- Base
- Table pole
- 12 chassis mounting screws
- 2 Rotating handles

## Required tools (non-matching, prepare by yourself)

- Electric drill gun
- Phillips bits

## User's Guide

### Desktop tray

- Need to fit into the top of the table leg pole, press down firmly to fit into the raised slot

### Base fixed

- To assemble the leg, the bottom leg needs to be aligned with the chassis large screw pole central circular opening, into clockwise rotation;
- To remove tables rods, need to hold down the bottom of the black button, rotate the lever desk, before being relieved.

### Lifting operation

- Mount the knob on the metal leg
- Raise: Unscrew the knob on the table pole, hold the lower tube with one hand, and pull the upper tube with the other hand, then tighten the knob after raising it.
- Lowering: Hold the upper tube with one hand, unscrew the knob on the table pole with the other hand, slowly lower the upper tube, lower the height, and then tighten the knob.

## Installation instructions

### installation:

- Choose a firm, level surface to install the base. Use the attached bolts to fix the base to a solid surface, then align the table leg poles with the large holes in the middle of the base, and turn clockwise to tighten.

***Note:** Before fixing, please make sure that the selected screws will not extend too much to avoid internal damage.*

- Use suitable screws to fix the desktop tray to the bottom of the desktop.

After securing the tray and desktop, the desktop tray toward the top of the pole legs, push down firmly stuck in the desktop tray slot will be stuck at the plate.

***Note:** Make sure that the screw is shorter than the thickness of the desktop, so as not to across the desktop.*

### Disassembly:

First, remove the top of the desktop tray (hold the top tray button below, or force Pulling back and forth gently rotating tray and pull it out).

Then, press and hold the black button on the chassis, counterclockwise rotation pole legs, which relieved.

Finally, find a suitable storage space, store the pole and tabletop for reuse, and take care to protect the tabletop to prevent damage.
