

SEMI-FLUSH MOUNT CEILING LIGHT

INSTALLATION MANUAL

Please read all instructions carefully before beginning installation.

Fixture Type	Semi-Flush Mount Ceiling Light
Assembly	5-Step Installation
Required Tools	Screwdriver, wire connectors, and standard electrical tools
Important	Turn off power at the breaker before installation

Before you begin, verify that all parts are included and that the power supply is switched off.

Before You Begin

Safety Notice	Always switch off the power at the circuit breaker before installation or maintenance.
Mounting Note	Install this fixture only on a structurally sound ceiling and in accordance with local electrical code.
Bulb Installation	Install the bulbs only after the fixture body is fully assembled and mounted.

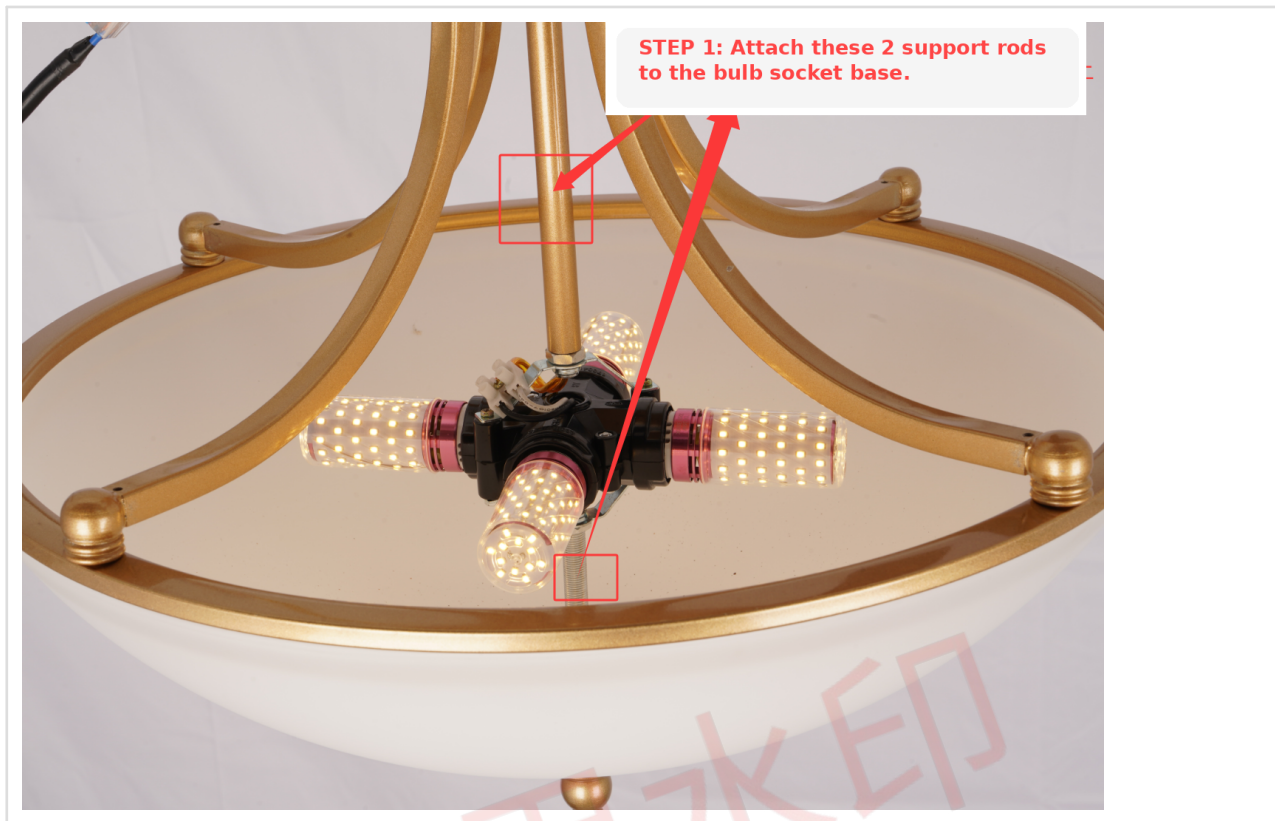

Installation Steps Overview

- Step 1: Attach the two support rods to the bulb socket base.
