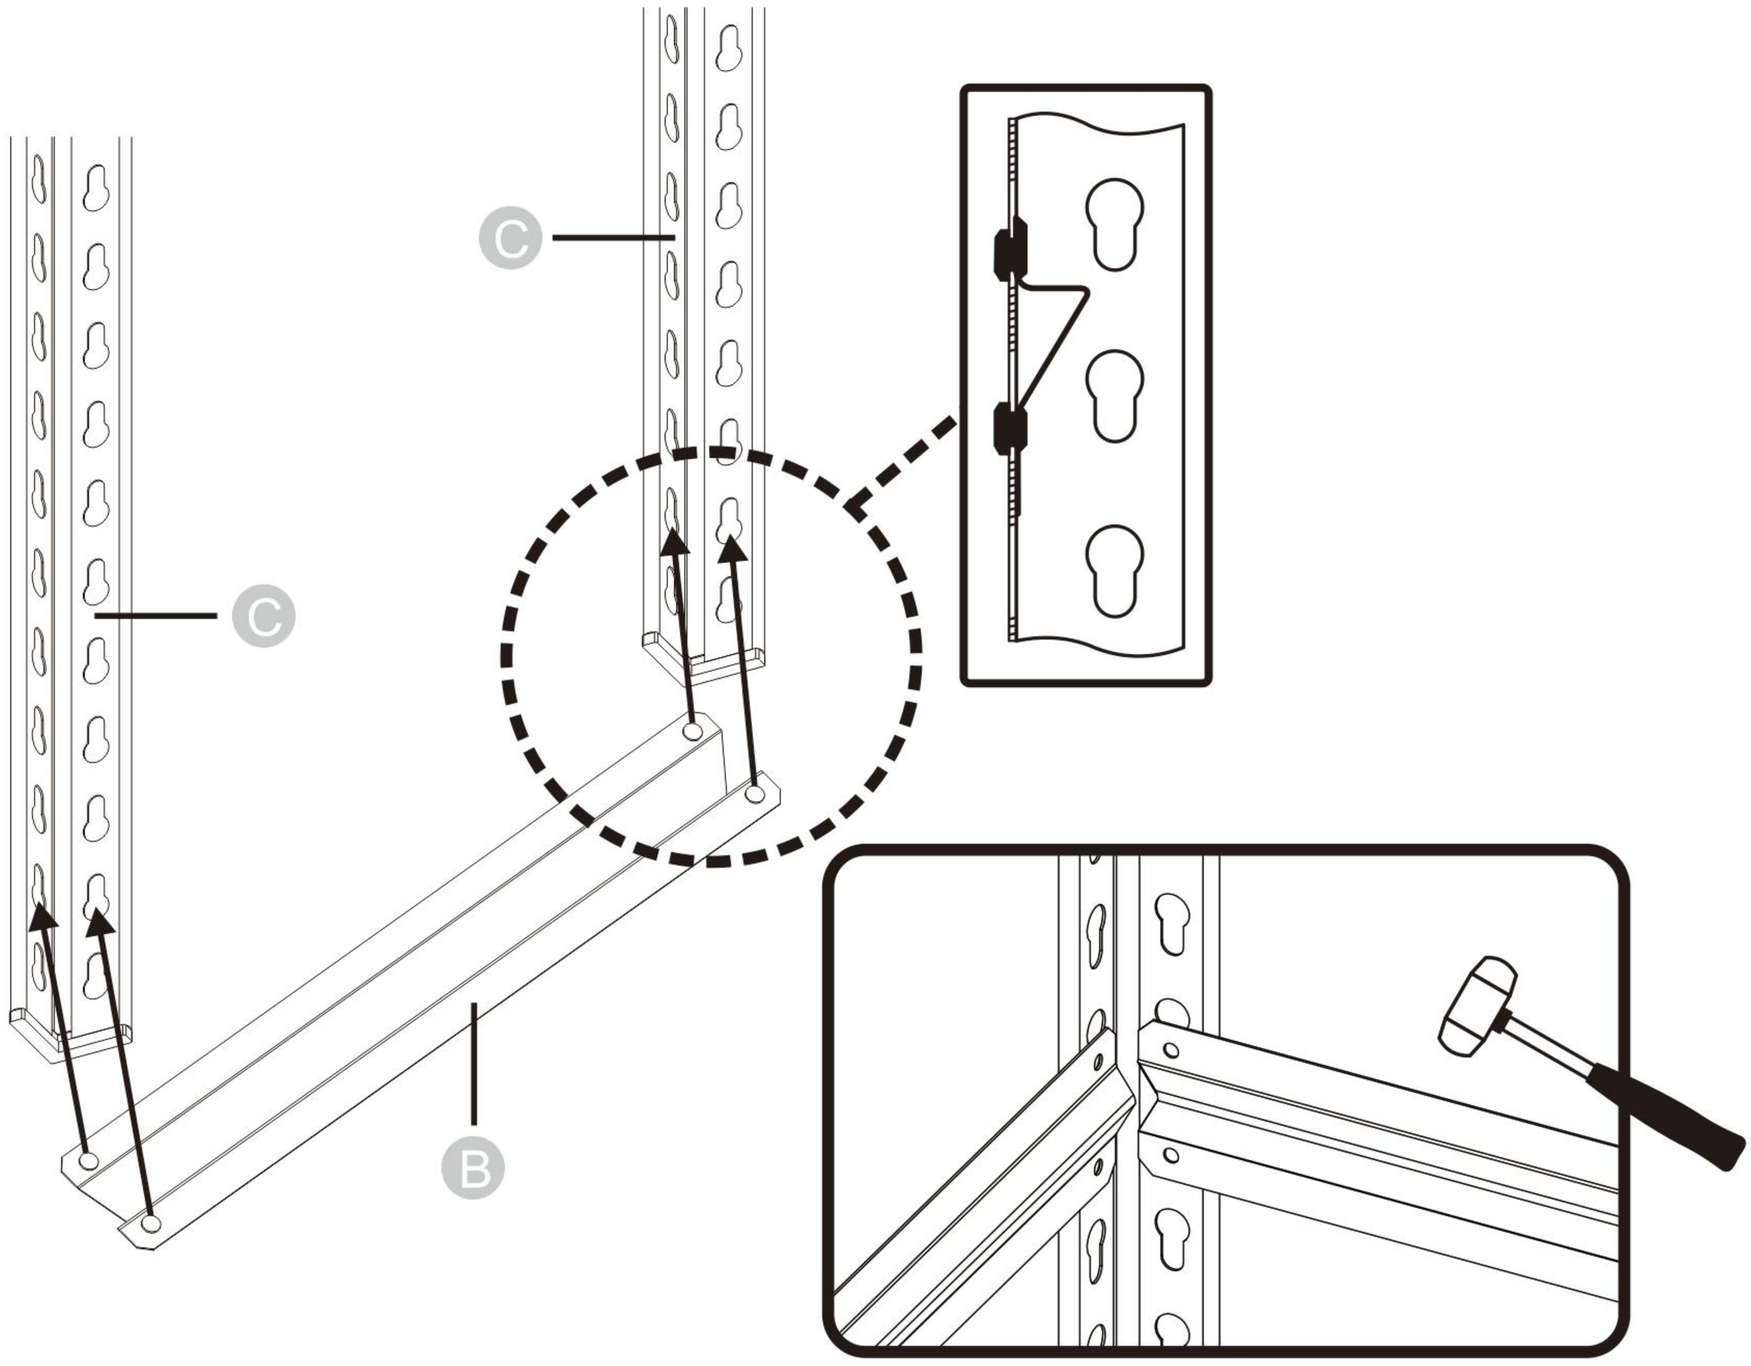

- Insert all 4 protective covers F to the bottom of the post C ,
  insert another 4 protective covers F to the top of the remaining 4 pieces post D .
- **Note:** Do not omit this step, which could protect your floor from scratches.

