Safety Information

Before installing this sink, read this instruction manual carefully. It contains important information concerning the safe installation, operation, and maintenance of your sink.

Retain this manual for future use. In the event of sale, transfer, or relocation, ensure this manual remains with the sink.

NOTICE: Avoid leaving wet sponges, salt, and corrosive substances on the sink for long periods of time. Lines and scratches may be caused by improper use of the sink.

NOTICE: Do not place the sink on its side as there is a risk of damage.

WARNING: Keep all packaging materials out of the reach of children to prevent possible choking or suffocation.

WARNING: Use caution when installing the sink. There is a risk of crushing your fingers when inserting the sink into the installation location.

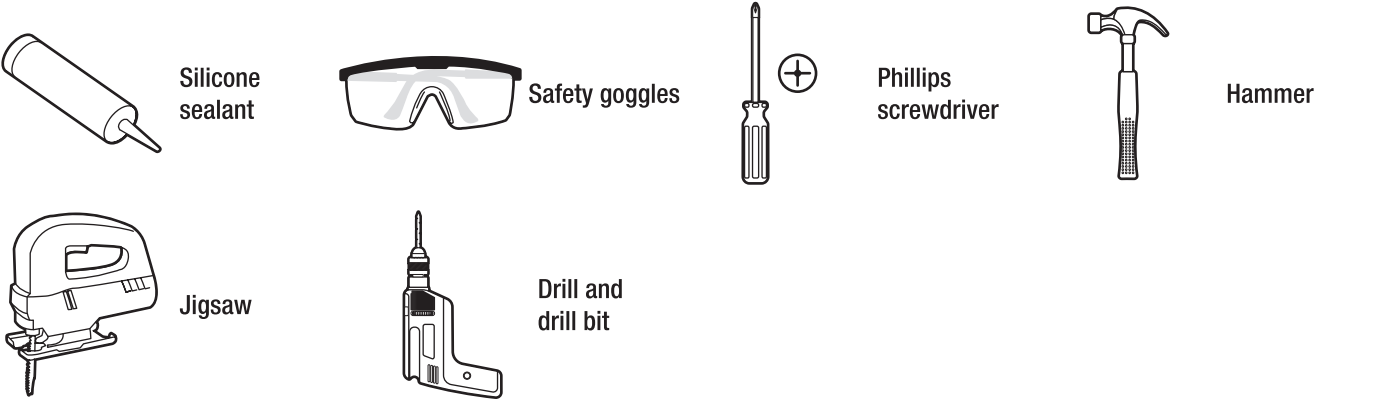

CAUTION: Never place hot objects such as hot pans on the sink. Wait until the object has cooled or use a heat resistant plate when placing hot objects on the sink surface.

Pre-Installation

PLANNING INSTALLATION

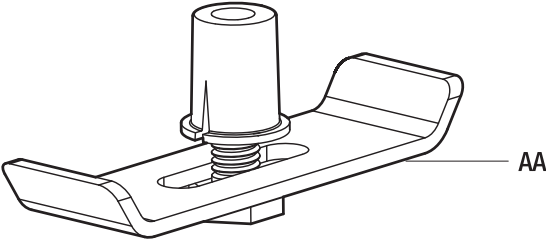

Compare all parts to the Hardware Included and Package Contents lists and verify that all parts are included. Inspect all parts for damage. If there are missing parts or visible damage to the sink, do not install and contact the Customer Service Team.

Undermount-Installation

1 Preparing the installation location

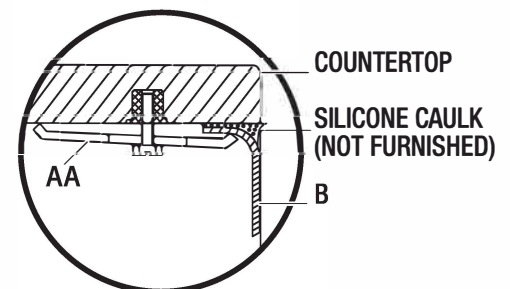

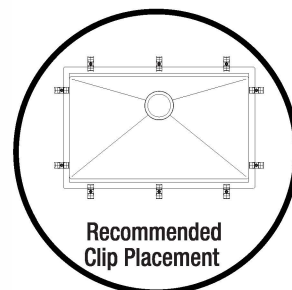

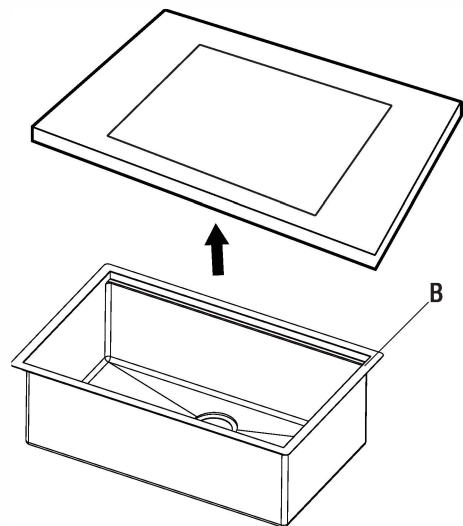

NOTICE: It is strongly suggested that you contact a professional countertop fabricator when installing the sink as an undermount.