- Step 2: Install and secure the glass shade.
- Step 3: Assemble the ceiling canopy and curved arms.
- Step 4: Complete wiring and mount the fixture to the ceiling.
- Step 5: Install the bulbs and test the light.

STEP 1 | Install the Support Rods

Attach the two support rods to the bulb socket base as shown. Make sure both rods are threaded in correctly and tightened securely before proceeding.

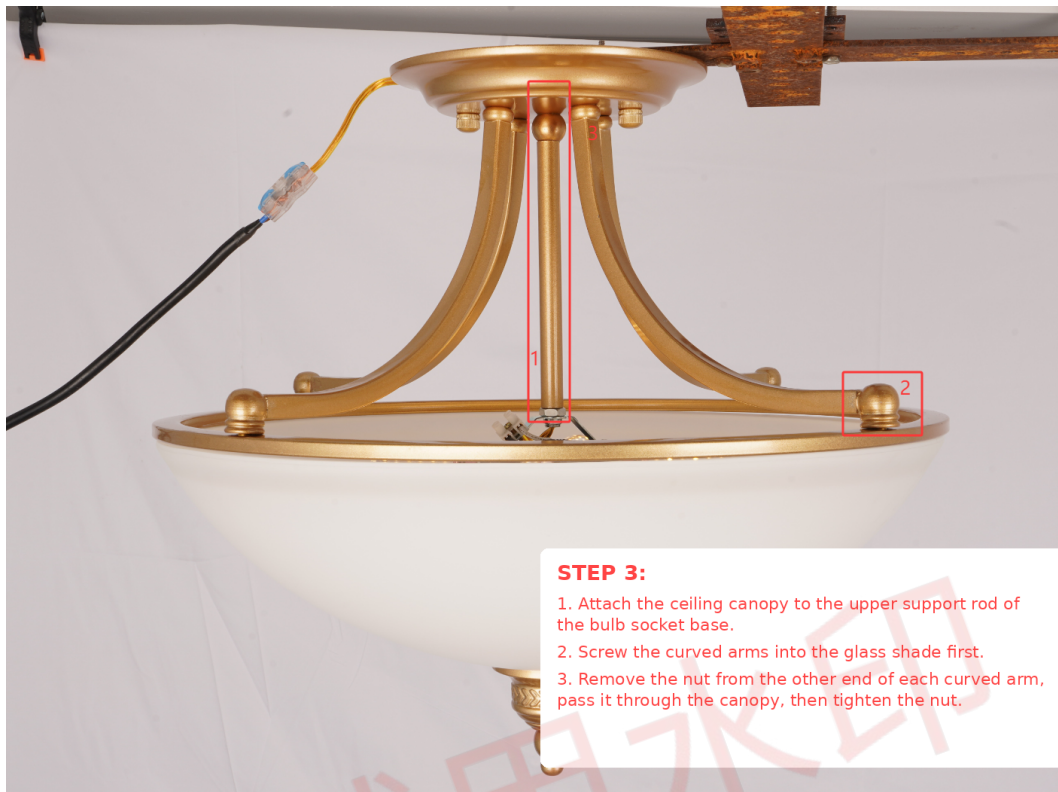

STEP 2 | Install the Glass Shade

Pass the glass shade through the lower threaded rod beneath the bulb socket base. Secure the shade using the highlighted finial or fixing hardware.

STEP 3 | Assemble the Ceiling Canopy and Curved Arms

Attach the ceiling canopy to the upper support rod. Next, screw the curved arms into the glass shade. Remove the nut from the free end of each curved arm, pass it through the canopy, and tighten the nut to complete the fixture body assembly.

