

ASSEMBLY AND INSTALLATION INSTRUCTIONS

WARNING: TO AVOID RISK OF ELECTRICAL SHOCK, BE SURE TO SHUT OFF POWER BEFORE INSTALLING OR SERVICING THIS FIXTURE.

Before You Begin:

- Ensure power is turned off at the circuit breaker before installation.
- Read all instructions carefully.
- Installation should be performed by a qualified electrician if you are unfamiliar with wiring.

Step-by-Step Installation:

1. Secure the central tube to the lamp body pipe.
 2. Connect the lamp body to the swivel head.
 3. Insert the two curved pipes into the side holes of the lamp body's upper and lower sections. Place the washers and secure with nuts.
 4. Place the flat cover over the lower lamp body pipe and secure with a locknut.
 5. Place the flat cover over the upper lamp body pipe and secure with a suspension ring.
 6. Insert the glass panel into the lamp body's curved pipe slot, aligning with the panel holes, and support the glass.
 7. Place the transparent rubber washer over the locknut rod. Thread the rod through the glass and curved pipe panel holes, then secure with the outer locknut on the lamp body.
 8. Adjust the suspension chain length by loosening the swivel connector, matching the desired wire length.
 9. Use mounting screws to secure the mounting plate to the electrical box.
 10. Connect incoming and outgoing wires with wire caps. (Note: Connect positive to positive (live), negative to negative (neutral), and ground to the grounding terminal. Avoid exposed wires during connection.)
 11. Use the crystal lamp head ring to secure the ceiling plate to the mounting plate.
 12. Place the socket cover onto the lamp head and screw in the bulb.
 13. Turn on the power to test if the bulb works properly.
- Installation is now complete.

Safety Instructions:

To avoid fire, shock, and serious personal injury, follow all instructions carefully.

1. Do not install or use the light fixture if any part is missing or damaged.
2. To avoid possible electrical shock, be sure electricity is turned off at the main fuse or circuit breaker box before wiring.
3. Make certain no bare wires are exposed outside the wire connectors.
4. All wiring must conform to national and local electrical codes.
5. Follow the recommended instructions for the proper method of wiring your new light fixture. If you feel you do not have enough electrical wiring knowledge or experience, have your light fixture installed by a licensed electrician. Any electrical work not described in this manual should be performed by a licensed electrician.
