

Solar street light

ETD-360

Simple
Free of power cost
No wires

Installation Instructions
CE RoHS IP65

Installation method

To power on the lamp properly,
please follow the instructions.

- 1.The solar lamp has been fully charged when delivered and can work properly. Please check whether the lamp is working normally before installation.
- 2.Turn on the lamp manually, if the light is on, it indicates that it can work properly.
- 3.Please make sure the side with grid pattern of the panel faces outward and be well exposed to the sunlight.
- 4.The battery must be fully charged before it can be used for more than twelve hours.
- 5.Working mode of lamp: The light will turn on automatically when the environment is dark and will turn off automatically when it is bright enough.
- 6.Please make sure the lamp is securely fixed to avoid any hazards.
- 7.Please don't dismantle the lamp as it could impact potential maintenance.

Packing list

1
