MANUFACTURING QUALITY
CEILING FANS SINCE FOREVER.

**Important: Please read and save
these instructions before installation**

The Leader in Smart Ceiling Fan Technology.

Basic Product Specifications

Model	SFR523P3L1-FM CES523P3L1-FM	Voltage	120V
Fan Blade Span	52"	Rated Wattage	48W (Fan 26W / Lamp 22W)
Gross Weight	15.4 lbs.	Motor RPM	55-215 RPM
Maximum Airflow	4770 CFM	Maximum Noise	55 dB(A)

**U.S. Patent Nos.: 10,511,206 and 11,296,561
and 11,808,446 and 11,781,746.
Other Patent(s) Pending.**

to our helpful tech support team.

Technical Support

Business Hours:

Monday – Friday (Holidays observed).

9:00 am to 5:30 pm PST.

Tel: (888) 253-2374

The product images shown in the manual are for reference purposes only.
Actual product may differ slightly.

Live Smarter

This Carro Smart Ceiling Fan is :

ETL certified and suitable for indoor use only

DC Motor
10-speed, ultra-quiet, reversible & energy efficient

Connect via Wi-Fi or Bluetooth for advanced control

Compatible with smart devices

Connect to the
CARRO Home App
for fine-tuned control options

The Carro Home App conveniently connects to existing smart devices for full smart home integration.

works with
Alexa

works with
Google Assistant

works with
Siri Shortcuts

Remote Control Included

Download via Google Play and App Store

SAFETY PRECAUTIONS

CARRO

READ AND SAVE THESE INSTRUCTIONS

- Before you begin installing the fan, shut power off at the circuit breaker of the fuse box.
- Make sure that all electrical connections are in accordance with National Electrical Code, ANSI/NFPA 70 and local codes. Hire a licensed electrician if you are unfamiliar with installing electrical wiring.
- Make sure the installation site you choose allows the fan blades to rotate without any obstructions. Allow a minimum clearance of 2.1m (7 feet) from the floor and 18 inches from the tip of the blades to the wall.
- The outlet box and support structure must be securely mounted and capable of reliably supporting a minimum of 35 pounds. Use only U.L. listed outlet boxes marked "Acceptable for Fan Support of 15.9 kg (35 lbs) or less".
- Before and after you install the fan, make sure that all mounting components are secured to prevent the fan from falling.
- Do not insert anything into the fan blades while the fan is operating.
- To change the direction of the rotation of the blades, the fan must be in operation mode.
- All screws must be checked and retightened where necessary before installation.
- After making the wire connections, the wires should be spread apart with the grounded conductor and the equipment-grounding conductor on one side of the outlet box and the ungrounded conductor on the other side of the outlet box.
- The splices after being made should be turned upward and pushed carefully up into the outlet box. Conductor wiring identified as grounded is to be connected to a grounded conductor of power supply. Conductor wiring identified as ungrounded conductor is to be connected to an ungrounded conductor. Conductor wiring identified for equipment grounding is to be connected to an equipment- grounding conductor.
- This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

- **CAUTION:** Read all instructions and safety information before installing your new fan. Review accompanying assembly diagrams.
- **WARNING:** To reduce the risk of fire, electric shock, or personal injury, mount to a structural framing member or to an outlet box marked acceptable for fan support of 15.9 kg (35 lbs) or less. For outlet box mounting, use mounting screws provided with the outlet box.
AVERTISSEMENT: Afin de réduire les risques d’incendie, de choc électrique ou de blessures corporelles, ils doivent être montés sur des éléments de charpente structurale ou sur des boîtes de sortie marquées d’un support de ventilateur acceptable de 15,9 kg (35 LB) ou moins. Pour l’installation de la boîte de sortie, utilisez les vis de montage fournies avec la boîte de sortie”
- **CAUTION:** To reduce the risk of injury, use only the screws provided with the outlet box in conjunction with the lock washers.
- **WARNING:** To reduce the risk of personal injury, do not bend the blade bracket when installing the brackets, balancing the blades, or cleaning the fan. Do not insert foreign objects in between rotating fan blades.
- **CAUTION:** To reduce the risk of electric shock, disconnect the electrical supply circuit to the fan before installing the light kit.
- **WARNING:** To reduce the risk of fire or electric shock, this fan must be installed with a general use, non-dimmable, single gang, isolating wall control/switch.
- **WARNING:** To reduce the risk of fire or electric shock, do not use this fan with any solid-state speed control device.
AVERTISSEMENT: Ne convient pas à des régulateurs de vitesse à semi-conducteurs.
- **NOTE:** The important safeguards and instructions appearing in this manual are not meant to cover all possible conditions and situations that may occur. It must be understood that common sense, caution and care are factors which cannot be built into this product. These factors must be supplied by the person (s) installing, caring for and operating the unit.
- **CAUTION:** The light source is designed for this specific application and can overheat if serviced by untrained personnel. If any servicing is required, the product should be returned to an authorized service facility for examination or repair.
- **WARNING:** Do not use corrosive detergents for cleaning.
- **WARNING:** To reduce the risk of fire, electric shock, or injury to persons, do not use replacement parts that have not been recommended by the manufacturer. (e.g. Parts made at home using a 3D printer).
- **NOTE:** Before installing the fan, please check and inspect all of the fan components and make sure they have all been received in good condition. Contact the manufacturer if there are any missing, damaged, or broken parts.

