

Installation Instructions

1

Open the box and untie the securing ropes. Take out the planter and cedar tree from the box.

2

To splice the plants together, locate the top and bottom posts with the corresponding markings.

3

Adjust the branches to fluff the trunk and leaves to the desired fullness.

4

Place it in a larger planter and add stones. You can also plant it directly in the soil to make it more stable.

In the soil

Add stones

3Ft

4Ft

5Ft

6Ft

7Ft

TIP: If you find that the leaves have fallen off, don't worry, reinsert them back into the tree.

Given that the tree is quite tall, place it in a larger planter and add some stones to prevent it from toppling over.

The steps in this manual apply to the above products that require assembly.
