

Certificate of Authenticity

This certificate guarantees that the Polish stoneware offered by Polish Pottery was hand crafted and hand painted in the Boleslawiec region of Poland. This region is famous for its naturally found white clay which artisans have used for centuries to craft this durable and beautiful stoneware. In the 1700s, the artists of this region designed and made pottery for royalty, earning them a reputation and a standard for excellence that is still upheld today.

Each piece of pottery is carefully formed and painted by hand to ensure that exceptional attention to detail is paid to each piece. Artists train for years to develop their craft. Once an artist reaches a highly advanced level of skill, they are allowed to design their own patterns. The most beautiful and intricate patterns are called UNIKAT patterns. These patterns bear the artist's signature. Becoming a UNIKAT designer is a highly coveted position for every artist in Boleslawiec.

About Polish Pottery

Polish pottery is known for its versatility in the kitchen and on the table. It is safe for use with food in the microwave, freezer, oven and dishwasher. Polish stoneware is resilient to abrasives making it durable and resistant to scratching or chipping. It distributes heat evenly for perfect baking and is also nonstick for easy clean-up, making it easy to care for.

The bright patterns never fade, and are offered in thousands of variations to mix and match. It is this combination of function and beauty that makes Polish pottery so appealing. The pottery is fired in electric and gas kilns at temperatures exceeding 2200 degrees Fahrenheit.

This results in a stoneware that is meant to resist aging and provide lasting beauty that stands the test of time. We inspect

each piece we stock for irregularities, and all of our stoneware is protected and guaranteed from during shipment. All Polish stoneware offered by Polmedia Polish Pottery is certified by an independent U.S. testing lab to be lead and cadmium free.
