Thanks for your purchase.

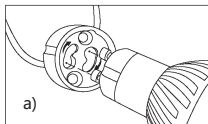

Please read this instruction carefully before using and keep it properly for future reference.

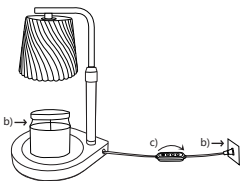

- ① Lampshade ② Wooden platform ③ 2 Lamp bulbs
④ Adjustable metal pole ⑤ Dimmer ⑥ Plug wire

How to use

a) After receiving the product, please install the bulb first. Please align the bulb with the socket holes of the lamp holder, and turn it clockwise until it "seats".

b) Place the candle on the holder mount and turn on the power.

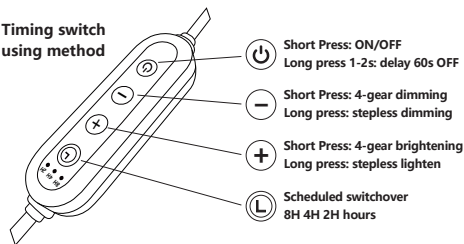

c) Switch the dimmer to turn on the lamp, then start your journey of scent.

Switch operation

1. This product is equipped with a timer and brightness adjustment switch. Press the power button to turn it on/off.
2. Adjust to the maximum wattage of the bulb heating 1-2 hours, the surface of the candle will slowly melt 2-3 cm.
3. To maintain the candle's fragrance, it is necessary to pour out a layer of "unscented" wax on the candle's surface after heating it 2-3 times.

Timing switch using method

Using tips

- Keep out of reach of children and pets.
- Do not touch the metal cover on the top of the bulb when using this product, as this may cause burns.
- Always allow the lamp to cool before replacing it.
- The lamp holder model of this product is GU10. Please choose a bulb with the same voltage as the original bulb. MAX 50W.
- Regular cleaning and inspection are recommended to extend the product's life.
- Disconnect the power before wiping and cleaning this product.
- Do not use abrasive tools and solvents or rinse with water to clean this product.