Lampshade

Remote Control

Installation

CARRO

WARNING: To avoid serious injury or death, turn off the power at the circuit breaker before installing the fan.

Tools you'll need

Phillips screwdriver

Step ladder

1. Install the Fan Blades

1.1 Locate 6 blade attachment screws and washers in the hardware pack. Make sure each blade matches the corresponding place of the motor hub and tighten with the screws and washers as shown in Fig.1.1.

1.2 Follow the same procedure for the remaining blades, making sure all screws are tightly secured to ensure a stable installation.

Fig. 1.1

X6
M6X35mm
Blade Screw & Washer

2. Disassemble the Light Kit

Take out the light set from the packaging box, and then remove the lampshade by rotating counterclockwise.

Fig. 2.1

3. Install the Light Kit

3.1 Carefully place the motor hub. Pass the wire plug from the motor and the safety rope through the center hole of the light kit.

Rotate the light kit clockwise to engage the internal thread of the center hole with the external thread of the motor shaft. Following this, one of the four slots in the light kit's center hole should align with the motor shaft slot (usually marked in black), forming a screw hole for the light kit screw.

Secure the light kit screw from the hardware pack into the designated screw hole, ensuring it is tightly fastened to safely connect the motor and light kit, as illustrated in Fig. 3.1.

Fig. 3.1

X1 M4X6mm
Light Kit Screw

3.2 Connect the wire plug to the light kit's terminal block as demonstrated in Fig. 3.2.

Fig. 3.2

Note: If you encounter difficulty passing the safety rope through the center hole of the light kit, you have the option to remove the screw on the safety rope lock. This will allow you to thread the safety rope through the center hole more easily. However, it is crucial to remember to reassemble the screw back to its original position once the light kit installation is complete. Failure to properly install the safety rope may compromise its effectiveness and increase the risk of detachment, potentially posing safety hazards.

4. Install the Mounting Plate

4.1 Utilize a screwdriver to remove the two canopy screws situated in the single holes. Subsequently, gently loosen the other two canopy screws positioned in the L-shaped holes.

Proceed by rotating the mounting plate to align it with the designated notch, and then pull to detach the mounting plate. Remember to retain the screws for later use.

4.2 You have two options for the mounting plate installation. Choose the one that works best for your location.

WARNING: Before beginning, make sure to turn off the power from the circuit breaker!

Note: For optimal fan performance, ensure that the mounting plate is level.

Option 1: Secure the mounting plate to a wooden ceiling beam or support structure with an approved electrical outlet box using the ST5x24mm wood screws (included) as shown in Fig. 4.2.

Option 2: Use machine screws (provided with outlet box) and washers to attach the mounting plate to an existing ceiling fan-rated outlet box. If the mounting plate is installed at the outlet box, it should be installed on the outlet box with the screws that came with your outlet box. Pull the supply wires (the black, white, and ground wires) out of the outlet box and through the hole in the mounting plate, then set them aside.

WARNING: DO NOT use a plastic outlet box. Use only U.L. listed outlet boxes marked "Acceptable for Fan Support of 15.9 kg (35 lbs) or less".

5. Hang the Fan

5.1 Carefully lift the fan-motor assembly and hang it using the hook of the mounting plate. Securely suspend the motor assembly by using one of the round holes at the outer rim of the motor housing as shown in Fig. 5.1.

5.2 There are multiple methods to install the safety rope; here are two options for your reference.

Option 1: Refer to Fig. 5.2. Hang the safety rope on the ceiling hook (not included). Using a screwdriver, loosen the screw on the safety rope lock. Pull the safety rope taut and then tighten the screw on the safety rope lock to ensure a firm and secure connection between the safety rope and the ceiling hook. Always double-check to ensure the safety rope is taut.

