Assembly photo.

Baby Sliding Bike Instruction Manual

PLEASE READ THIS INSTRUCTIONS CAREFULLY BEFORE USING
AND KEEP IT FOR FUTUER USE.

Assembly steps

- 1.Open the package, take out and check all parts, like the photo shows remove the nuts and bolts of the handlebar, like the photo shows.

- 2.Insert the front wheels sets into the bike body (Make the face without screw holes forward, and the screws holes face backwards), like the photo shows

3. Insert the handle set into the pipe of the front wheels sets, at the same time make the curved Shape forward, please install protective cover on the handlebar, I like the photo show

NOTE: A wrong handlebar installation direction will cause the sliding bike lean forward, it may cause injuiiry.

- 4.After the hole position is aligned, put the bolt through the fixing hole,Lock the nut , and lock it tight use the open ended wrenches and inner hexagon spanner, like the photo shows.

5. Install the protective cover downward to it's position, turn it clockwise to make it locked like the photo shows.
