INSTALLATION PREPARATION

Install it on a flat surface to prevent scratches.

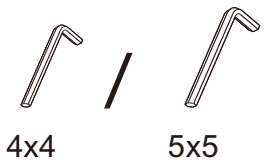

Prepare a knife or scissors (not included).

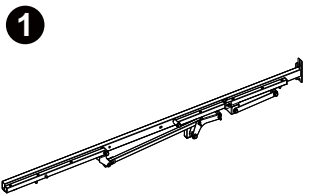

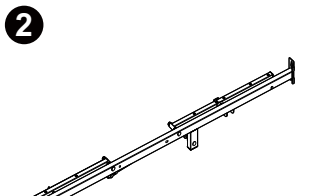

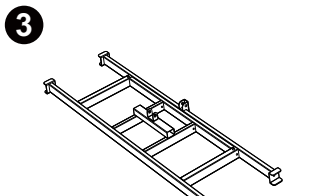

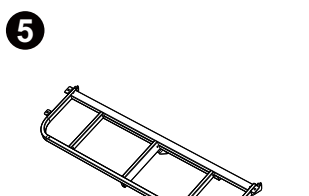

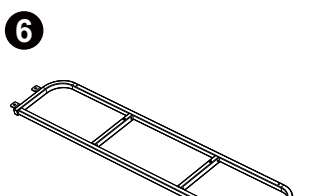

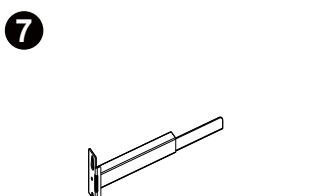

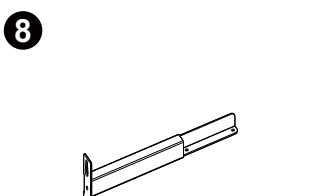

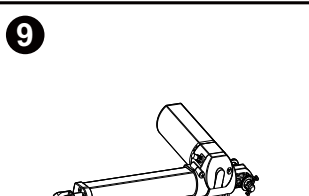

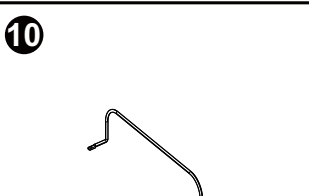

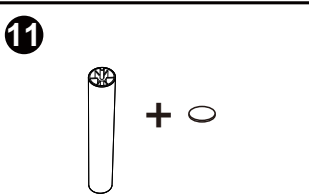

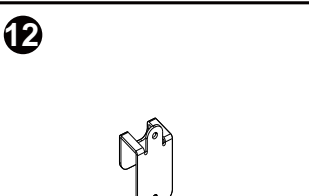

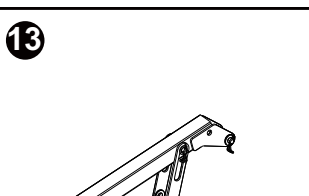

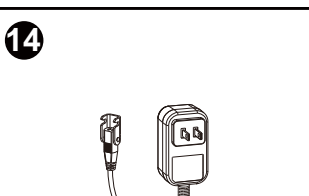

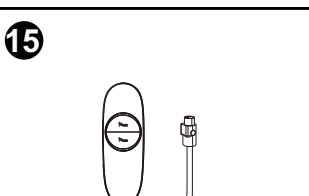

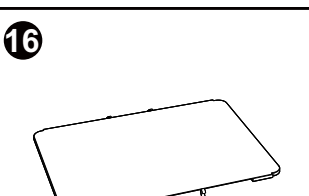

Two or more people are recommended for assembly.

BOX 1

HARDWARE LIST

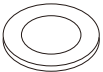

A x 1/1 pcs	B x 2 pcs	C x 4 pcs	D x 18 pcs
			

PARTS LIST

 Left Side Rail x 1	 Right Side Rail x 1	 Middle Platform x 1	 Slats x 3
 Head Platform x 1	 Foot Platform x 1	 Right Bracket x 1	 Left Bracket x 1
 Bed Lift Motor x 1	 Mattress Retainer Bar x 1	 Black Center Legs with Foam Pads x 2	 J-Shaped Brackets x 8
 Motor Support Bar x 1	 Adapter x 1	 Remote Control x 1	 Bed Cover x 1

BOX 2

HARDWARE LIST

A x 1 pcs  4x4	E x 8 pcs  M6x45	F x 16 pcs  M6x15	G x 16 pcs  M8x20
H x 8 pcs 			

PARTS LIST

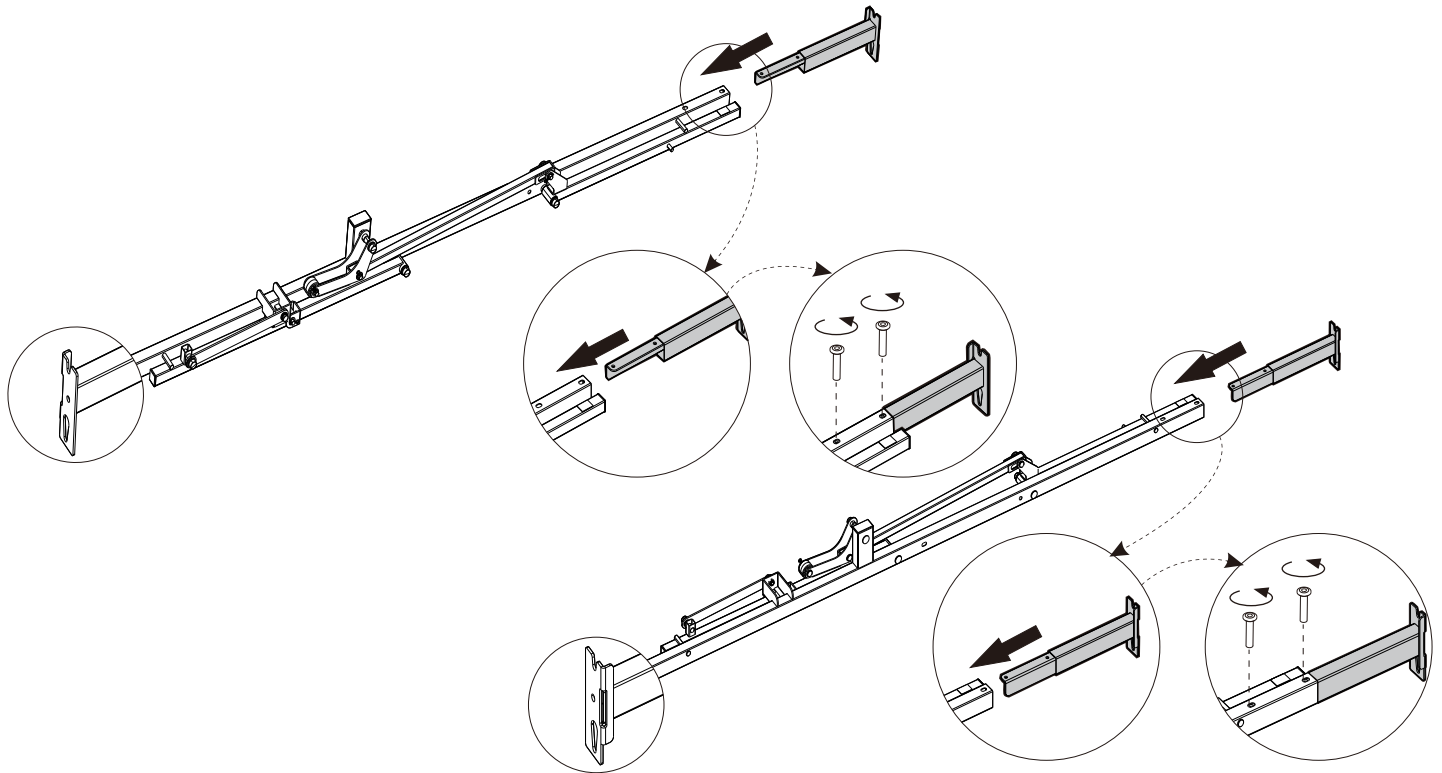

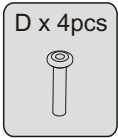

1  Headboard x 1	2  Front Left Leg A x1	3  Front Right Leg B x 1	4  Side Rail x 4
5  Footboard x 1	6  Back Left Leg x 1	7  Back Right Leg x 1	

INSTALLATION

Begin assembly with the contents of Box 1. The screw pack letters correspond to the labels in Box 1.