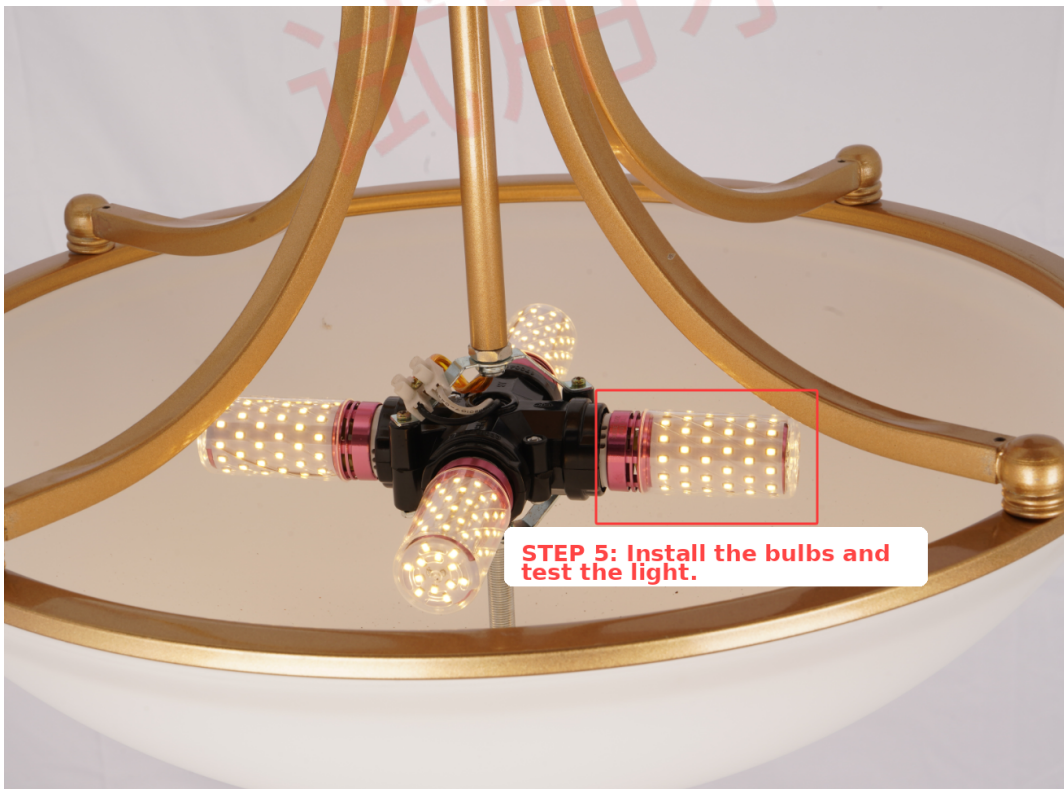

STEP 4 | Wire the Fixture and Mount It to the Ceiling

1. Connect the fixture wires to the ceiling supply wires according to local electrical code.
2. Tuck the connected wires neatly into the junction box.
3. Align the canopy and secure the fixture to the ceiling mounting hardware.
4. Tighten all screws and verify the fixture is firmly mounted.

STEP 5 | Install the Bulbs and Test the Light

Install the bulbs, restore power, and switch the fixture on to confirm that it operates correctly.

Safety Information

- Turn off the electrical supply before installation, cleaning, or maintenance.
- Do not exceed the recommended bulb type or wattage for this fixture.
- Make sure all rods, nuts, and mounting hardware are fully tightened.
- If the light does not turn on, check the wiring connections and bulb installation.

Troubleshooting

Issue	Recommended Check
Fixture does not turn on	Verify power supply, wiring connections, and bulb installation.
Fixture feels loose	Check canopy screws, rod connections, and all fastening nuts.
Shade is not aligned	Reposition the shade and confirm the lower finial is fully tightened.
