Installing Your Device

1. Wipe the installation surface to ensure it is dry and clean.

2. Peel off the adhesive backing and firmly attach the strip light, starting from the bottom left. Secure the string lights with clips.

Connect Apple TV / Blu-ray Player / Gaming Console

3. Connect the string light to the DATA OUTPUT port on the box.
4. Connect your video source (TV, Blu-ray player, or gaming console) to the HDMI IN port.
5. Connect the HDMI OUT port to a display device such as a TV or monitor.
6. Connect the Adapter to the POWER port.

Setting Up The System

1. Download the Decktok App from APP Store in Apple iPhone / APP market in Android mobile phone.

2. Connect to a 2.4GHz Wi-Fi network and enable Bluetooth on your mobile phone.
3. Slide the ON/OFF switch to power on the sync box, the light flash and enter the pairing mode automatically. Please complete the network arrangement within 10 minutes. To remove device or reset factory Settings, switch the device on and off for three times within five seconds until the light flash again, you can enter the pairing mode.
4. Click Add Device or click + icon on the upper right corner of the APP home page, to choose Add Device and enter the Add interface for selecting the device to be added.
5. When the device is connected to the network, the Add device interface will automatically pop up the device icon. Tap the device icon and follow the on-screen instructions to complete pairing.

Notice

- Do not soak the product in water or other liquids.
- Do not install the product in a high temperature environment.
- The adapter needs to be connected in place, and there must be no looseness or poor contact.
- When bending the string light during installation, avoid folding the LED components, as this may affect the product's lifespan.
- Use the product with the provided power adapter only.
- Do not allow children to install this product.
- CAUTION-The product is not a toy. Children and the disabled should use it under adult supervision.

Troubleshooting

1. Unable to connect to the App

- Ensure the light strip is powered on.
- Check if Bluetooth is enabled on your phone.
- Make sure your phone is connected to a 2.4GHz Wi-Fi network.
- Do not skip the Wi-Fi connecting step during setup.
- Switch the device on and off for three times within five seconds until the light flash again, you can enter the pairing mode.

2. The light does not glow

- Unplug the power adapter, disconnect and reconnect all components, then plug the power adapter back in.
- If the issue persists, please contact DeckTok's official customer service.

3. The provided adhesive may not bond strongly

- Thoroughly clean and dry the installation surface first.
- When applying the strip light, press firmly along its entire length.
- For added security, use the included clips or high-strength adhesive.
