

The AmTab[®] Advantage[™] DynaGrip[®] Glides

Architect specified. Designer selected. Client adored.[™]

AmTab: Patented DynaGrip[®] Glides

Examples of Poorly Designed Glides

↑
No extra grip material and may eventually spin off with round tubing
"detachment"

↑
Some glides might not touch floor surface completely if poorly designed or poorly manufactured

Dents and scratches on the floor caused by detachment of low quality glides or possibly due to poor design or low quality manufacturing

Architect specified. Designer selected. Client adored.[™]
