Measuring Your Curtains

Before You Order - What to Measure:

- **Curtain Thickness:** Measure the thickness when curtains are gathered together
- **Desired Position:** Decide where you want the tieback positioned on your curtain
- **Fabric Weight:** Consider if you have heavy or light curtains
- **Curtain Width:** Measure how much fabric you'll be gathering
- **Style Preference:** Choose the color that best complements your decor

Measurement Points

- A. Curtain panel width when spread flat
- B. Gathered curtain thickness at tieback point
- C. Distance from window frame to desired tieback position
- D. Available space for magnetic connection behind curtain

Compatibility Guide

Perfect For:

- **Light to Medium Weight Curtains** - Ideal for most fabric types
- **Curtain Thickness:** Up to 2 inches when gathered (compact design)
- **Panel Widths:** 24" to 72" wide panels work excellently
- **All Fabric Types** - Cotton, linen, polyester, silk, lightweight materials
- **Design Styles:** Modern, minimalist, contemporary, elegant traditional

How to Measure Properly

Step 1: Gather Your Curtain

Pull your curtain to one side as you would want it to look when tied back. The feather design works best with lighter gathers.

Step 2: Check the Circumference

Wrap a measuring tape around the gathered curtain. The measurement should be less than 6 inches for optimal magnetic connection.

Magnetic Advantage: The strong magnetic system provides secure hold while maintaining the elegant feather aesthetic.