Fig. 5.2

Option 2: Refer to Fig. 5.3. Thread a screw, accompanied by a washer (both not included), through the center of the safety rope. Fasten the screw to the ceiling and then loosen the screw on the safety rope lock using a screwdriver. Pull the safety rope taut and then tighten the screw on the safety rope lock to securely anchor the safety rope to the fixed screw on the ceiling. Always double-check to ensure the safety rope is taut.

Fig. 5.3

Note: Installing the ceiling fan with a safety rope is an extra safety feature. It secures the fan to the ceiling hook or other attachment point and prevents the fan from falling even in the case of material failure.

When the safety rope is fixed and installed, it is important to adjust both the length of the wire rope and the screw on the safety rope lock to ensure a secure and tight connection with the fixed object. This step is crucial to prevent the safety rope from accidentally coming off. Improper installation of the safety rope may compromise its effectiveness and lead to potential safety risks. Therefore, it is essential to make sure the safety rope is properly tightened and secured for maximum safety.

6. Connect the Wiring

Connect the Green/Yellow wire from the mounting plate to the supply Ground wire using a wire nut.

Connect the White wire from the motor to the supply White (Neutral) wire using a wire nut. Connect the Black wire from the motor to the supply Black/Red (Hot/Live) wire using a wire nut.

Make sure all the wires are connected to the correct colors as shown in Fig. 6.1. Then, hide the wiring inside the motor housing.

Fig. 6.1

7. Secure the Fan

With both hands, gently lift the fan body off of the hook. Ensure that the hook does not interfere with the wires.

Align the L-shaped holes on both sides of the fan body with the two loosened canopy screws on the mounting plate. Slide the two slots on both sides of the fan body between the heads of the screws, and then rotate the fan body to ensure the screws hold the fan body firmly in place.

Reinstall the other two canopy screws that were previously removed into the single holes. Tighten all four screws securely.

Fig. 7.1

8. Install the Lampshade

Align the slots of the lampshade with the slots of the light kit pan, and turn the lampshade clockwise to securely lock it into place, as shown in Fig. 8.1.

Note: Do not over tighten the lampshade.

Fig. 8.1

9. Power On

At this time, the ceiling fan has been installed. Turn on the power supply from the circuit breaker of the main switch or the room where the ceiling fan is installed. Once the power is on, check to see if the fan light is illuminated and pair the fan with the remote immediately.

Note: Please be aware that this ceiling fan may produce noticeable operating sounds at specific wind speeds. This is a normal operating characteristic and does not indicate any issues with its functionality.

Pair the Remote Control to Your Fan

Power on the fan and pair the remote to the fan within 1 min. To pair remote to fan, press and hold  button for 5-10 secs to pair. Successful pairing will trigger the fan light off.

Note: If you do not pair the fan to the remote within 1 minute of connecting it to the power, you will need to reset the fan by disconnecting it from the power before attempting to pair the remote again.

Remote Control Button Definitions

Turn the fan off.

Switch between summer mode and winter mode.
· Summer mode - (Counter-clockwise)
· Winter mode - (Clockwise)

Note: Fan must be running to switch between Summer / Winter modes.

Turn the fan on and decrease fan speed.

Turn the fan on and increase fan speed.

Nature Toggle the fan speed between "Nature Mode" and "Breeze Mode". Simulate a soothing breeze that is gentle enough not to disrupt your sleep. To revert to the fan's regular mode, simply press either the speed-up or speed-down button.

Turn the light on or off and remote pairing.

Note: Power on the fan and pair the remote to the fan within 1 min. To pair remote to fan, press and hold  button for 5-10 secs to pair. Successful pairing will trigger the fan light off.

Switch between warm light and cool light. WIFI Pairing.

Note: Press/hold button for 5 sec. The fan will switch to AP Mode, then select AP Mode on APP, follow the APP control instructions and enable fan Wi-Fi.

Press/Hold button to decrease the light intensity.

Press/Hold button to increase the light intensity.

Power-Off Memory Function

If the fan is running and there is a sudden power outage, the fan and light will automatically resume operation at the last used settings when power is restored due to the power-off memory function, unless there is subsequent user intervention.

WARNING: Do not expose the remote control to direct contact with water.

1. First download the free Carro Home App from the App Store or Google Play or scan the QR Code below.

Note: This ceiling fan needs to use 2.4Ghz WIFI to work when connecting the device. After connecting, it can use 5Ghz or 2.4Ghz.

2. Open the Carro Home App to create your account. The account with "Carro Home" can be registered through E-mail only.

3. Connect the device to the Carro Home App (Three ways to connect) :

①Bluetooth Connect (WIFI & Bluetooth On)

- a. Press "+" button into the device list, then a window will pop up to show you some devices can be connected.
- b. Click "Go to add" (If you click "Do not add" by mistake, please see "Do not add" steps).
- c. Choose the device.
- d. Connect to your home WIFI, then go back to the app and wait for the app to connect with your device.