STEP 1

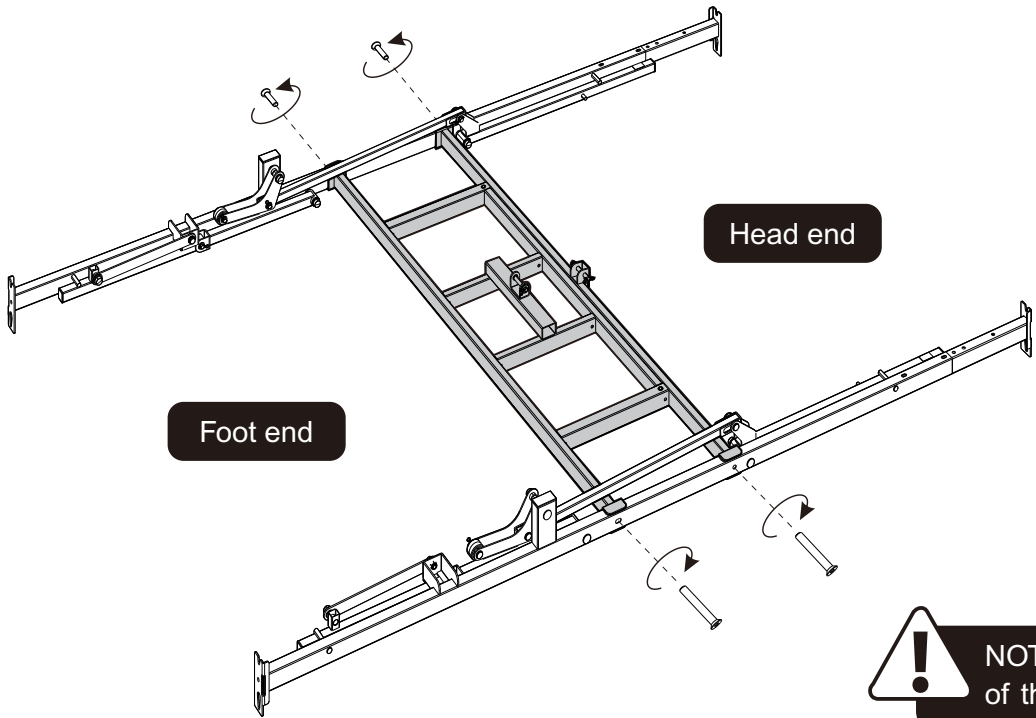

- ① Insert the left and right telescopic rod welding assemblies into the left and right side bed frames.
- ② Secure them with 4 screws.

 NOTE: Ensure both hook plates face the same direction. Follow the shown direction for telescopic rod installation.

STEP 2

- ① Clip the U-shaped brackets on both sides of the H-shaped seat panel into the side bed frames.
- ② Then secure with 4 screws.

C x 4pcs

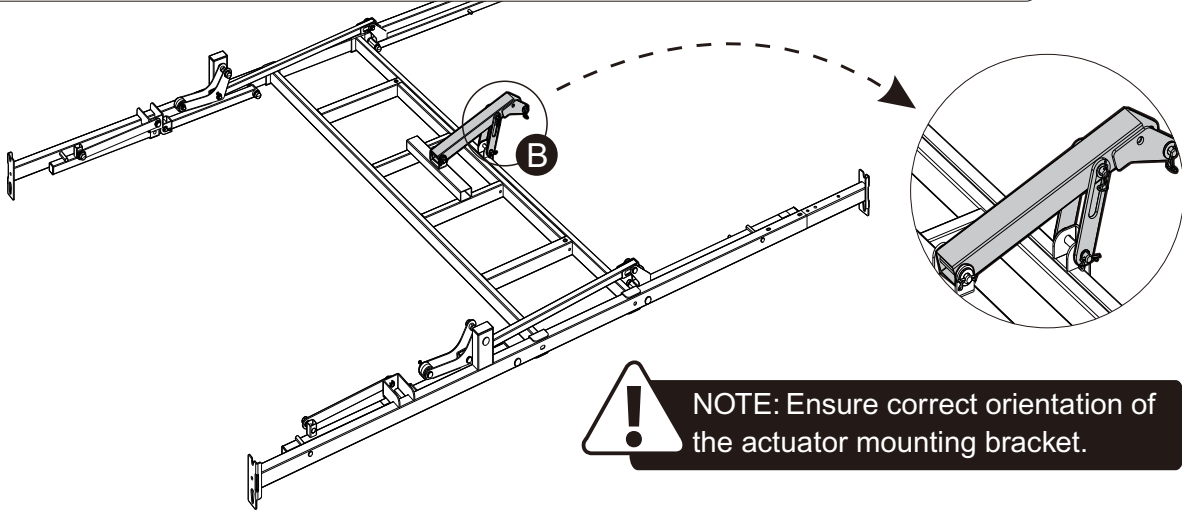

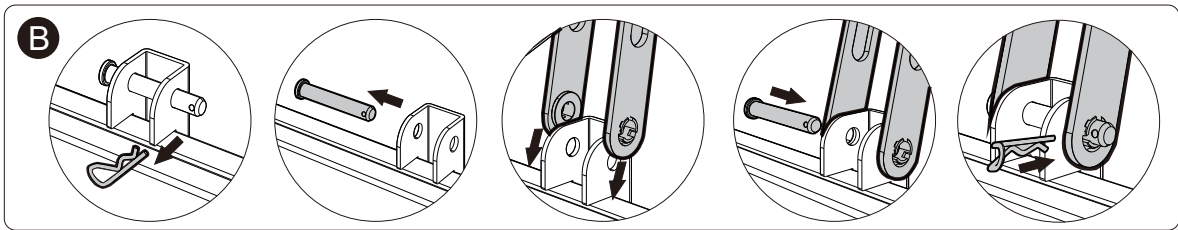

A x 1pcs

5x5

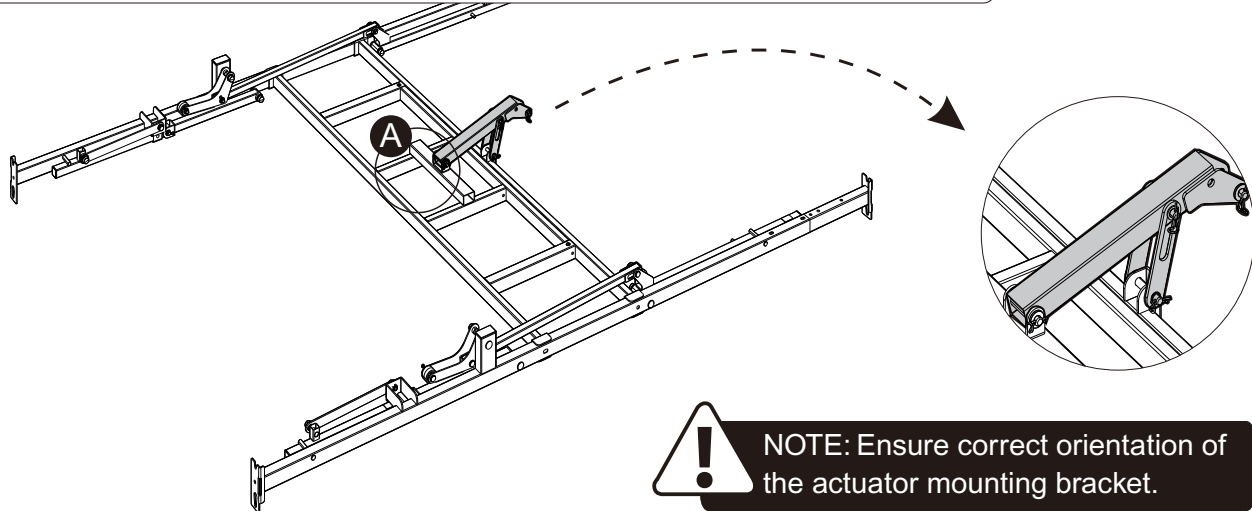

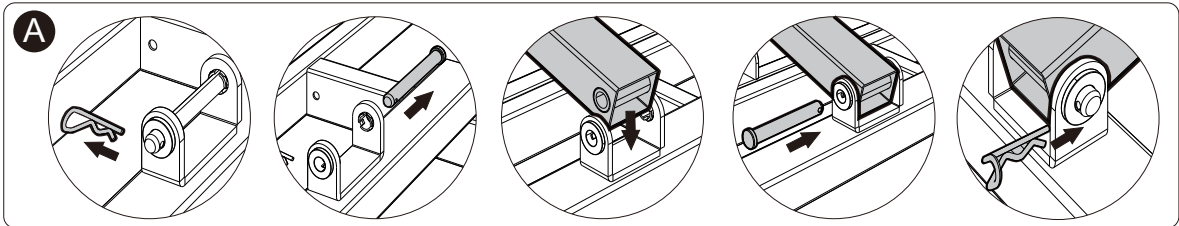

STEP 3-2

- ① Remove the R-pins and corresponding pivot pins from point B on the H-shaped frame.
- ② Insert the actuator mounting bracket into the corresponding holes, reinsert the pivot pins, and secure with R-pins.