Assembly

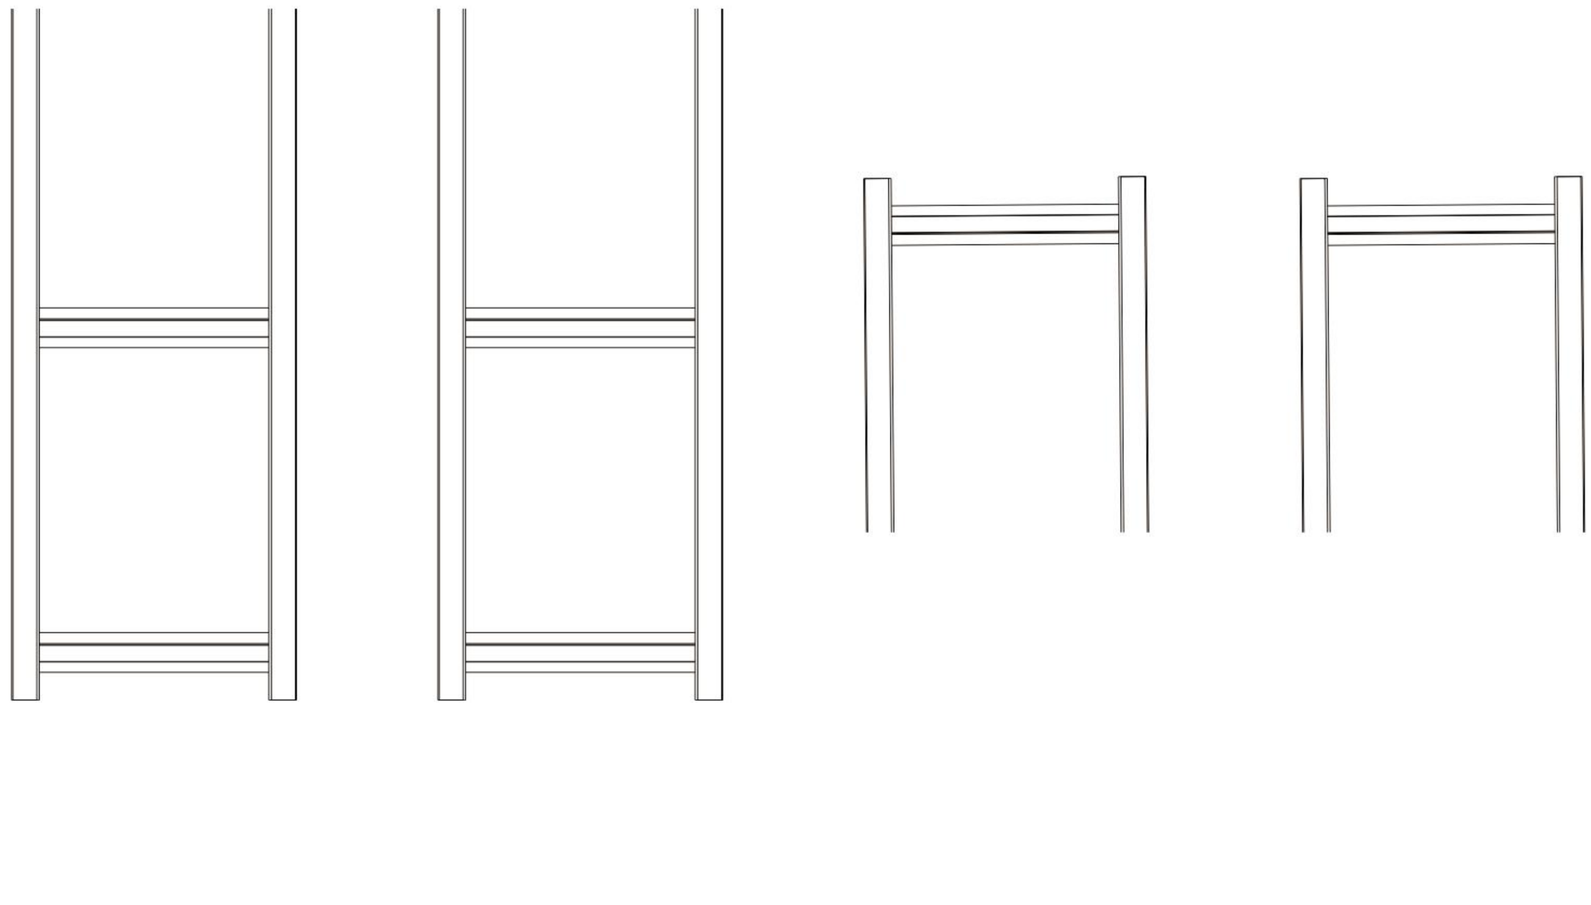

Step 2:

Setting Up the Brace

- Slide the rivets of brace B into posts C of your desired location with the key slot pointing down and shelf ledge of brace B facing up. Tap lightly to seat rivets.
- **Note:**Make sure all the rivets are fully seated into the post slots.You may want to use a rubber mallet (not included) to help push the rivets into the post slots.This applies to all the rivets used in this unit.