"Do not add" steps:

- a. Select "Lighting" on the sidebar menu then select "Smart Ceiling Fan" and tap next.
- b. Connect to your home WIFI and tap "Next" to wait for the connection.

Note: if your device does not appear in the "go to connect" section, continuously hold the WIFI Pairing button until the Carro Home hotspot pops up as a discoverable device.

②WIFI Connect-AP Mode (WIFI On & Bluetooth Off)

- a. Smart ceiling fan: Press and hold the WIFI button on the remote for 5 seconds for AP Mode. Smart switch: Press and hold the "OFF" button for 10 seconds till the indicator light blinks slowly to enter into AP Mode.
- b. Press "+" button to select "Lighting" on the sidebar menu then select "Smart Ceiling Fan".
- c. Connect to your home WIFI (2.4Ghz Only).
- d. Press "Next" button to go to connect the fan's WIFI signal.
- e. Choose the fan's WIFI signal "CarroHome-XXXX" then go back to the app.
- f. Wait for the connection.

③WIFI Connect-EZ Mode (WIFI On & Bluetooth Off)

- a. Press "+" button to select "Lighting" on the sidebar menu then select "Smart Ceiling Fan".
- b. Connect to your home WIFI (2.4Ghz Only) and next.
- c. Click the right corner on the top to choose "EZ Mode" .
- d. Tap "Next" button to wait for the connection to complete.

1. Connect the device to Alexa:

a. Make sure you have connected the device to the Carro Home App and it is working normally.

b. Open the Alexa app, go to the skills settings to search for the "Carro Home" skill.

c. Link the skill, log in with your Carro Home App account and password, then authorize and connect with the Carro Home App.

d. Then Alexa will find the device automatically and will transfer all the settings over from the Carro Home App.
2. Connect the device to Google Home:

a. Make sure you have connected the device to the Carro Home App and it is working normally.

b. Open the Google Home app, select set up a device, and choose "Works with Google".

c. Search for "Carro Home", log in with your Carro Home App account and password, then authorize and connect with the Carro Home App.

d. Then the Google Assistant will find the device automatically.
3. Connect the device to Siri shortcuts:

a. Make sure you have connected the device to the Carro Home App and it is working normally.

b. Tap "Scene" on the main menu.

c. Tap "Create Scene".

d. Tap "Launch Tap To Run".

e. Tap "+".

f. Run the device.

g. Choose the device you want to control by Siri.

h. Select the function you want to control by Siri.

i. Then save the function setting.

j. To add to Siri, choose the scene you have created, and then select add to Siri.

k. Enter the sentence you want to say to initialize the device, and add to Siri.

Try these troubleshooting steps before contacting Customer Service. For additional operation, maintenance, and troubleshooting information, please contact our customer service center.

SYMPTOM	POSSIBLE SOLUTION
Fan not spinning	① Make sure the fan is getting power. ② Check your circuit breaker or fuse panel and wall switch for functionality. ③ Check to make sure the fan wires are correctly connected to the house wires. ④ Remote control must be paired with the fan within 1 minute after connecting the fan to the electricity. ⑤ If you have paired the app but the fan still does not work (light and fan both didn't work) or couldn't pair the app to the fan, try to reset the fan: to reset the fan, cut the power for 10 minutes, then turn the power on and press the pairing button  on the remote for 5-10 seconds until the fan light turns off, then pair the Carro Home App again. ⑥ Use a multi-meter and test the wiring harness to see if there is any electrical output. ⑦ All the pin wiring on the circuit board must be inserted tight and in the correct position. ⑧ Remote needs to be paired with the fan first. ⑨ Make sure the fan blades spin freely. ⑩ If you're using a wall control, check the power to the breaker from your control and try working your ceiling fan manually. (Normal switch is only used for connecting the fan to the house electricity.)
Fan light not working	① Make sure LED wires are connected to the circuit board. ② Make sure the whole fan is powered.
The fan is noisy and wobbling	① Check if the blade screws are NOT rubbing against any part of the motor housing. ② Check if the pin wires are NOT touching against any moving parts. ③ Check if the bottom wire cover is NOT hitting the motor. ④ Confirm the canopy is NOT touching the ceiling while the fan is in operation. ⑤ Check the down rod is NOT slanted. ⑥ Tighten any loose screws on the light kit, fan blades, motor coupling, down rod, brackets and mounting hardware. ⑦ Confirm the hanger ball is firmly seated in the mounting bracket. ⑧ The ceiling beam must meet the minimum tensile test strength of 30kg for installation. ⑨ Make sure the blades and brackets are NOT bent or deformed. ⑩ Verify the wire connections are not rattling against each other. ⑪ Verify the fan blades are not cracked. If the fan blades are cracked, replace the damaged blades with a new blade set from the same brand as your ceiling fan to ensure compatibility. ⑫ Confirm the light kit is NOT slanting and hitting the motor.
Unable to pair remote and app	① Check if the wires are connected in the correct position or not. ② Check the batteries in the remote. ③ Disconnect the power for 10 minutes, reconnect the power and pair the remote with the fan immediately, within 1 minute. Also try pairing the app to reconnect. ④ The WiFi must be 2.4Ghz, incompatible with 5Ghz WiFi or combined with 5Ghz. This ceiling fan needs to use 2.4Ghz WIFI to work when connecting the device, and after connecting, it can use the 5Ghz or 2.4Ghz. ⑤ App must be the newest version. ⑥ Connect with correct app "Carro Home".
Fan or light turning on or off by themselves	① Confirm the circuit breaker is not malfunctioning. ② Verify the wire connections are not frayed. ③ Check the app is not set to a timer or schedule. ④ Cut the fan power for 10 minutes then power on again. ⑤ All the pin wiring on the circuit board must be inserted tight and in the correct position.