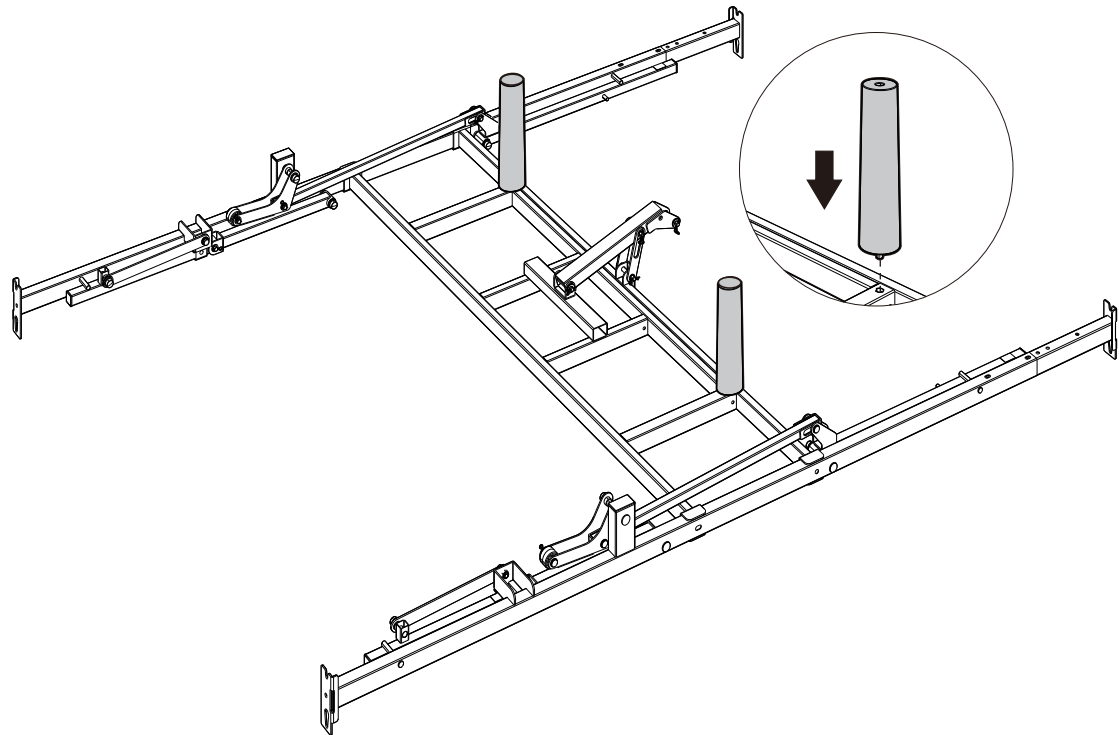

STEP 3-1

- ① Remove the R-pins and corresponding pivot pins from point A on the H-shaped frame.
- ② Insert the actuator mounting bracket into the corresponding holes, reinsert the pivot pins, and secure with R-pins.

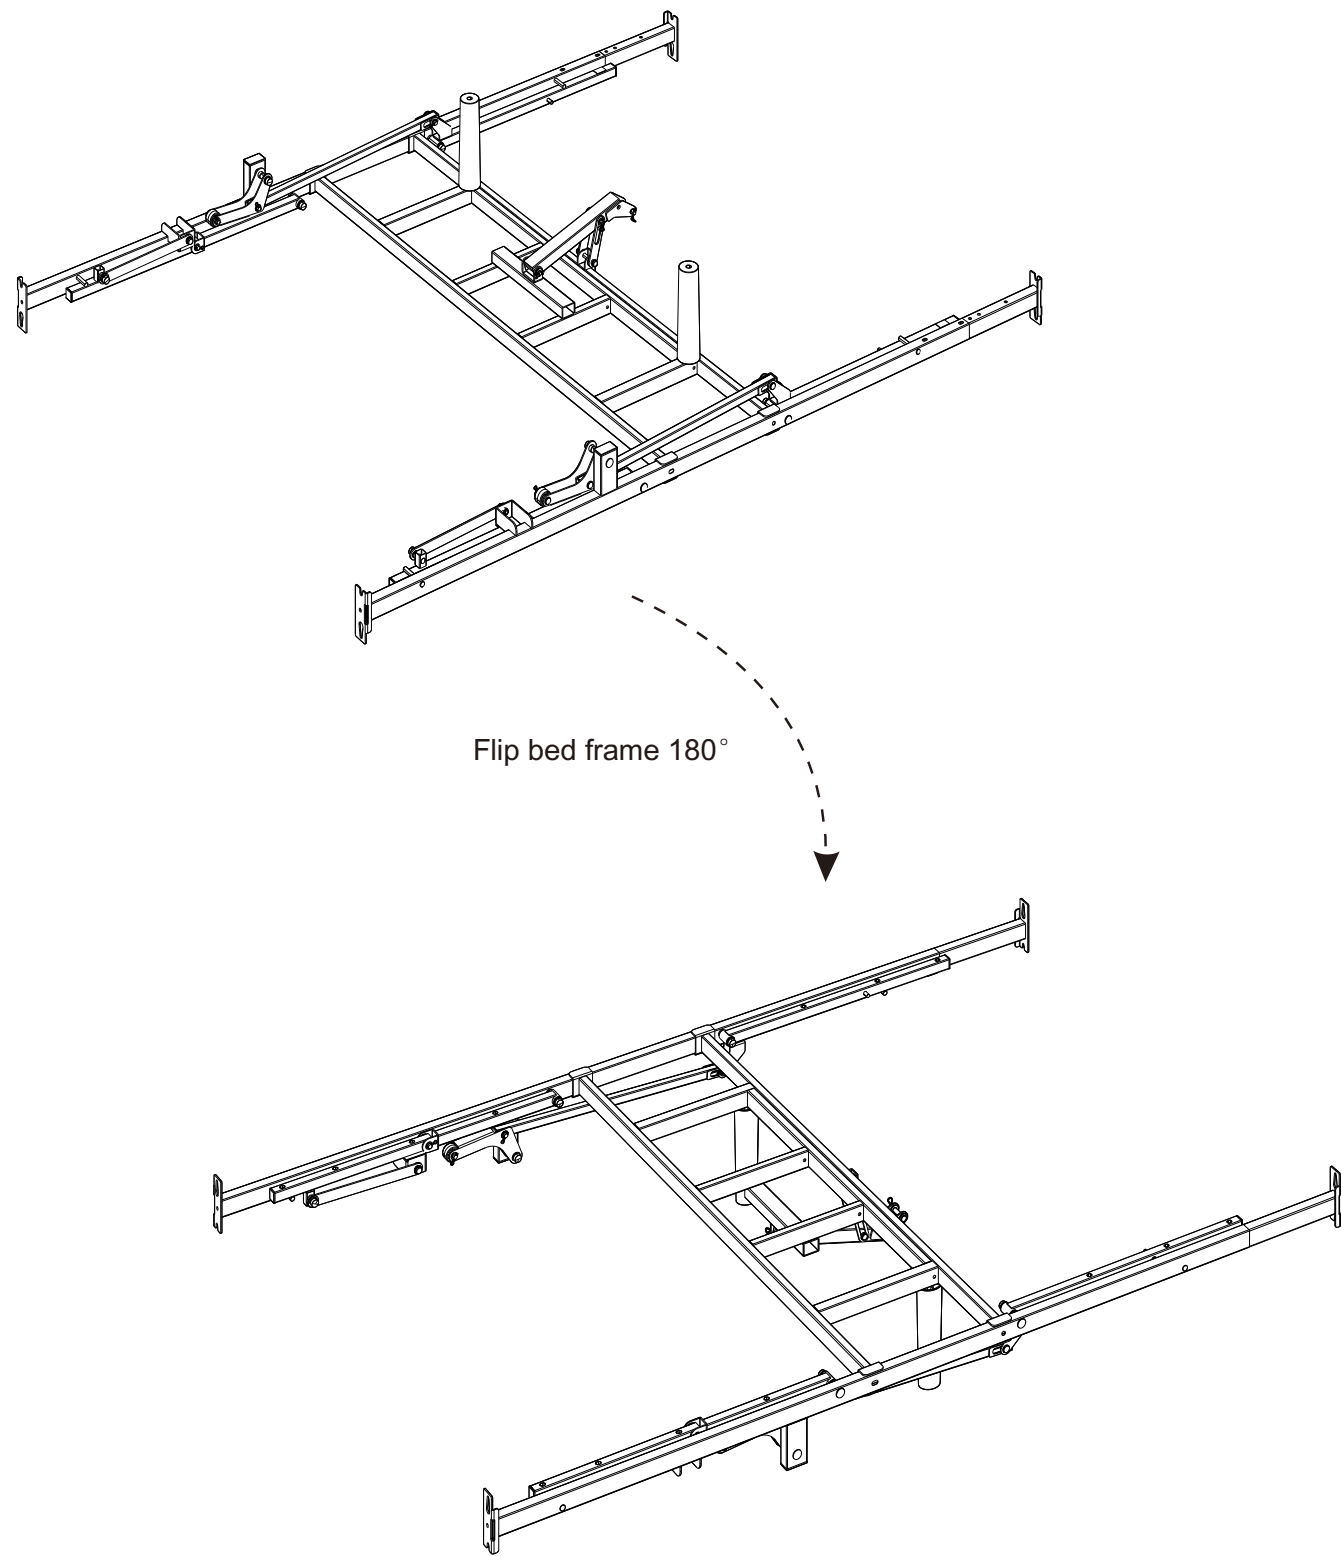

STEP 4

Install the two plastic bed feet onto the middle H-frame.