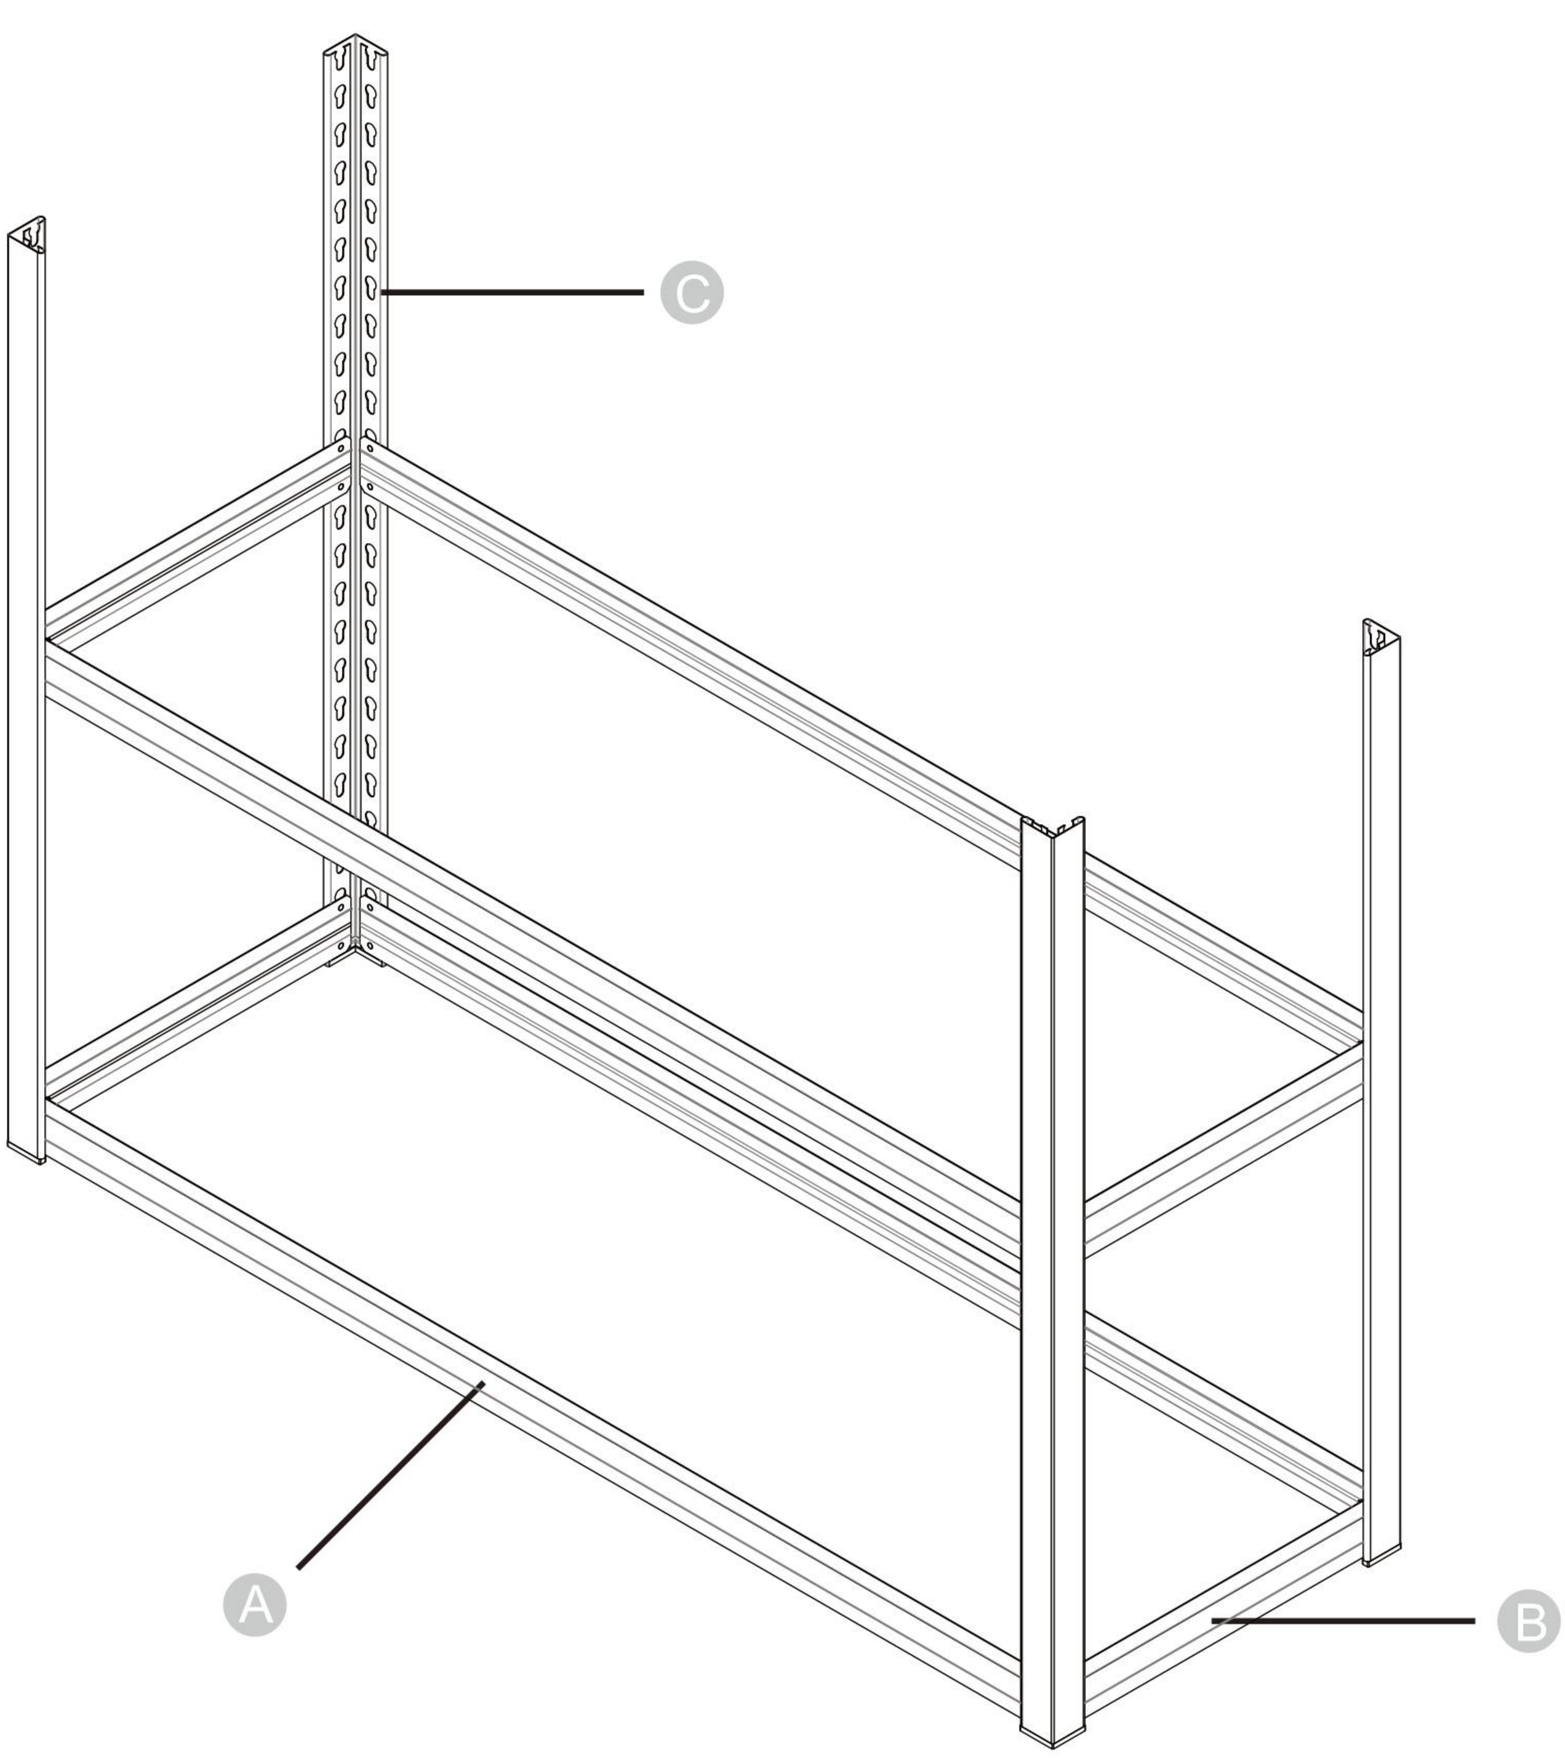

Install as follows :

Assembly

Step 3:

