# PRECAUTIONS AND INSTRUCTION

## ATTENTION

Please read all instructions thoroughly before using.

Serious injury may be caused if you ignore the following warning and instruction.

Basic precautions should be always followed when using this electrical equipment.

## DANGER

To avoid the risk of causing burns, fire, electric shock, or other injuries:

- ▶ Connect the power cord to a properly grounded outlet.
- ▶ Using only for its intended use as described in this manual.
- ▶ Don't use accessories not recommended by the manufacturer.
- ▶ Please disconnect the power after using.
- ▶ Please keep the electrical cord away from heated surfaces.  
If the sauna is faulty, the supply cord or plug is damaged, please stop using it immediately.

## CONNECT TO BLUETOOTH SPEAKERS

- ▶ When the sauna power cord is plugged in, the speakers make beeps sound in 2-3 seconds telling you the speakers are ready for pairing.
- ▶ Activate the blue tooth function of your smart phone/tablet.
- ▶ Search and find the sauna Bluetooth speaker "BT Speaker".
- ▶ Click "BT Speaker" to link.
- ▶ When successfully connected to the speakers, the speakers make a beep, then the Bluetooth speaker is under the control of your phone/tablet.
- ▶ When the sauna room is being powered off or the Bluetooth speaker is being disconnected, the speakers will beep twice.
- ▶ Before connecting to the Bluetooth speakers, make sure no other phone is connected to the speakers.

## WARNINGS

- ▶ Not recommend doing sauna over one hour.
- ▶ Don't place the sauna in a humid environment.
- ▶ Don't touch heating panel directly.
- ▶ Don't bring any sharp tool inside sauna, heating panel may be damaged or cause severe consequences.
- ▶ When successfully connected to the speakers, the speakers make a beep, then the Bluetooth speaker is under the control of your phone/tablet.
- ▶ Placing the sauna on a flat surface for lining up installation.

- ▶ Don't **disassemble the main box** , wires or other electronic parts without factory authorized. You may get injury or damage the sauna.
- ▶ Customer with medical condition should consult doctor first before using sauna (Including acute diseases, malignant tumors, high blood pressure, heart disease, allergic dermatitis, pregnancy, etc.)
- ▶ This sauna should not be used for person (including children) with **reduced physical, sensory or mental capabilities, or lack of adequate experience knowledge**, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- ▶ Using a sauna after taking alcohol, drugs, or medication can lead to hyperthermia and increase the risk of death.
- ▶ If you are feeling uncomfortable, exit the sauna immediately and consult a doctor. Children should be supervised to ensure that they do not play with the appliance.

#### HYPERTHERMIA

Prolonged exposure in the sauna may cause hyperthermia.

Hyperthermia occurs when body's core temperature rises above 98.6F.

Symptoms of hyperthermia include a rise in body temperature, dizziness, lethargy, drowsiness, and fainting. The effects of hyperthermia may include:

- a) Failure to perceive heat / Unawareness of impending heat
- b) Failure to recognize the need to exit the sauna
- c) Fetal damage in pregnant women
- d) Physical inability to exit the sauna
- e) Unconsciousness

# CONTROL PANEL INSTRUCTION

---

## Important Note

- ▶ After completing the product assembly, please firstly test whether the appliance operates normally. After normal operation, please use our attached adhesive to seal the product, which can increase the waterproof and sealing effect of the product.
- ▶ The areas marked in red in the diagram need to be sealed as shown in the diagram, four places in total.

## CHROMOTHERAPY LIGHTING SYSTEM

- ▶ Chromotherapy is the science of using color to tune the body's vibrations to frequencies that produce health and harmony.
- ▶ Each color has a specific vibrational frequency, and each vibration is associated with a different physical symptom.
- ▶ Chromotherapy helps balance your body by acting on various energy points through the full spectrum of visible light, with each color catering to a different need.

## Tips for Installation and Maintenance

- ▶ We provide the vials of silicone for sauna wooden frame repair, such as crack or potholes repair. Pay attention to its warranty time is 1year.
- ▶ For some large crack repair, you would also buy vial of silicone on local market.
- ▶ Pay attention to remove exceed silica gel after repair, for the silica gel would not be firmly attached if wood wax oil etc painted on wood.
- ▶ Please repair crack when you found it, otherwise it may get larger and cause sauna damaged.
- ▶ Please keep doing regular maintenance for sauna, at least 1 time per 3-6 months after sauna is installed.
- ▶ It is strongly recommend to do maintain to the floor panel of sauna per 6 months, for it is easy to get rotted and damaged.
- ▶ When doing maintenance for bottom panel, please disassemble the sauna first and leave floor panel only. Flip the floor panel to dry its bottom face. After remove the dirt, painting second time with anti-corrosive coating .
- ▶ It is prohibited to major modify equipment body or electrical parts, or to connect external device.
- ▶ Please contact customer service for solution to those problem happened in installation, using or maintain. You will be assured to problem solved.

## KEEP IN WELL CONDITION FOR SAUNA ROOM

- ▶ Place a large towel over the seat and baseboard before use to absorb excess sweat and prevent it from eroding the equipment.
- ▶ In order to prevent colds during use, it is recommended that the temperature be gradually lowered until the body gradually adapts to room temperature before stepping out of the equipment.
- ▶ If there is a lot of sweating after using the device, it is recommended to take a shower after 60 minutes, or use a room temperature wet towel to wipe the body after using the device, which is also an alternative to showering. It is also a good alternative to showering and is better for the skin.
- ▶ After use, open the door and ventilate for about 10 minutes, during the ventilation process, the device can be turned off, and the residual temperature can also be used to evaporate the internal water vapor.
- ▶ If there is sweat dripping onto the surface of the board or heating plate, etc., you can use a damp towel to wipe it in time to prevent discoloration and leaving stains, etc.
- ▶ The door just has a magnetic suction device, can not prevent violent entry, please pay attention to children, the elderly, pets and other bad entry.
- ▶ It is strictly prohibited to add locking devices to the door when using it, and it must be ensured that people can enter and exit conveniently at any time.