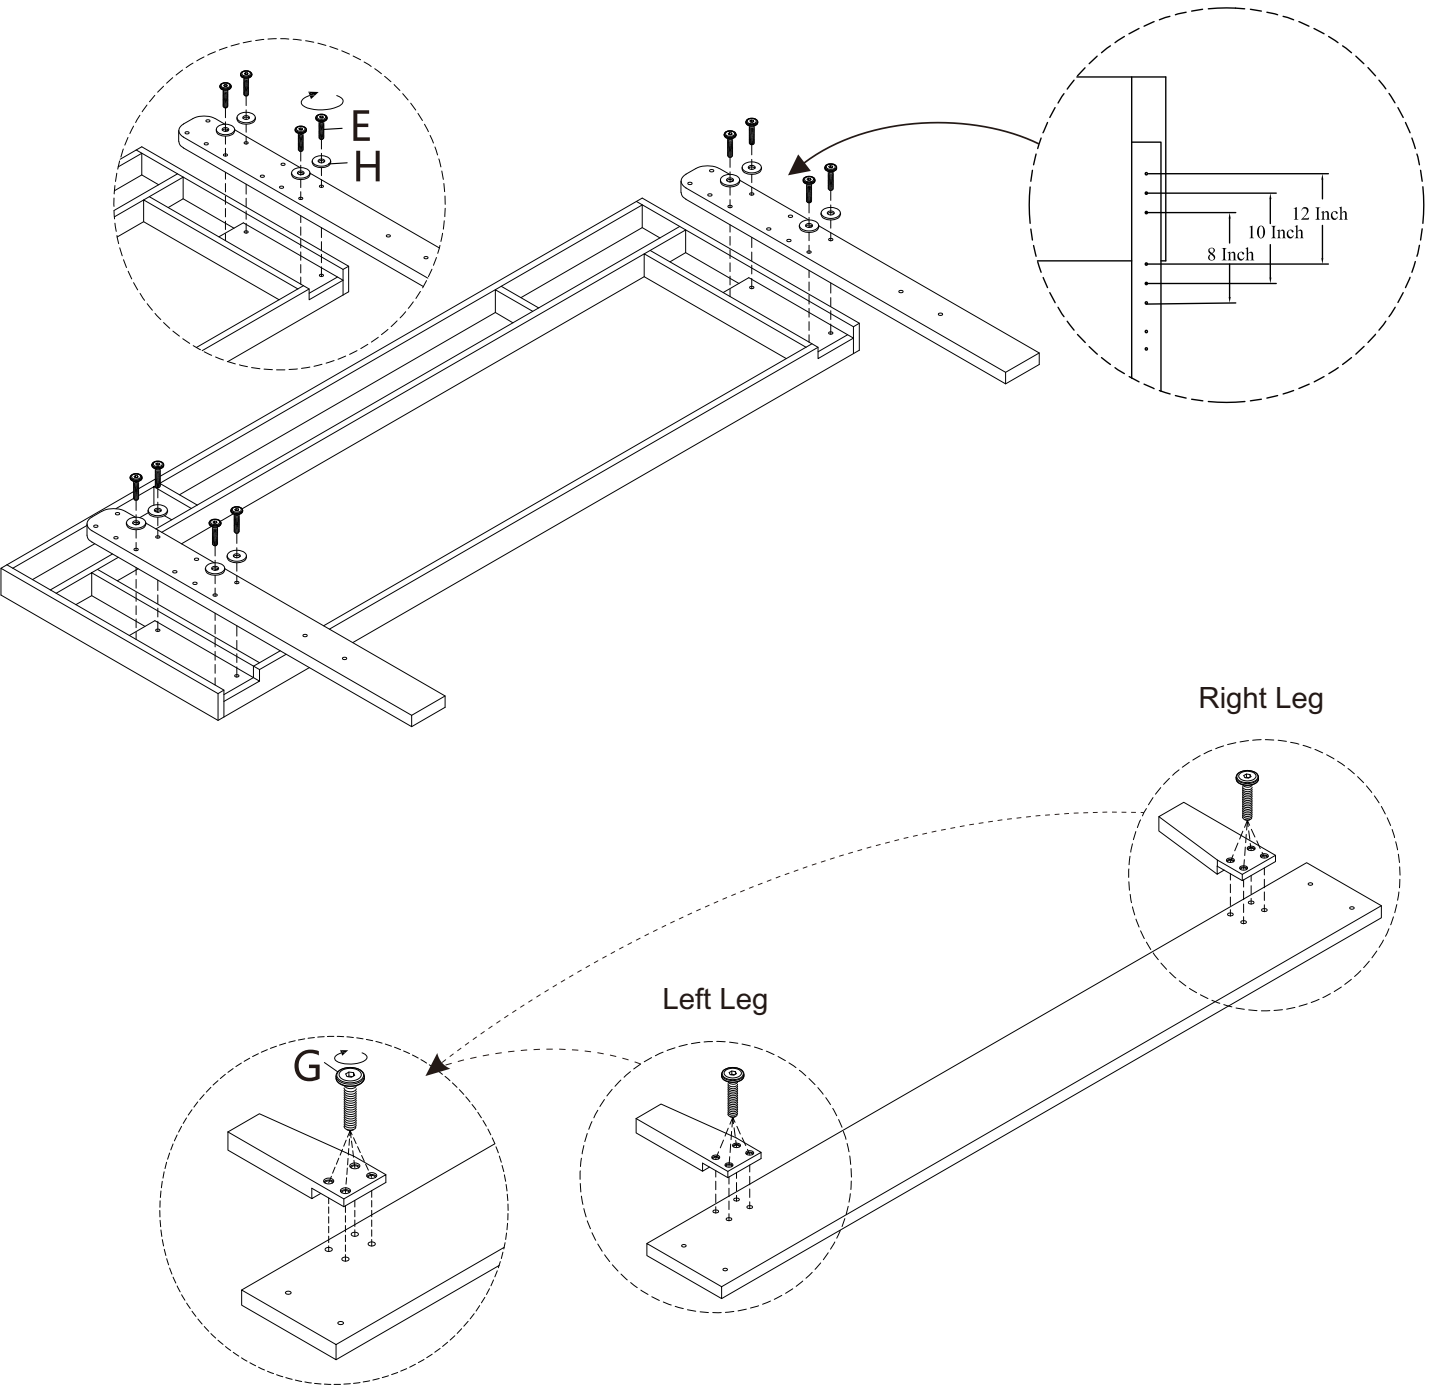

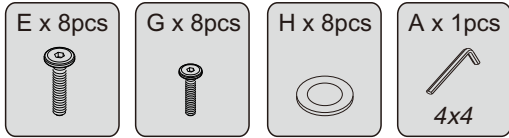

STEP 5

Flip the assembled bed frame to the front side.

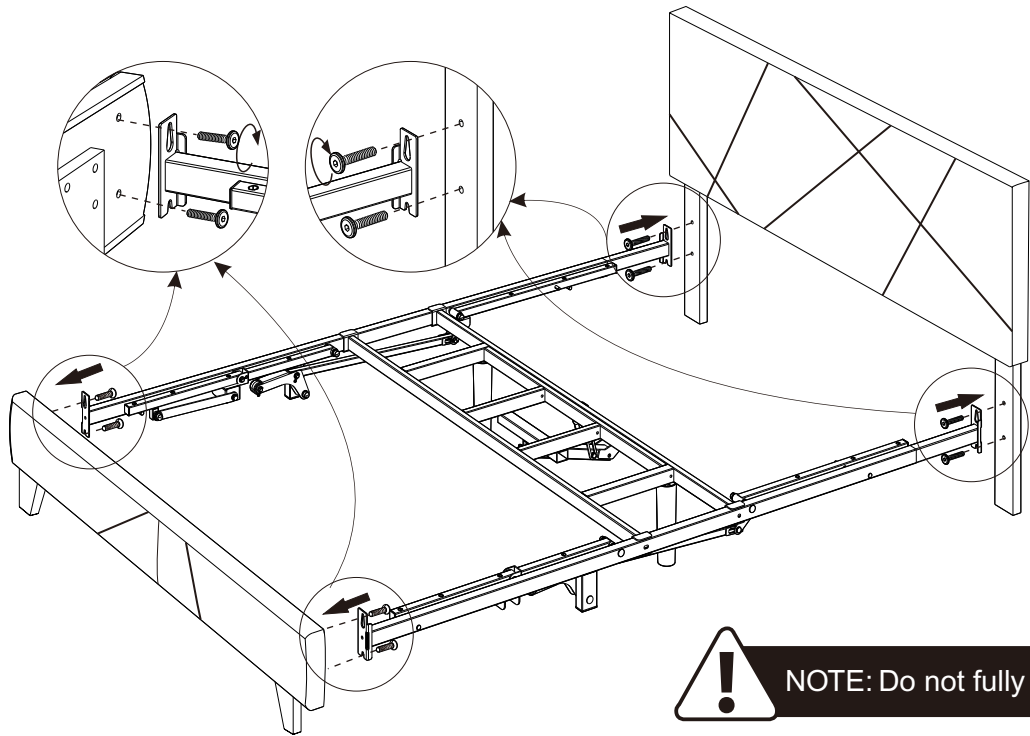

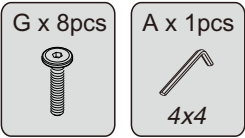

STEP 6

- ① Steps 6 and 7 use the parts and screws from Box 2.
- ② Secure the headboard and headboard legs with 8 screws.
- ③ Attach the legs to the footboard using 8 screws.