Setting Up the Beams and the Braces

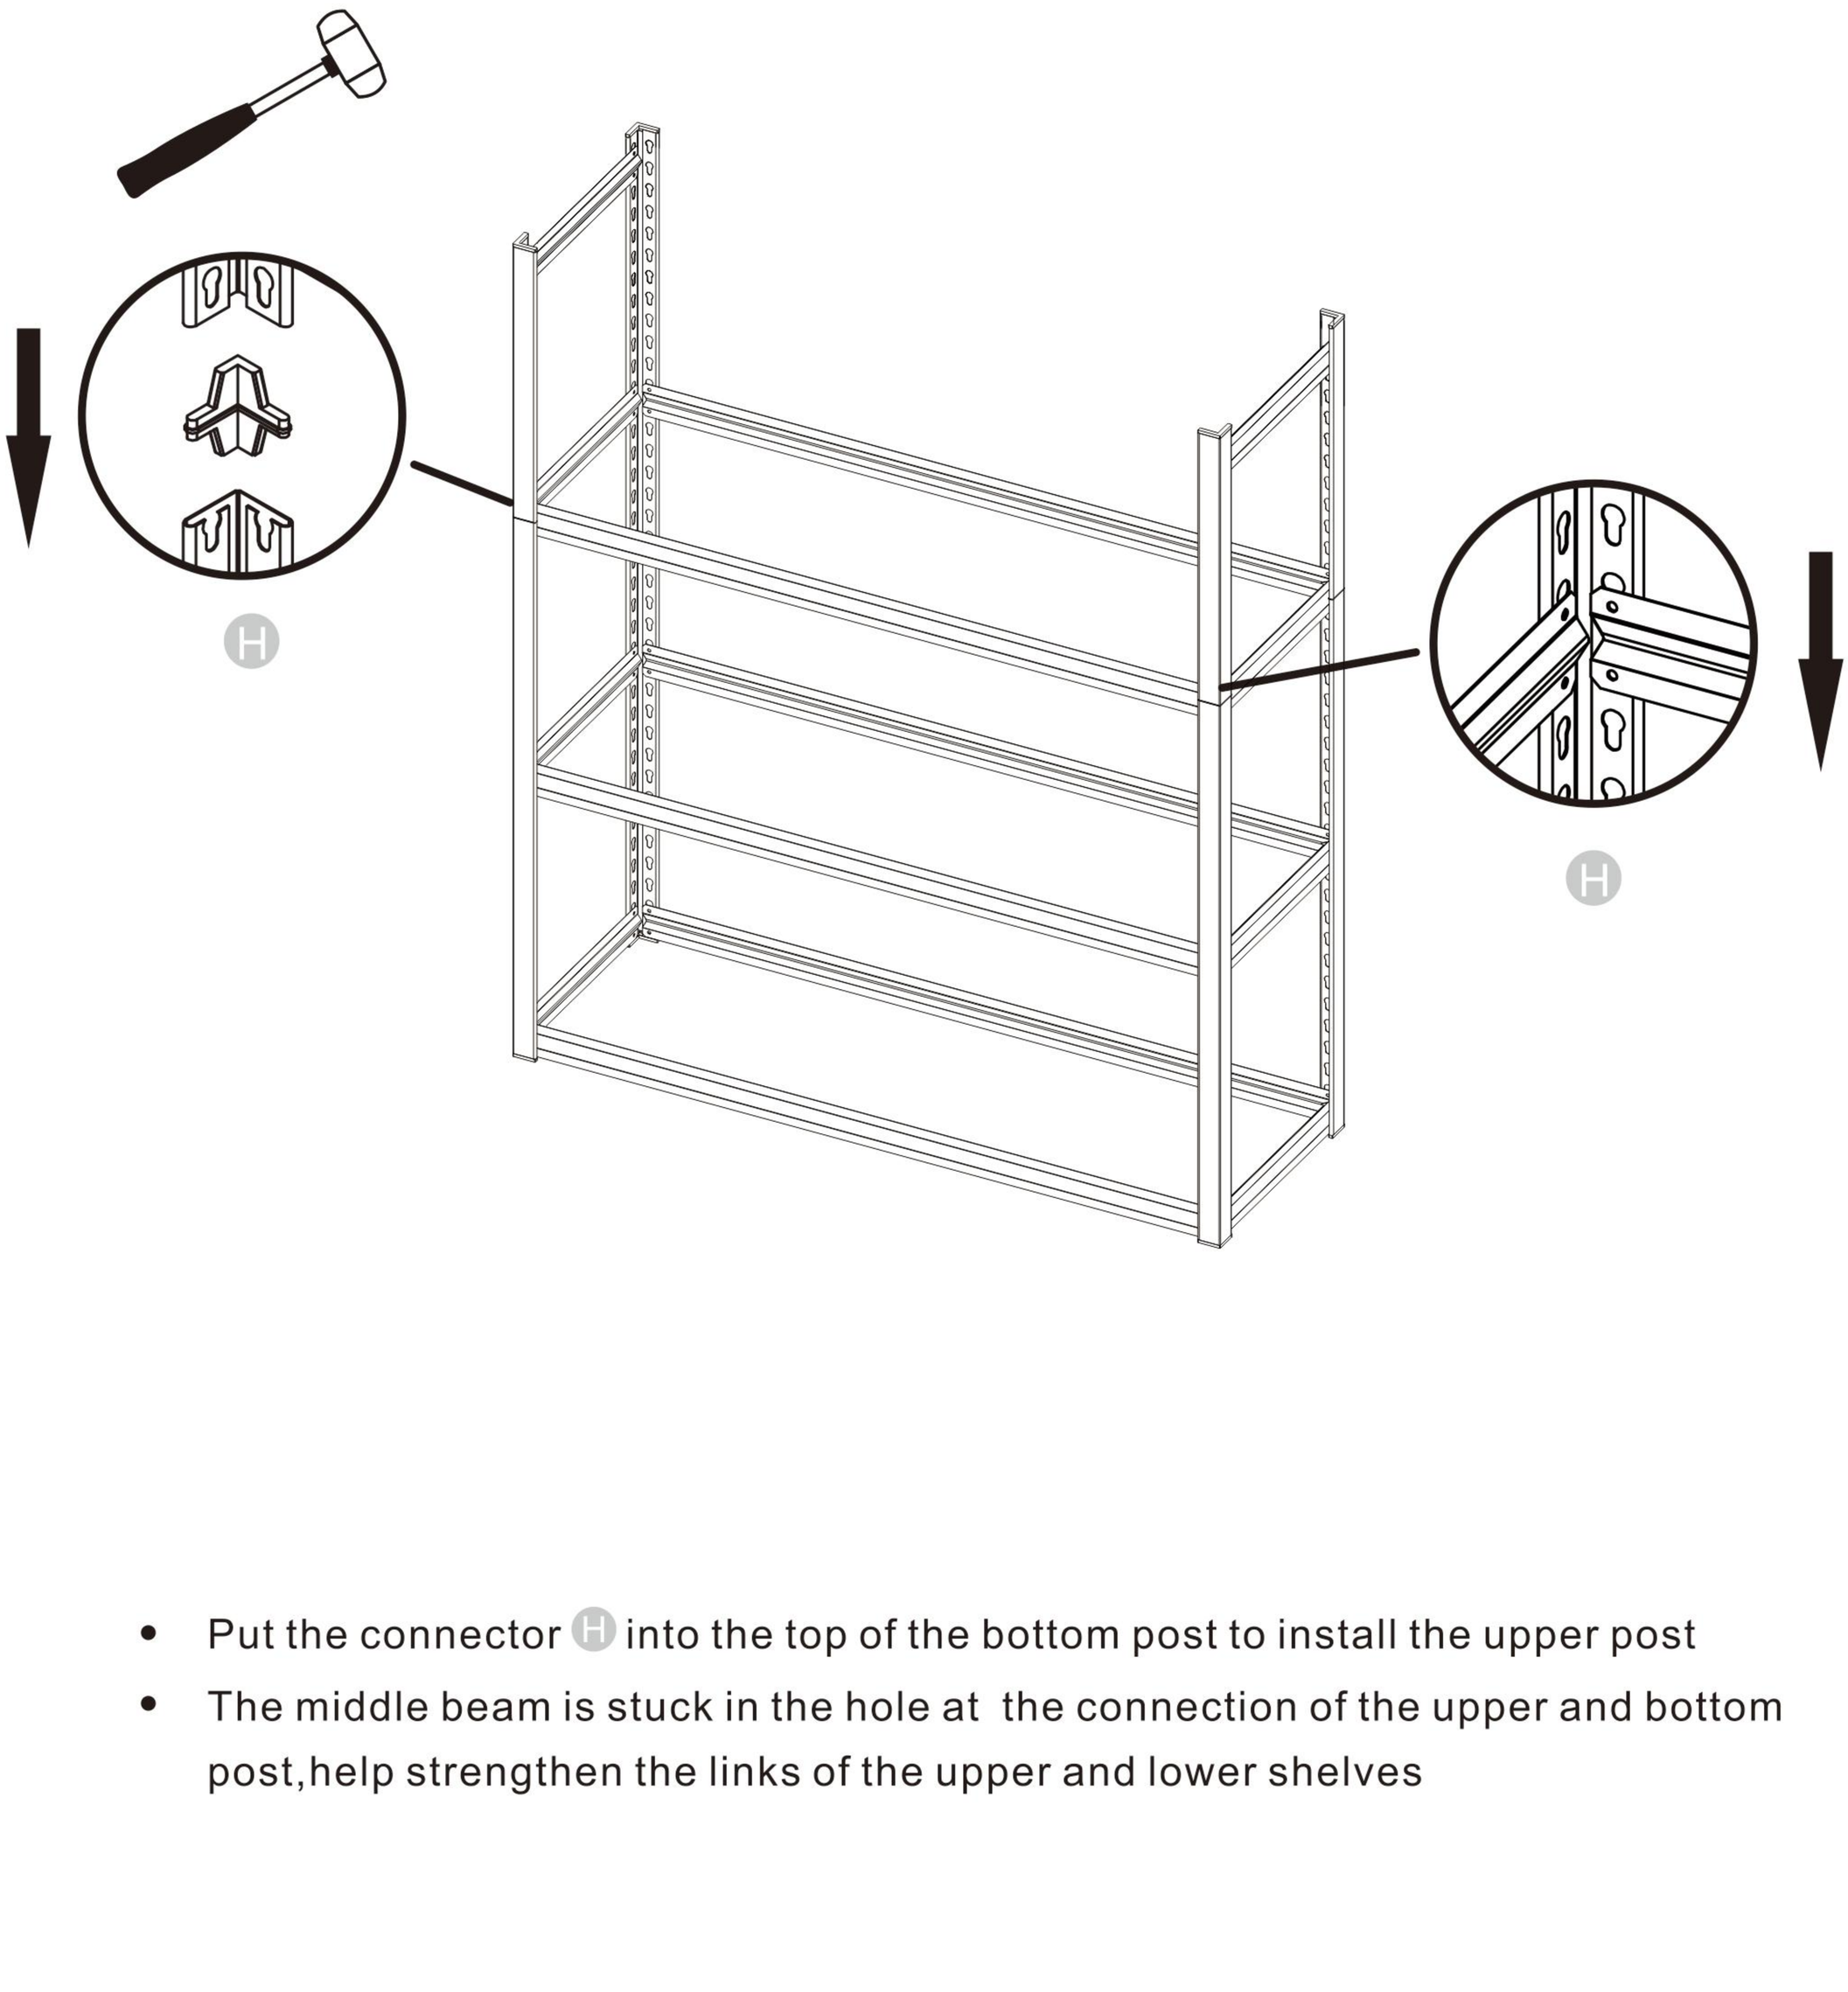

- Repeat the previous step 2 to attach beams A and braces B to posts C until the first and the second levels are assembled .
- **Note:**Each of the beams A and braces B on the same level should be at the same height.

Assembly

Step 4:

