Installation Guide

Mark with a dual-purpose bracket first

8 large drill bit openings (Expansion screw specification 6X60mm)

Drive the plastic expansion tube into the hole

Insert one side of the bracket hole into the protruding plastic expansion tube and tighten the expansion nail

After the bracket is installed, place the sink on the bracket

Finally, install the faucet and the water pipe

1: First unscrew the screws

2: The main body is close to the bottom of the sink

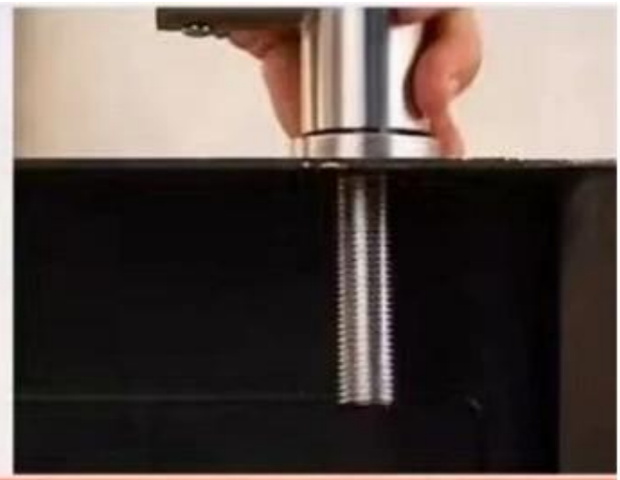

3: Place the rubber pad and lid

4: Tighten the screws again

1. Remove the fixing nut

2. Install the faucet into the basin

3. Install the washer and tighten the nut

4. Connect the faucet inlet rod to the hose