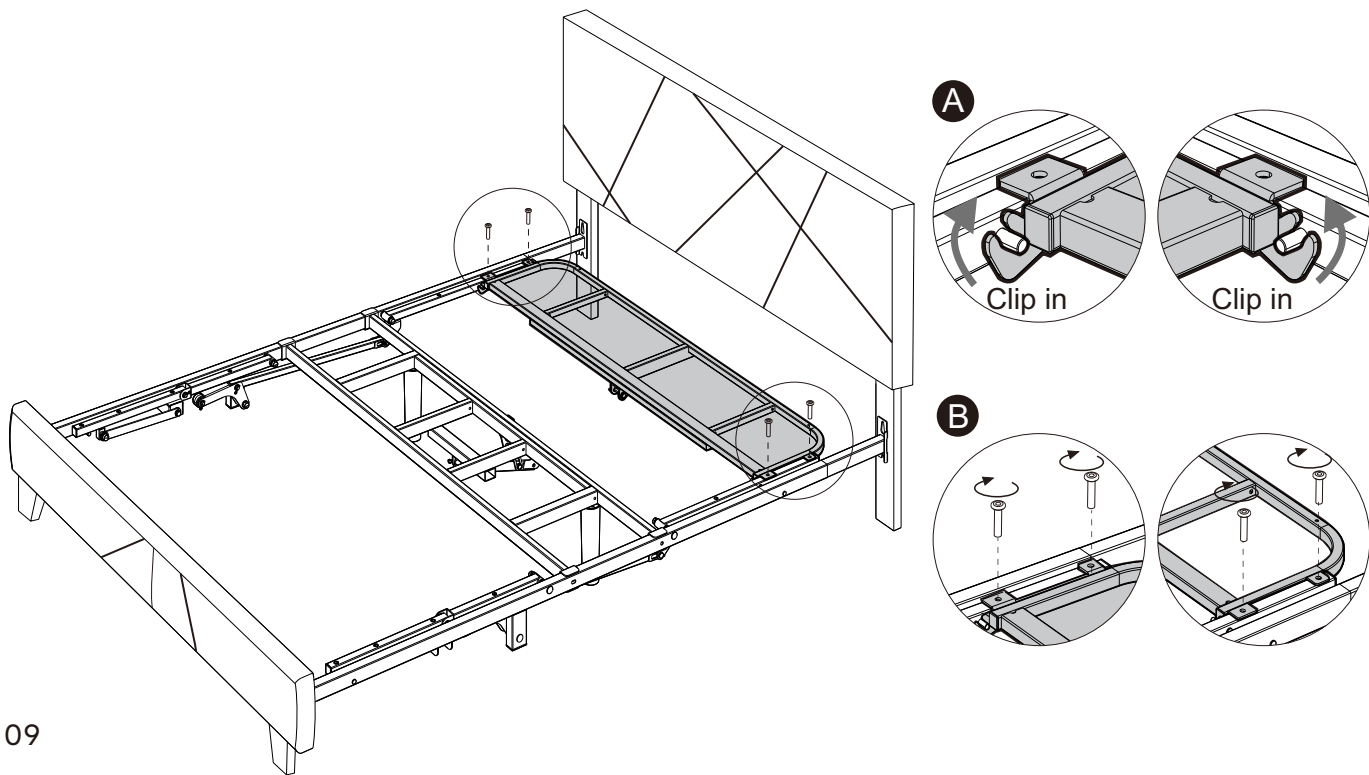

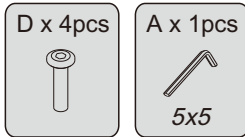

STEP 7

Insert the screws into the headboard and footboard mounting holes, but do not fully tighten them at this stage.

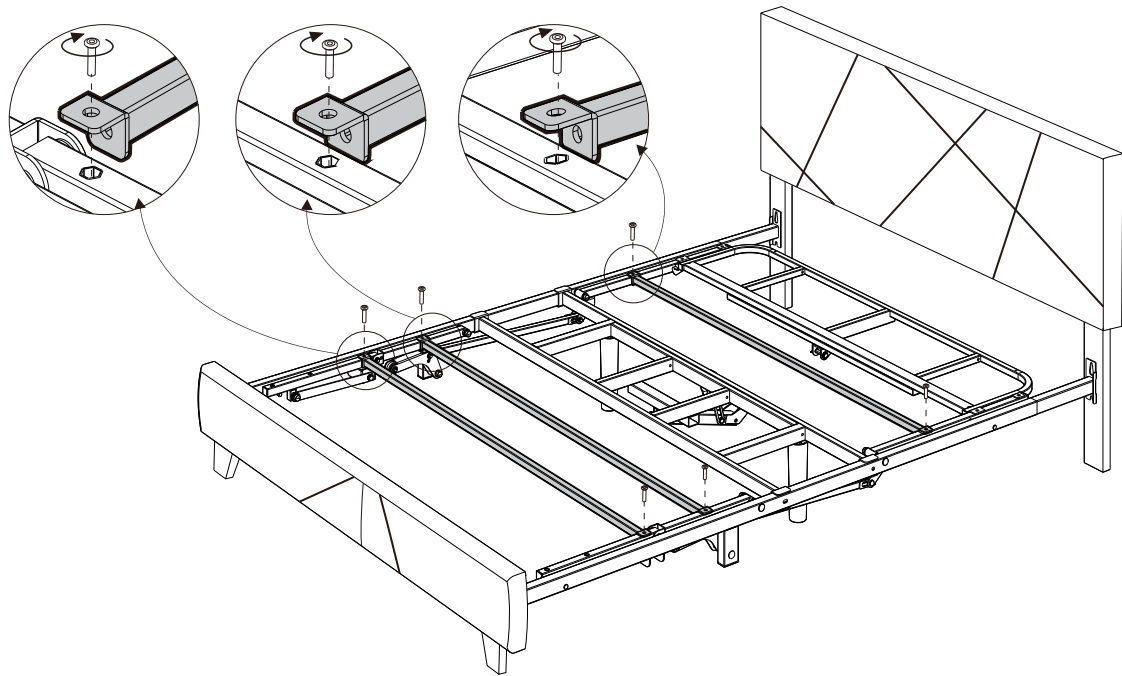

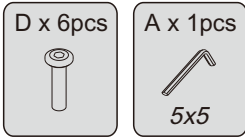

STEP 8

- 1 Clip the metal plates on both sides of the back bed panel bracket onto the corresponding pivot pins, and place it onto the matching mounting holes on both side bed frames.
- 2 Secure with 4 screws.

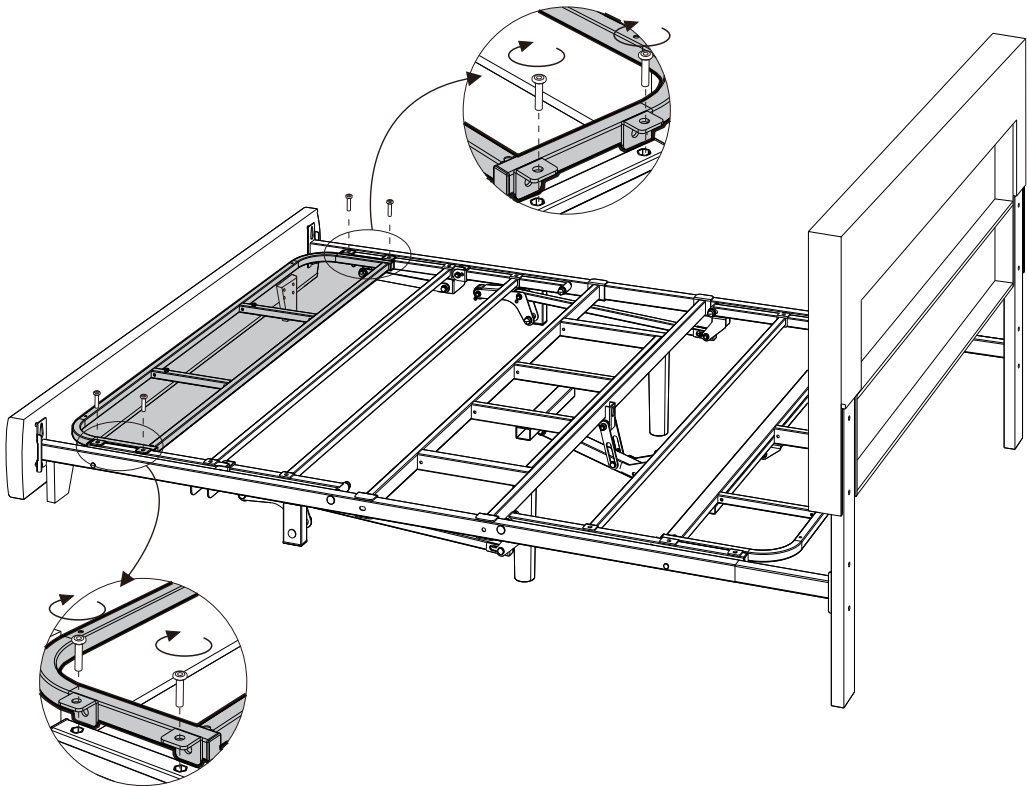

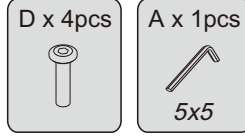

STEP 9

- 1 Place the L-shaped metal plates of the three slat frame brackets onto the corresponding side tube mounting holes.
- 2 Secure with 6 screws.