Setting Up the Upper Post

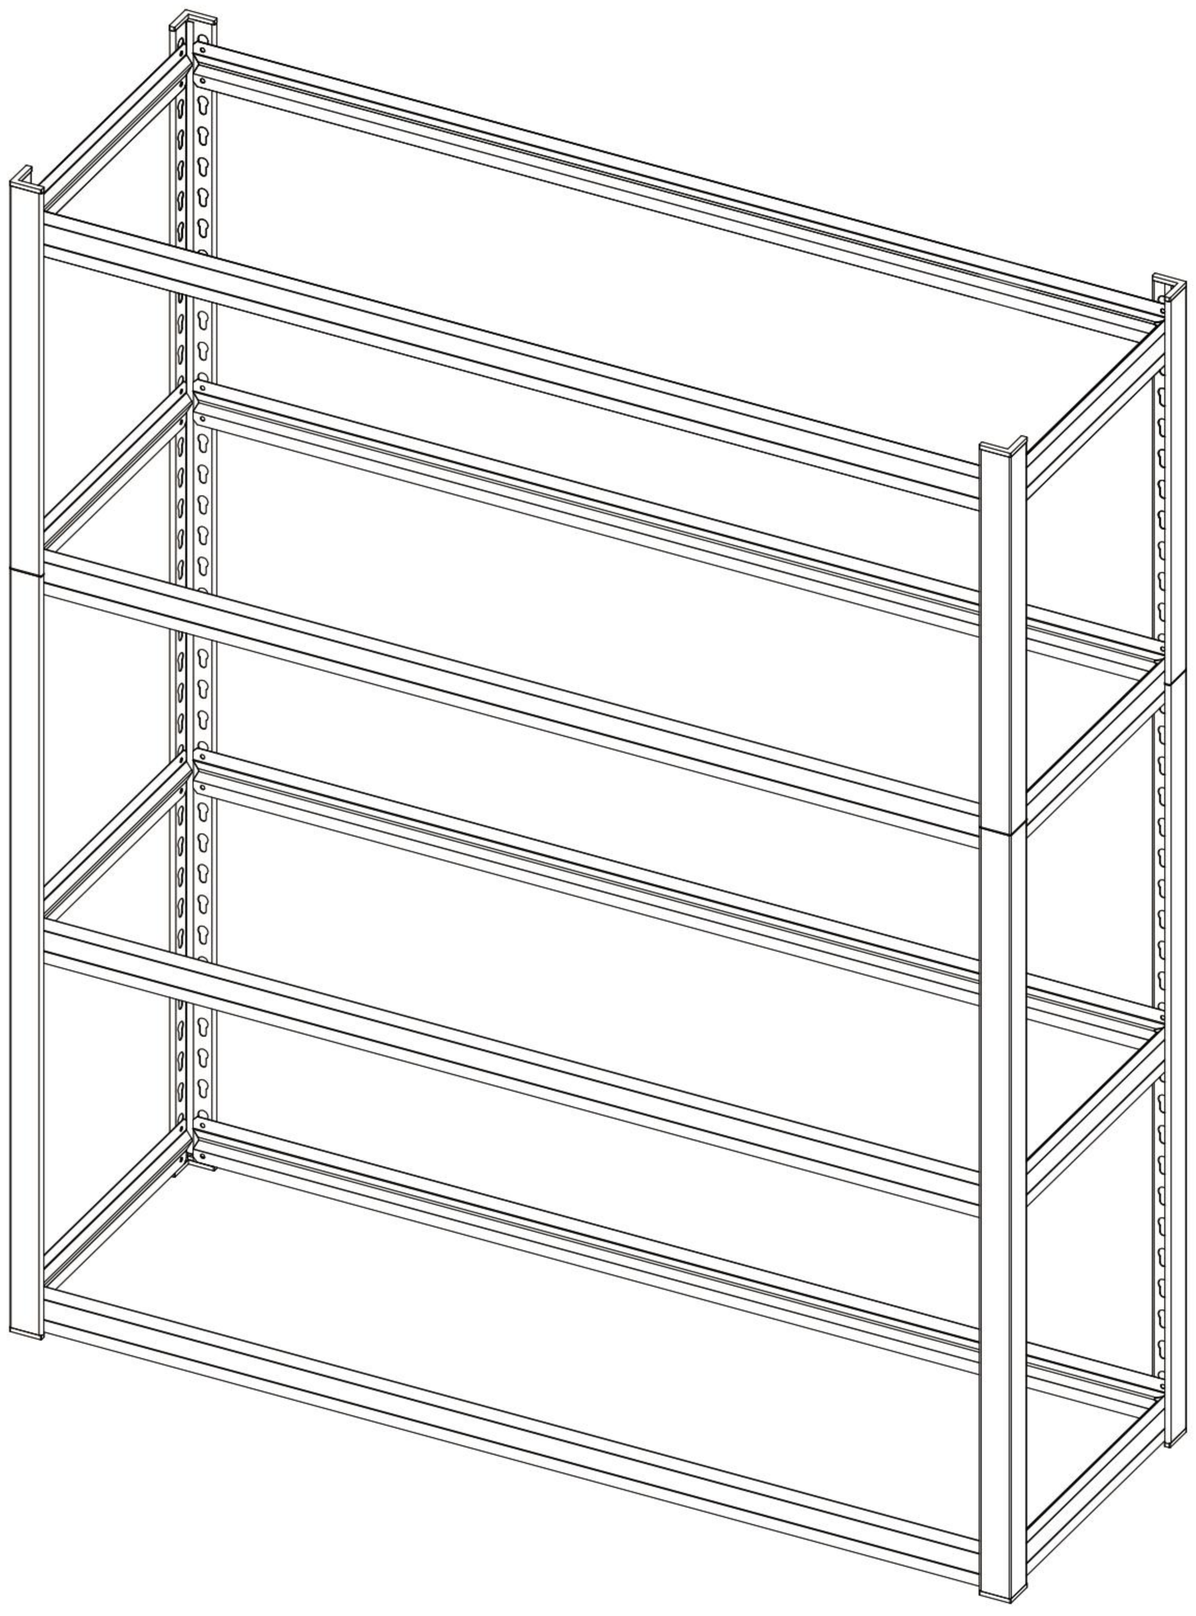

- Put the connector H into the top of the bottom post to install the upper post
- The middle beam is stuck in the hole at the connection of the upper and bottom post,help strengthen the links of the upper and lower shelves

Assembly

Step 5:

