

# ENERGY INFORMATION

at High Speed

|                                                                 |                                                                            |                                                                                  |
|-----------------------------------------------------------------|----------------------------------------------------------------------------|----------------------------------------------------------------------------------|
| <p>Airflow</p> <p><b>4,964</b></p> <p>Cubic Feet Per Minute</p> | <p>Electricity Use</p> <p><b>55</b></p> <p>Watts<br/>(excludes lights)</p> | <p>Airflow Efficiency</p> <p><b>90</b></p> <p>Cubic Feet Per Minute Per Watt</p> |
|-----------------------------------------------------------------|----------------------------------------------------------------------------|----------------------------------------------------------------------------------|

Compare: 52" ceiling fans have airflow efficiencies.  
71.83 cubic feet per  
minute per watt at high speed

**Money-saving Tip:** Turn off fan when leaving room.