WARNING: Power off the fan before performing maintenance or cleaning the fan.

1. Check the support connections, brackets, and blade attachments twice a year. Make sure they are secure. Because of the fan's natural movement, some connections may become loose over time. It is not necessary to remove the fan from the ceiling.
2. Clean your fan periodically. Use only a soft brush or lint-free cloth to avoid scratching the finish. The plating is sealed with a lacquer to minimize discoloration or tarnishing.
3. (Optional) Apply a light coat of furniture polish to the wood blades.
4. (Optional) Cover small scratches with a light application of shoe polish.

DO NOT:

1. Use water when cleaning. Water could damage the motor, or the wood, or possibly cause an electrical shock.
2. Apply oil to your fan or motor. The motor has permanently lubricated sealed ball bearings.

FCC Statement

CARRO

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

WARNING: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

WARRANTY

CARRO Limited Lifetime Warranty

CARRO grants this limited warranty to the original purchaser of this CARRO ceiling fan for the original installation location.

How Can Warranty Service Be Obtained?

Warranty registration is not necessary to obtain warranty service. Please keep a copy of your original purchase receipt from the authorized vendor where your product was purchased from and provide it to a service associate for warranty service. CARRO, at its sole discretion, may accept a gift receipt. Please do not ship your fan or any fan parts to CARRO unless approved by one of our Technical Support Representatives. To obtain service, please contact CARRO online or by phone.

Email: cs@carrohome.com | Tel: (888) 253-2374

What Does This Warranty Cover ?

Motor: Three-Year Warranty

If any part of your ceiling fan motor fails within the first year due to a manufacturing defect as determined solely by CARRO, we will provide you with replacement parts free of cost. After the first year of purchase, we will provide you with two-year motor warranty service.

LED Kit: Five-Year Warranty

If your LED light kit (excluding cover) fails at any time within five years of the date of purchase due to a manufacturing defect as determined solely by CARRO, we will provide a free replacement. The five-year limited warranty applies only to the LED kit itself and does not cover other components such as the remote control, AC adapter, and PCB. These other components are included in the three-year warranty below.

Other: Three-Year Warranty

Except as otherwise indicated throughout this warranty, if any part of your CARRO ceiling fan fails at any time within three years of the date of purchase due to a manufacturing defect as determined solely by CARRO, we will provide a free replacement part.

What Does This Warranty NOT Cover ?

Labor Excluded: This warranty does not cover any costs or fees associated with labor (including electrician's fees) required to install, remove, or replace a fan or any fan parts.

The warranty does not cover remote control batteries. Fans installed outside the United States or owned by someone other than the original purchaser are excluded from warranty coverage. The warranty will be invalid if the customer fails to establish proof of purchase or if the fan was purchased from an unauthorized dealer.

The warranty does not cover normal wear and tear or cosmetic damages. If the fan is damaged due to improper installation, misuse, improper care, modifications to the fan, improper or incorrectly performed maintenance or repair, improper voltage supply or power surge, use of improper parts or accessories, failure to provide maintenance to the fan, or natural disasters (e.g. flood), the warranty will not cover it. The warranty also does not cover any accidental damages.

The warranty only applies to the original purchase and starts from the original purchase date. Any replacements will be considered as a part of the original purchase.