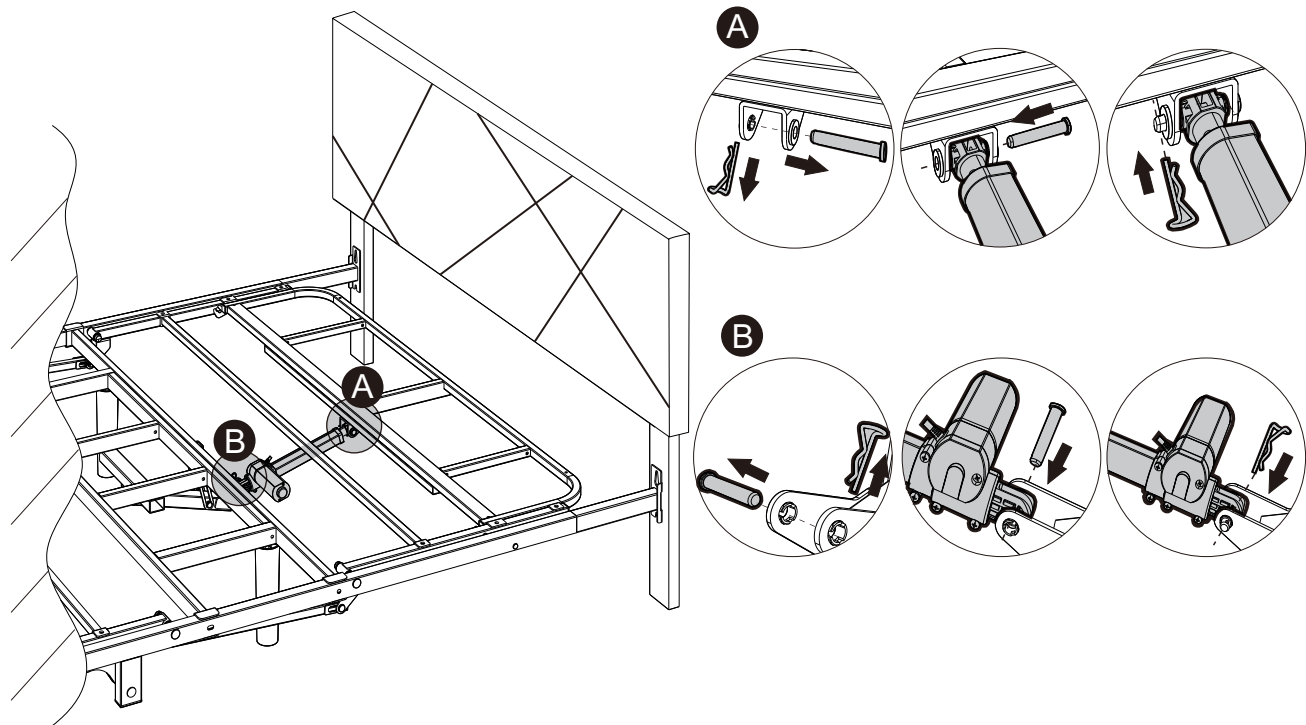

STEP10

- 1 Place the footboard bracket assembly onto the mounting tubes on both sides.
- 2 Secure with 4 screws.

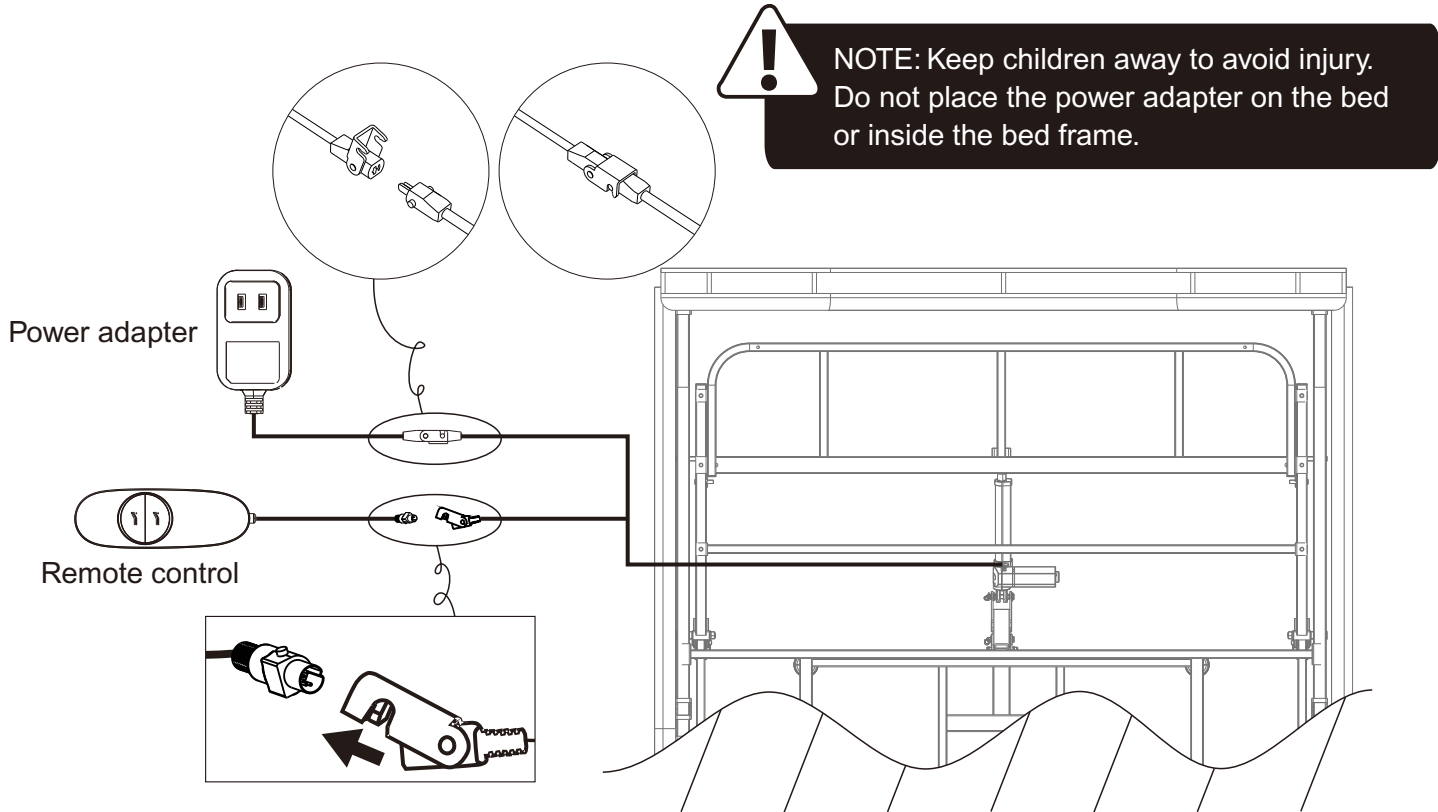

STEP 11

- ① Remove the R-pins and pull out the pivot pins.
- ② After inserting the actuator rod, reinstall the pivot pins and R-pins.