Setting Up the remaining Beams and Braces

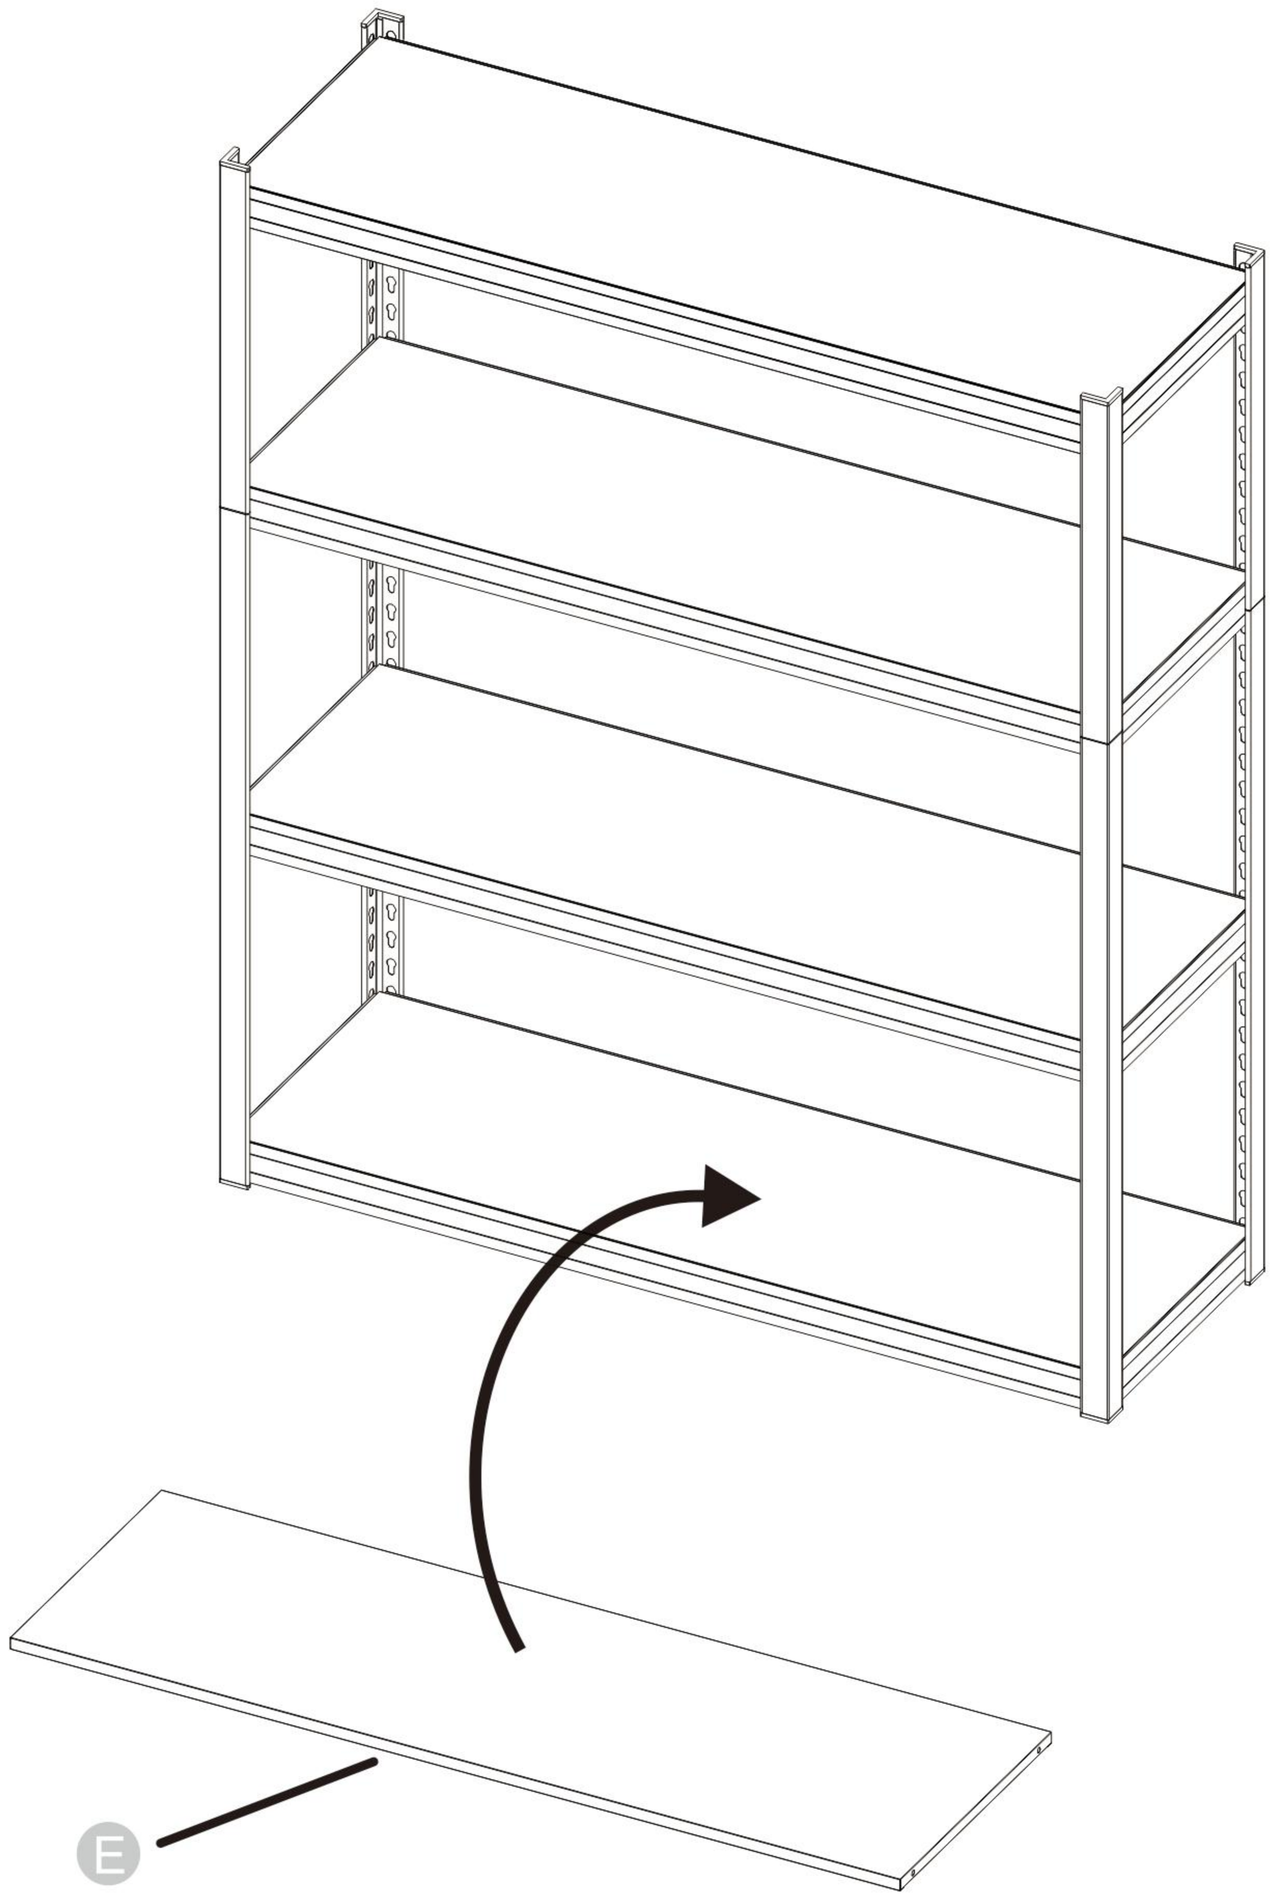

- Repeat step 2 and step 3 to assemble the remaining beams and braces

Assembly

Step 6:

