

Brightech® Assembly Instructions

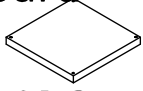

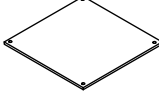

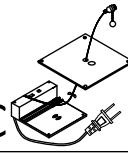

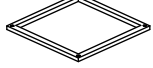

MAXWELL

(With USB & Wireless Charger)

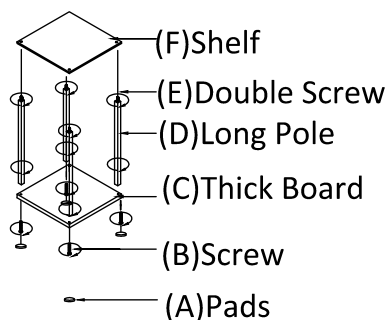

(See last page for details on
extending your warranty for free!)

Before beginning assembly, make sure you have all the parts:

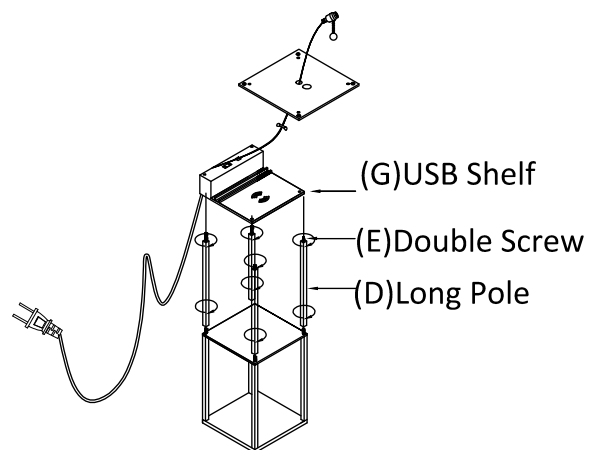

A Pads  4PCS	B Screw  8PCS	C Thick Board  1PC	D Long Pole  10PCS	E Double Screw  10PCS
F Shelf  1PC	G USB Shelf & Board  1PC	H Short Pole  6PCS	I Long Bolt  2PCS	J Shade  1PC
K Wire Clamps  4PCS	L Frame  1PC	M Cap  4PCS	N Fastener  4PCS	

STEP 1

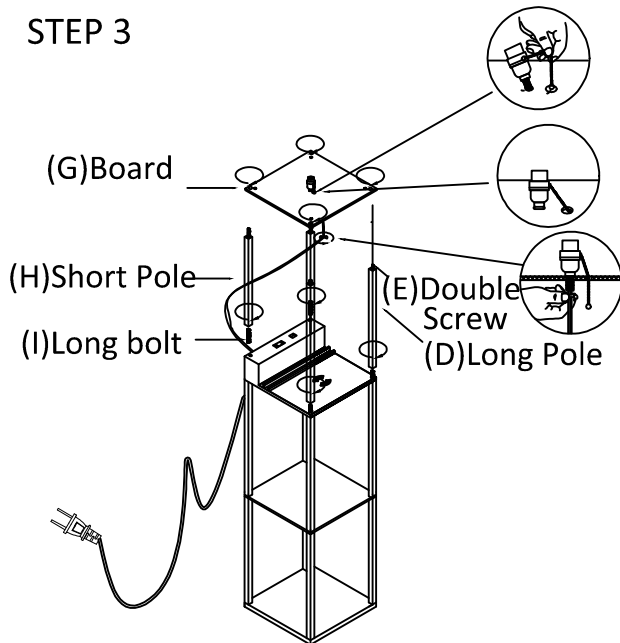

Begin assembly with the base of the lamp. Screw poles (D) clockwise into thick board (C) with screws (B) until tight and cover them with pads (A). Then screw four long poles (D) and shelf (F) together with double screws (E) until tight.

STEP 2

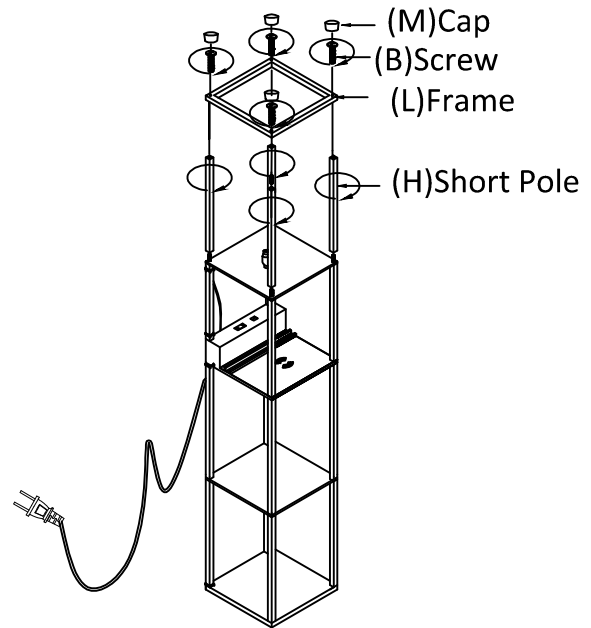

Screw poles (D) clockwise into shelf (F). Then screw the four poles (D) and USB shelf (G) together with the double screws (E) until tight.

