

Wi-Fi Ready Plastic Enclosures

On-Q Plastic Enclosures make it easy to consolidate and distribute home services from a single, centralized location. Constructed of Wi-Fi transparent plastic, the enclosures are designed to integrate wireless devices into traditional structured wiring installations with no signal loss.

1 Available in 3 sizes: the 20", 30", and 42" Plastic Enclosures can be purchased with or without a cover, individually or in convenient 5 packs.

2 Plastic Trim Rings: easily conceal imperfections in drywall cutouts for clean enclosure installation. For simplified installation, the modular design snaps together quickly and easily without the need for tools. Trim Rings available as an optional accessory.

3 2" Top Knock Outs: allow simple on-site installation and easy management of cables running to the enclosure. They include screw driver holes for quick removal.

- Rubber grommets can be purchased separately for added protection while running wires and to meet local jurisdiction requirements.

4 Extruded Cover: adds 1.2" of depth for cable headroom and third-party device compatibility.

5 Universal Mounting Grid: maximizes compatibility with third-party products.

6 Extra Venting: additional venting along the center channel of the cover allows for superior heat dissipation.

7 1 1/2" Bottom Knock Outs: allow simple on-site installation and easy management of cables running to the enclosure. They include screw driver holes for quick removal.

8 Redesigned Hinge: attaches quickly and easily with included screws.

9 Two Outlet Cut-Outs: allow for quick installation and convenient placement of surge or AC outlets to power active devices within the enclosure.

10 Versatile Installation Options: the plastic enclosures can be surface-mounted or recessed in the wall.