Setting Up the press boards

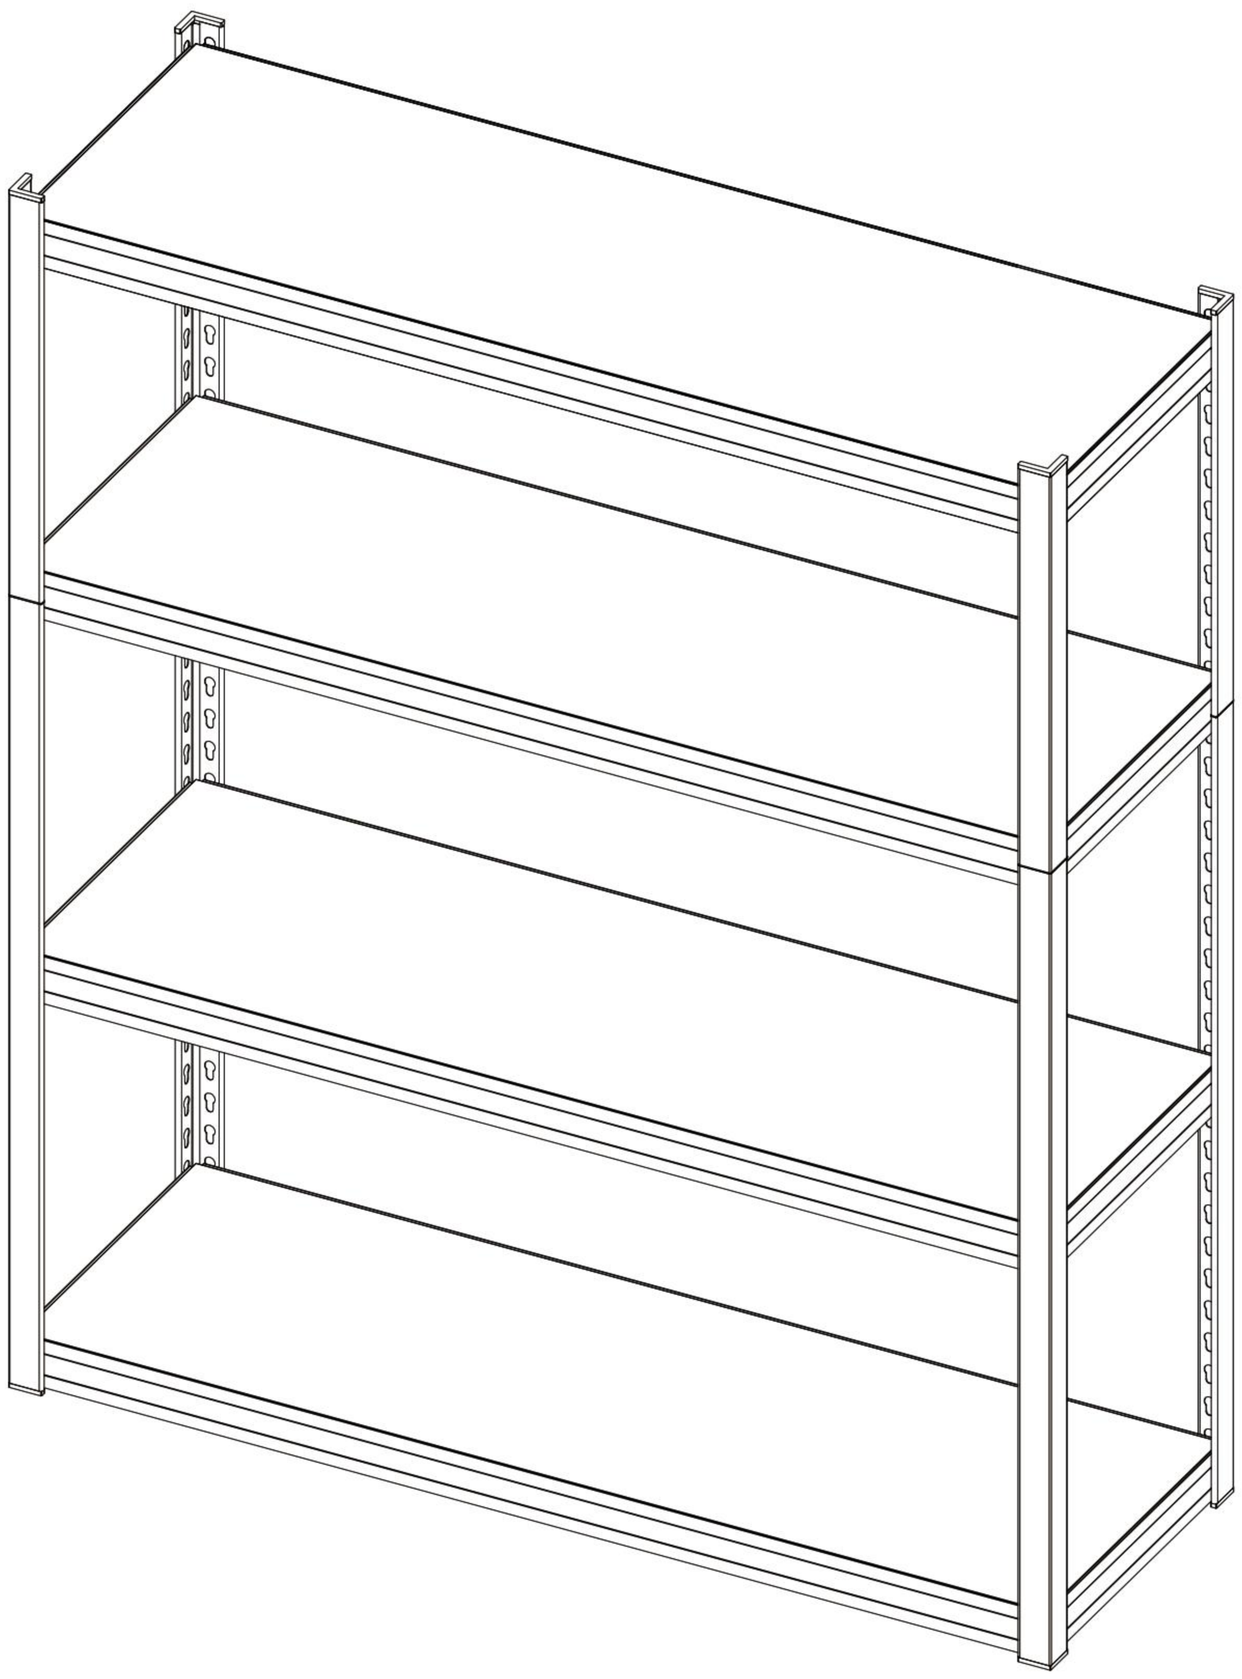

- Hold the press board at an angle to make it easier to fit them onto each previously assembled level on the frame