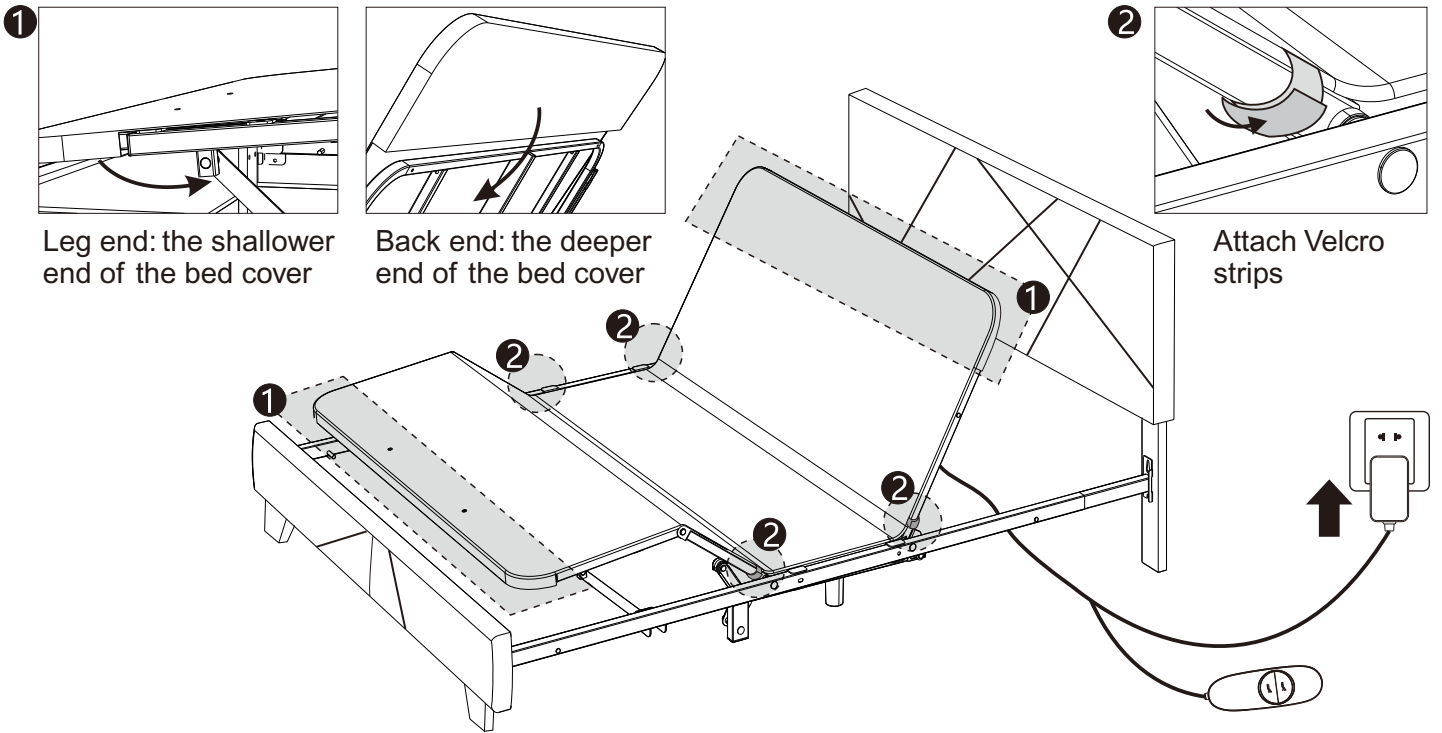

STEP 12

- ① Connect the input power cable (motor) to the power adapter.
- ② Connect the controller to the motor.

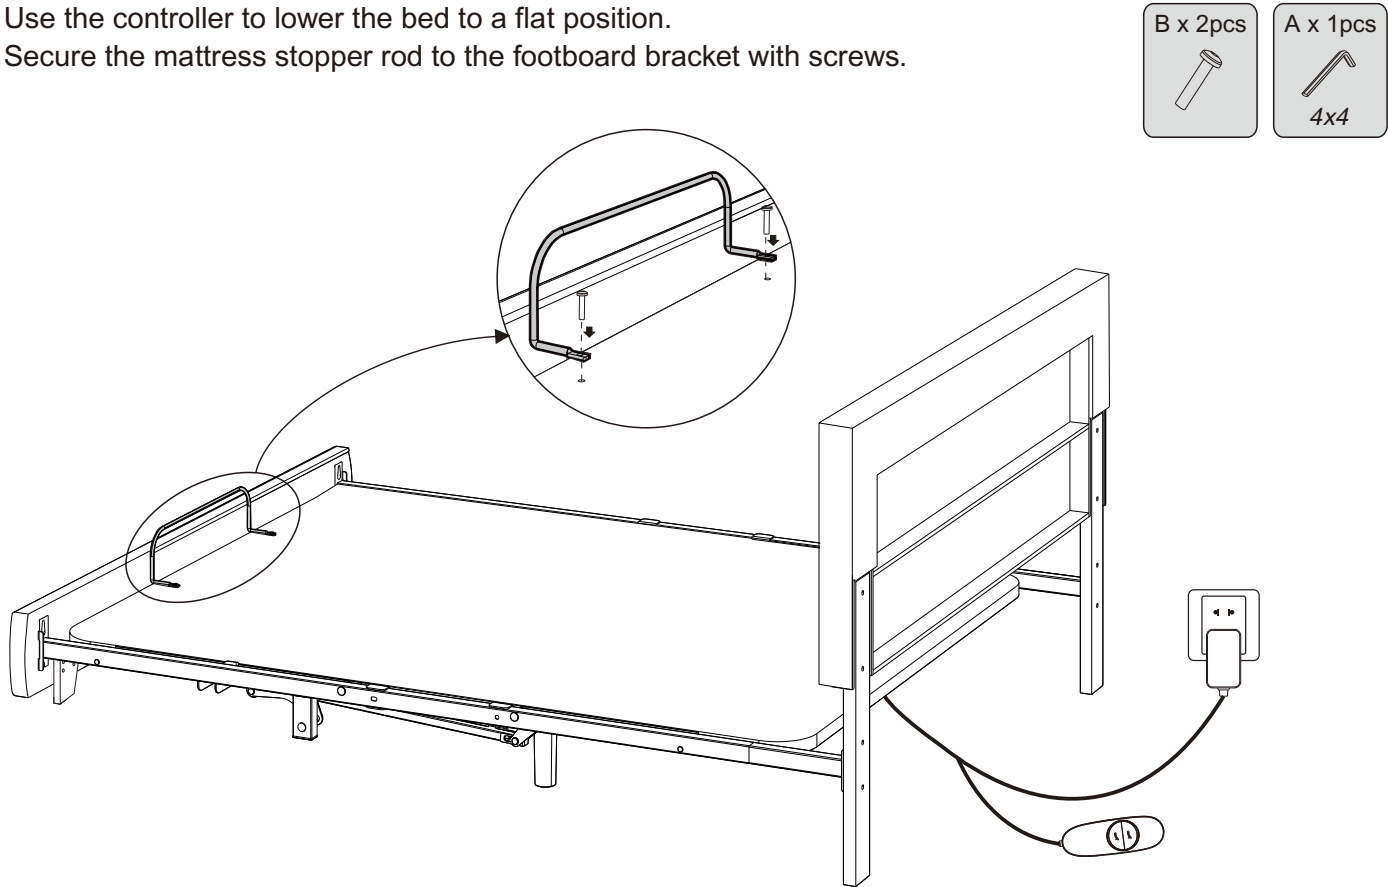

STEP 13

- ① Plug into the outlet to connect power, and use the controller to raise the bed.
- ② Slip the back cover onto the back bed panel, and the leg cover onto the leg bed panel.
- ③ Wrap the four side Velcro straps of the bed cover around the side tubes of the bed frame to secure.

