

## Suggestion

- It is recommended to install it near a power source, as later steps will require the power to be turned on.
- This product requires installation by at least two people.

|   | M4                                                                                    |

Note that the "gourd-shaped hole" here on the front crossbeam is close to the left cabinet

First install the inner screw, then install the outer screw.

## Step 44

Attention, please! Install accessory 5, which is the crossbeam, and press the legs on both sides to the lowest position.

⚠ If it is not pushed all the way to the bottom, it may cause the product to have uneven legs, which can result in an uneven tabletop.

Note: If the transmission rod doesn't fit smoothly into the hole of rod coupler, fine-tune fit with the wrench.

## Step 49

Step1: Connect the controller of the lifting frame, namely accessory 6, to the plugs of the other two accessories 10 and 13, and then turn on the power.

Step2: Press the downward button on the controller for 5 seconds- the hand controller will display "RST". Release the button, then hold down the downward button again until the digital tube shows a number.

Step3: Press and hold the "Rise" button, raise the lifting frame to a certain height, then turn off the power and proceed to the next installation step.

# Instruction Manual for JCB35M51C Controller (Version 1.0-English)

## System Function Description:

### 1. Lifting and Lowering Function of the Height-Adjustable Desk:

Hold down the upward button, and the column will rise; hold down the downward button, and the column will lower. Release the button, and the movement will stop.

### 2. Memory Position Function:

Long press the "①/②" button for 3 seconds until the digital tube display flashes. After the number flashes 3 times and stops, the current height will be successfully stored in the corresponding memory position. Short press the "①/②" button and release it, and the tabletop will automatically move to the height of the memory position. During operation, pressing any button can stop the movement.

### 3. Reset Function:

#### (1) Function Description:

The system needs to be reset under specific circumstances.

These circumstances include:

- ① When used for the first time, the system will enter the reset state after being powered on.
- ② Active reset will put the system into the reset state.
- ③ A system abnormality will cause the system to enter the reset state.

#### (2) Operation Method:

Bottom Reset: Hold down the downward button until it reaches the bottom. Then release the button, and press the downward button again for 5 seconds—the hand controller will display "RST". Release the button, then hold down the downward button again until the digital tube shows a number.