- ☐ If necessary, remove the old sink and disconnect the water supply lines underneath the sink.
- ☐ If your sink does not already have an existing installation location, place the template (A) on the sink installation location and trace the locations to cut out.
- ☐ Check inside the cabinet for any obstructions prior to cutting.
- ☐ Cut out the location for the sink.

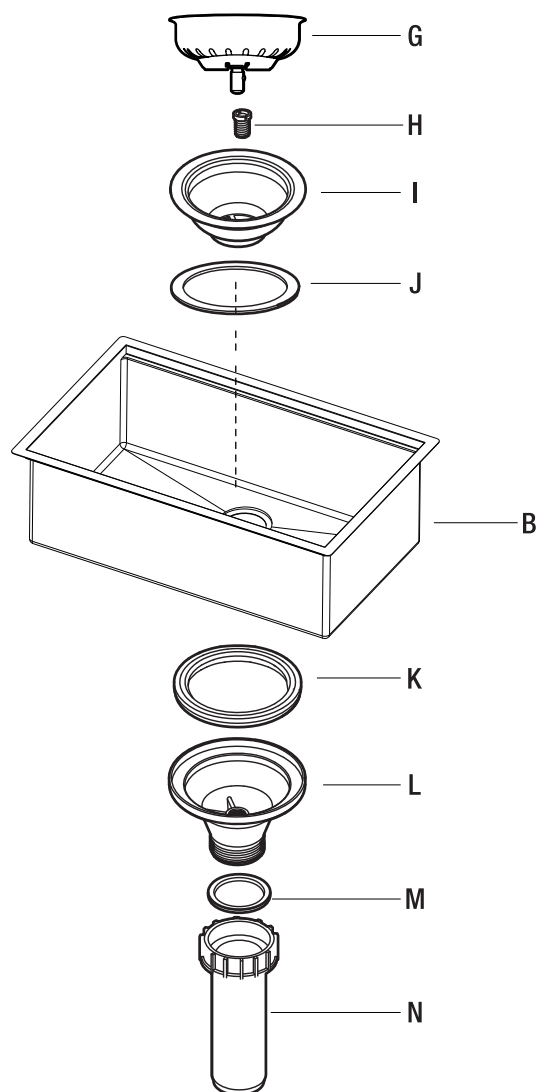

2 Installing the sink

- ☐ Locate and drill the mounting holes, following the countertop manufacturer's instructions. Holes should allow even spacing of mounting brackets around the sink.
- ☐ With the countertop inverted (upside down), fasten the mounting brackets to the countertop loosely.
- ☐ Clean the bottom of the countertop and the top flange (or lip) of the sink.
- ☐ Apply a narrow bead of silicone adhesive sealant evenly all around the top of the sink flanges.
- ☐ Position and align the sink over the countertop opening. Press silicone onto the countertop.
- ☐ Tighten fasteners until mounting brackets are snug against the sink. Check alignment of the sink to the countertop opening.
- ☐ Tighten the fasteners evenly. Be careful not to over-tighten.
- ☐ Immediately remove excess sealant.

3 Installing the drain assembly

- ☐ Place the gasket (J) on top of the other drain hole in the sink (B), followed by the strainer bowl (I).
- ☐ From underneath the sink (B), position the double lip seal (K) with grooves facing up on the drain holes, followed by the waste bowl (L).
- ☐ From the top of the drain hole, screw the screw (H) into the waste bowl (L).
- ☐ Position the gasket (M) at the base of the waste bowl (L) and screw the fitting (N) to the base of the waste bowl (L).
- ☐ Insert the assembled basket (G) into the strainer bowl (I).

Care and Cleaning

- ☐ Do not use abrasive cleaning creams or powders, concentrated caustic soda, formic acid, or anything highly corrosive.
- ☐ Clean with a sponge or soft dish cloth and gentle sink soap. For stains that are difficult to remove, such as calcium deposits, use eraser sponges, vinegar-based cleaners, and lime removers.
- ☐ Rinse the sink with hot water and dry the sink with a soft absorbent cloth.
- ☐ Fruit juices, coffee, and tea can stain the surface of your sink if not removed. Rinse or wipe the sink promptly after these substances make contact with the sink.
- ☐ Never use steam or high-pressure cleaning systems to clean your sink.