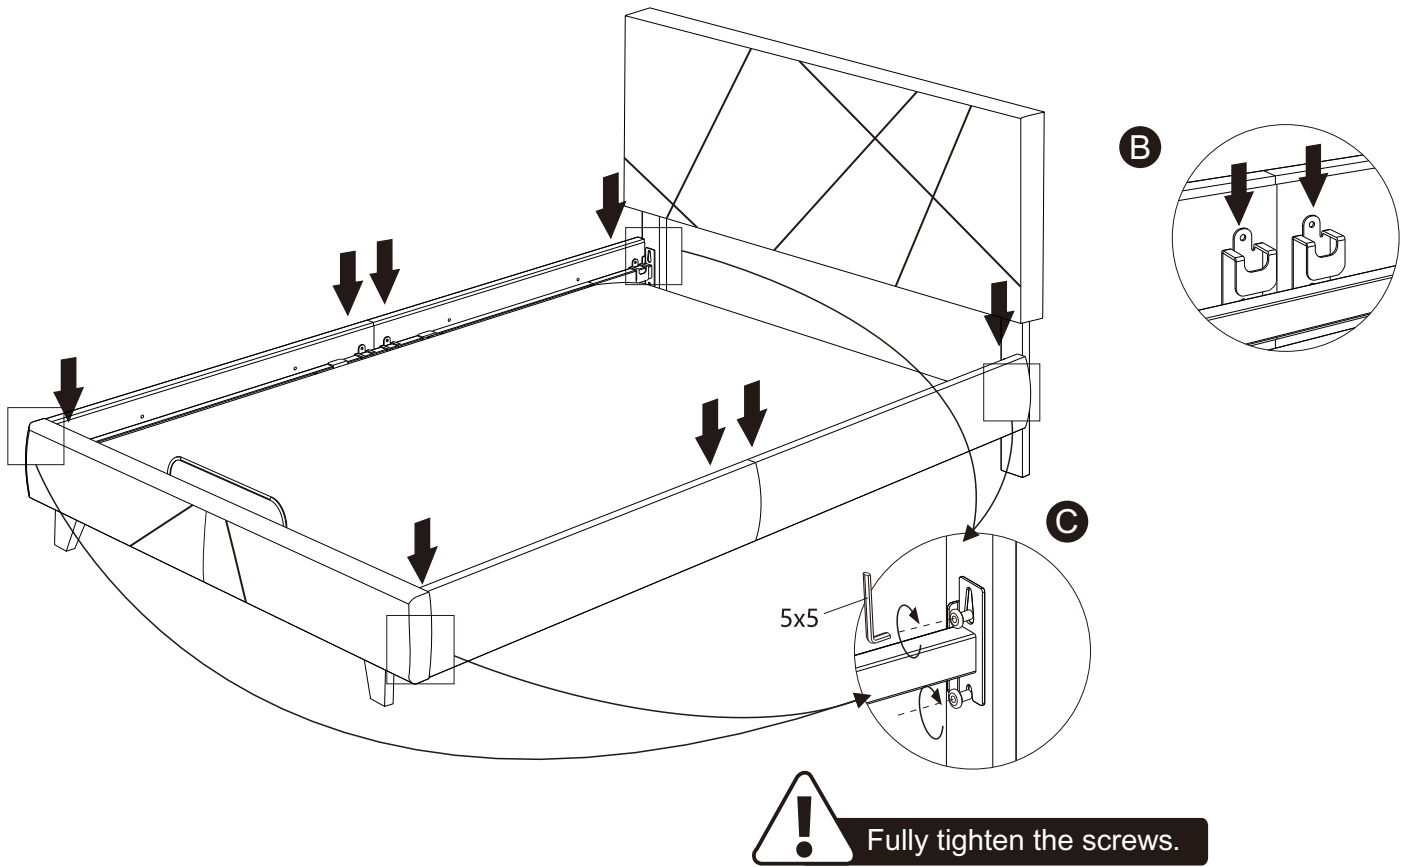

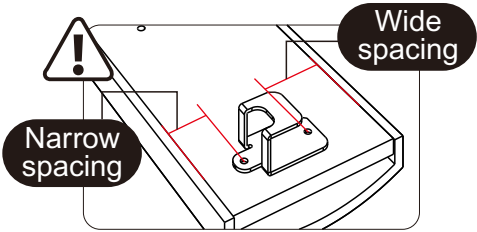

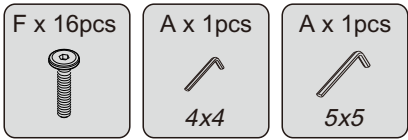

STEP 14

- ① Use the controller to lower the bed to a flat position.
- ② Secure the mattress stopper rod to the footboard bracket with screws.

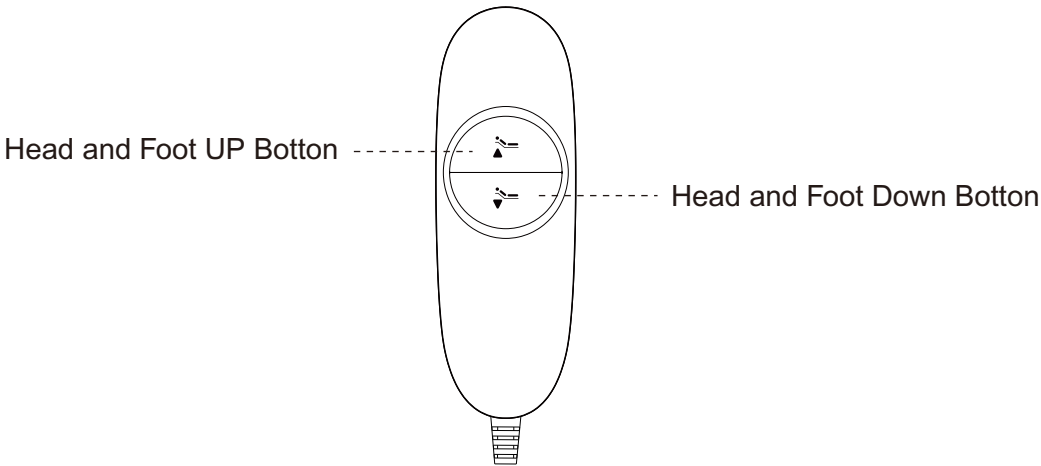

STEP 15

- ① Install the hook plates onto the side panels.
- ② Clip the four hook plates on the side panels into the side bed rails.
- ③ Fully tighten the pre-installed screws at the connections between the headboard and footboard.

OPERATION

Remote Control

TROUBLESHOOTING

If this product malfunctions, please refer to the following table for symptoms and possible solutions.

Lssue	Solution
Remote control buttons are unresponsive.	Ensure the remote control is securely connected.
None of the functions are working.	1. Ensure the motor is properly connected. 2. Verify that all power cables are securely attached. 3. Check that the power cord is plugged into a functioning outlet or power source.
Bed moves up and down but cannot return to a flat position.	1. Remove any obstacles that may be affecting bed movement. 2. Check if the headboard or footboard is too close to the wall.
Clicking sound when raising or lowering the head section.	This is normal. The actuator motor may produce a clicking sound during operation. No action is needed.

Lssue	Solution
Jerky movement during bed adjustment.	1. Clear any clutter or obstructions from under and around the bed. 2. Ensure the motor is securely connected.
Squeaking noises during operation.	1. Ensure the motor is properly connected. 2. Verify that all power cables are securely attached. 3. Check that the power cord is plugged into a functioning outlet or power source.
Bed moves up and down but cannot return to a flat position.	1. Apply lubricant to connection points such as pins, nuts, bolts, and bushings. 2. Ensure nuts are not over-tightened. 3. When reinstalling components, avoid over-tightening. 4. Optional: After completing the above steps, apply lubricant to joints and connection areas of the bed frame.

SAFETY WARNING

- 1. Before connecting the power, please check if the voltage is normal and meets the power requirements for this product: AC100-240V, frequency 50/60HZ.
- 2. This product is only suitable for indoor household use. Please do not use it in other places. Please do not use it with oxygen or other flammable gases.
- 3. The placing area of this product should not be excessively damp, should avoid direct sunlight, and should maintain proper air circulation to prevent any impact on the normal usage of this product.
- 4. Please do not use liquid on this product. If spillage occurs, please disconnect the power cord in a safe manner. Before using again, ensure that this product is completely dry.
- 5. This product must be protected against moisture, water, sunlight, shocks, falls, and impacts during transportation. When moving, it should be gently placed to avoid any damage.
- 6. Please do not place sharp objects (keys, pocket knives, nail clippers, etc.) or hard objects on this product to prevent damage.
- 7. Before using this product, please ensure that there are no people or pets under the bed.
- 8. The power cord should be extended from the bottom of this product and plugged into a socket to ensure that it will not be pressed and damaged during operation. Keep the wire away from moving parts and heated surfaces of this product.
- 9. The electronic components, metals, plastics, wires, and other materials contained inside the electrical appliance box should be disposed of according to the environmental regulations used in each country. Please do not treat them as regular household waste.
- 10. When the product is in the lifting state, do not release all the weight on the head or foot of the bed to avoid damaging the structure.
- 11. When this product is not in a flat state, please refrain from engaging in activities such as jumping or any other highly impactful exercises.
- 12. Non-professionals should not disassemble the structural components and motor of the electric bed to avoid causing irreversible damage.
- 13. This product comes equipped with a corresponding remote control when it leaves the factory. Please follow the instructions in the manual for operation and use.
- 14. Once the power installation is complete, use the remote control to test if the functions are operating correctly.
- 15. Please do not open or tamper with the motor or remote control. Any modifications will void the warranty.
- 16. The maximum weight capacity of this product is distributed across the bed, rather than being individually loaded at the head or foot. Any damage caused by exceeding the weight limit will not be covered under warranty.
- 17. During the installation and dismantling process, it is recommended to use protective gear for performing operations.
- 18. Before using the product, please carefully inspect and ensure that the product has been correctly installed. Only use the accessories provided by the manufacturer for product installation. When placing the product, please leave a sufficient safety clearance to avoid the risk of pinching accidents.
- 19. Please operate after understanding the related hazards. Children and individuals with physical or sensory deficiencies, as well as those with impaired judgement, should use this product under appropriate supervision and guidance. Children must not have unrestricted access to play with it.
- 20. If there is a situation where the power cord is damaged, it is necessary to have the manufacturer or relevant professional personnel replace it to avoid injury.
- 21. This product contains small parts that pose a choking hazard if swallowed accidentally. Please keep these small accessories away from children and promptly dispose of any packaging materials that may present a choking risk.
- 22. Before cleaning or maintenance, you must disconnect the power plug.
