STEP 36

 Please check part ②⑤ to make sure it is installed correctly.

STEP 37

Press the slat frame to make it fall on the supporting iron pipe.

Notice: when used for the first time, directly press the slat frame with maximum force (>75KG), adult males are recommended to help complete.

STEP 38

! Please make sure there is no gap between the slat frame and part 28. If there is a gap, please loosen the screws in the picture below and adjust their position.

STEP 41

STEP 42

STEP 43

Place the mattress and use part “N” to pull it up to the maximum height. Then press hard on the iron pipe until the slat frame is lowered ,repeated many times, the elevator can be fully lubricated, and the subsequent lifting force will be greatly reduced.

Tips:After the mattress is placed on the slat frame, the force required will be reduced due to the full lubrication of the mattress's own gravity and hydraulic pressure.It is more effective to press or pull the wake tube. Part “N “is more advantageous to pull the wake tube. When you need to lower the slat frame, press the bed tube directly.
