Natural Salt Crystals from the
Himalayan Mountains

PRODUCT FEATURES

The Himalayan Salt Light Bulb is the combination of modern technique and the natural Himalayan Salt.

When lit, the salt bulb emits a gentle light and creates warm ambience

Where to Use Himalayan salt bulbs

The Simple answer is anywhere the LED bulb replacement requested for warm ambience

APPLICATIONS: Decorative fixtures

Salt Crystal from Himalayan Mountains

The salt crystals are mined by hand in the Himalayan Mountains. Each piece is chosen for its translucent pink color and faceted beauty. The salt comes from a 250 million year old dried up sea bed, from the time when the earth was covered with water, and it was in the ancient, original ocean where, it is believed, life began and that salt had something to do with life forming. The resulting pink crystal comes to you today in the form of Light Bulb, which, when lit, gives off what might be called a primordial glow, one part sunset, one part molten lava, creating.

IMPORTANT SAFETY INSTRUCTIONS

Warranty is void if product is not used
For the purpose for which the
Product is manufactured

CAUTION:

Working environment temperature 0-40°C

Not for use in totally enclosed luminaires.

Risk of electric shock

Do not use where directly exposed to water.

This device is not intended for use with emergency exits

The led lamp is suitable for a dimmer.

1. Before installing the lighting fixtures, please read this instruction manual carefully.
2. Only use lamps in fittings installed by a licensed electrician or appliances.
3. Observe wattage limitations of your fixture.
4. Light fitting should always be installed or replaced with care.
5. This warranty shall be void if a Product is misused or altered.
6. This luminaire is IP20 for indoor use only.
7. Don't try to replace the salt yourself, the salt inside not replaceable!
8. Don't try to modify the salt bulb and change the intended application!
9. Colors and size of salt chunk may vary due to the nature of natural rock!
10. Himalayan salt naturally absorbs moisture and if moisture is present inside, please turn on the bulb to evaporate the moisture. After several hours of use the moisture should evaporate depending on the humidity.