Assembly

Step 7:

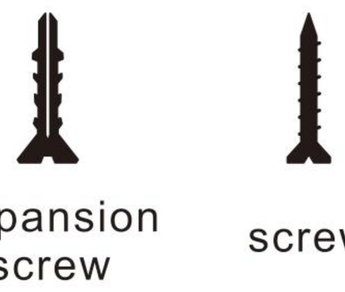

Installation complete

Assembly

Fixed to the wall

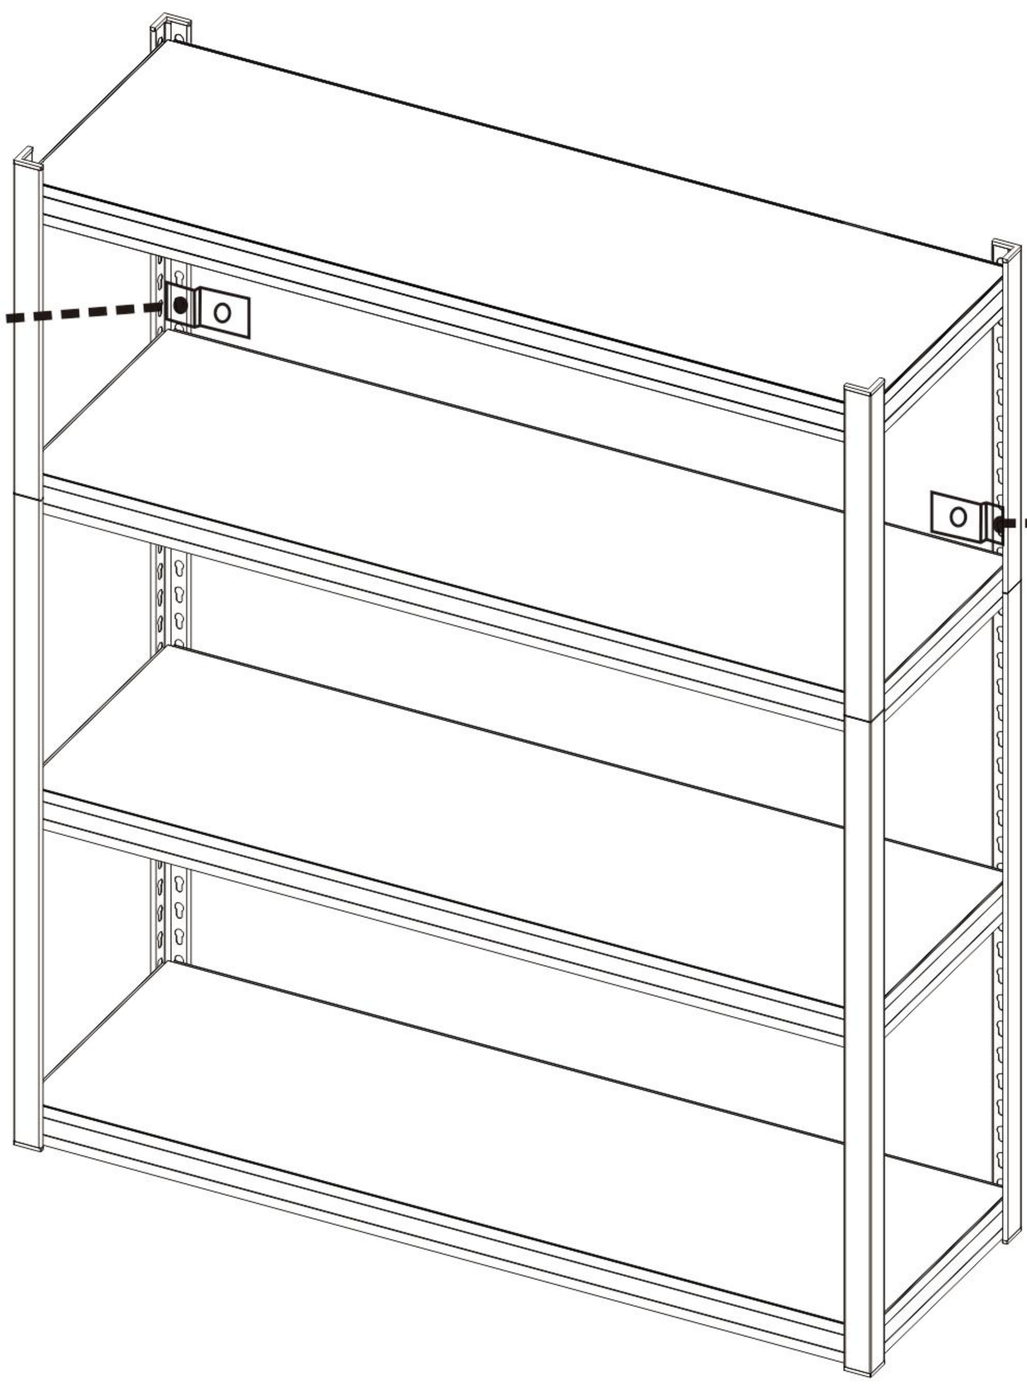

Expansion screw

screw

Anti-dumping device

Anti-dumping device

- Use the anti - dumping device G to snap into the hole of the post , punch a hole on the wall , put the expansion screw in , and use the screw to pass through the connector to connect with the expansion screw

Safety and Compliance

Please read and understand this entire manual before using the product.

CAUTION

- Be aware of dynamic loading ! Sudden load movement may briefly create excess load causing product failure.
- Evenly distribute the weight on each shelf , and keep the heaviest loads on the bottom shelf.
- Use only on flat , level and hard surface capable of supporting the shelving and any items placed on it . Remember to only use the shelf on level ground with evenly distributed weight.
- Do not store flammable liquids in the unit unless they are secured in an approved container.
- Keep bystanders out of the area curing assembly.
- This product is not a toy . Do not allow children to play with , on or near the unit.

WARNING

- Do not stand on , step on , or alter this unit for anything outside the designed function of storage.
- Use care when handling and assembling metal parts.
- The metal may have sharp edges or comers . The use of protective gloves is recommended.
- Always remember to use proper lifting techniques when moving the boxed or assembled unit.

Preparation

Before beginning assembly of product , make sure all parts are present . Compare parts with package contents list . If any part is missing or damaged , do not attempt to assemble the product. It is recommended that this product be assembled on a clean , soft surface , such as a piece of cardboard . The assembling task can be performed by one person but avallability of a second person will make the task simpler .

Troubleshooting

PROBLEM	POSSIBLE CAUSE	CORRECTIVE ACTION
Shelf is not level.	• Beam(s) or brace(s) used for the same level are not at the same height or they are assembled upside down. • Rivets on the beam(s) or brace(s) are not fully seated into the post slots. • The ground is uneven or too soft.	• Re-assemble beam(s) or brace(s). • Fully seat the rivets. • Move the shelf to a flat, level and hard surface.