STEP 3

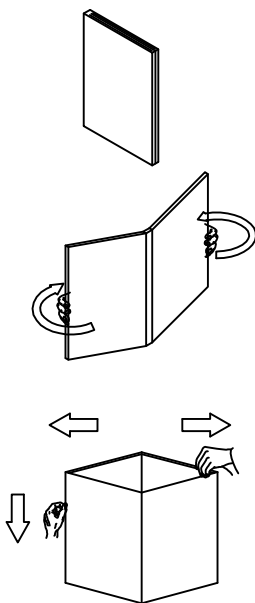

Screw poles (D) and USB shelf (G) together until tight and then insert double screws (E) into poles (D) and screw tight. Set the socket on USB board (G) and drop the pull chain directly through the hole and screw the socket until tight. Then place USB board (G) onto the poles (D).

STEP 4

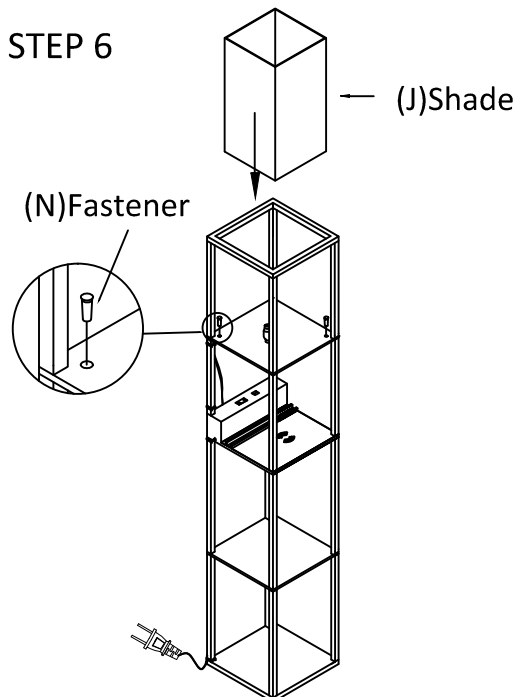

Place frame (L) onto the short poles (H) and tighten with screws (B). Then put the caps (M) onto frame (L) over the screws (B).

STEP 5

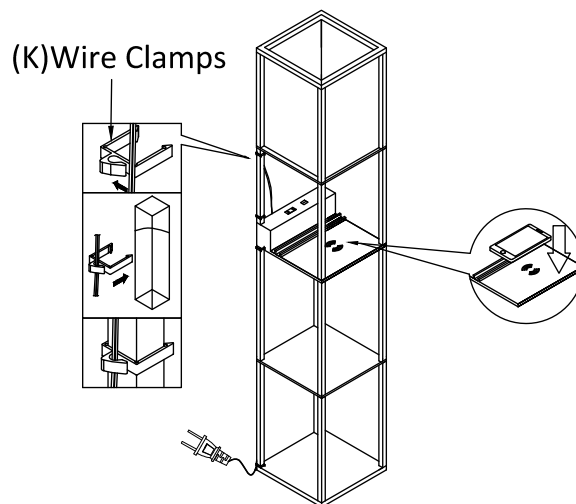

Press by hand along folded edge of shade (J) to expand the shade (J) into its full size.

STEP 6

Place shade (J) onto USB board (G) and secure with fasteners (N).

STEP 7

Insert the wire into wire clamps (K) and then attach the clamps (K) to the poles, using one clamp per level.

Wireless Charging

Place your phone within the area indicated by the curved lines. When the light turns green, your phone has started to charge. (At first, you may need to slightly slide your phone until its battery lines up with the charging unit.) If the light stays red, your phone may not be recognizable (older models) or its protective case may be interfering with the charging process. **Please note:** Phones made entirely of metal can not be charged wirelessly. If any metal object comes into contact with the wireless charger, the light will flash alternately green and red. If your phone temperature rises above 107°F, it will stop charging; after it has cooled down, your phone will continue charging.

Extend Your Warranty From 3 Years To 5 Years

If you haven't done so already, it takes less than a minute to register your product online and receive an additional 2 years warranty coverage at <https://brigtech.com/pages/extended-warranty>.

Customer Support
