

INSTALLATION GUIDE

1 Preparation before Installation

Check Accessories: Ensure you have all the necessary parts: one round wooden tabletop, one black base, and twelve golden self-tapping screws.

Obtain the following installation tools in advance

*Electric Screwdriver
(Recommended use)*

or

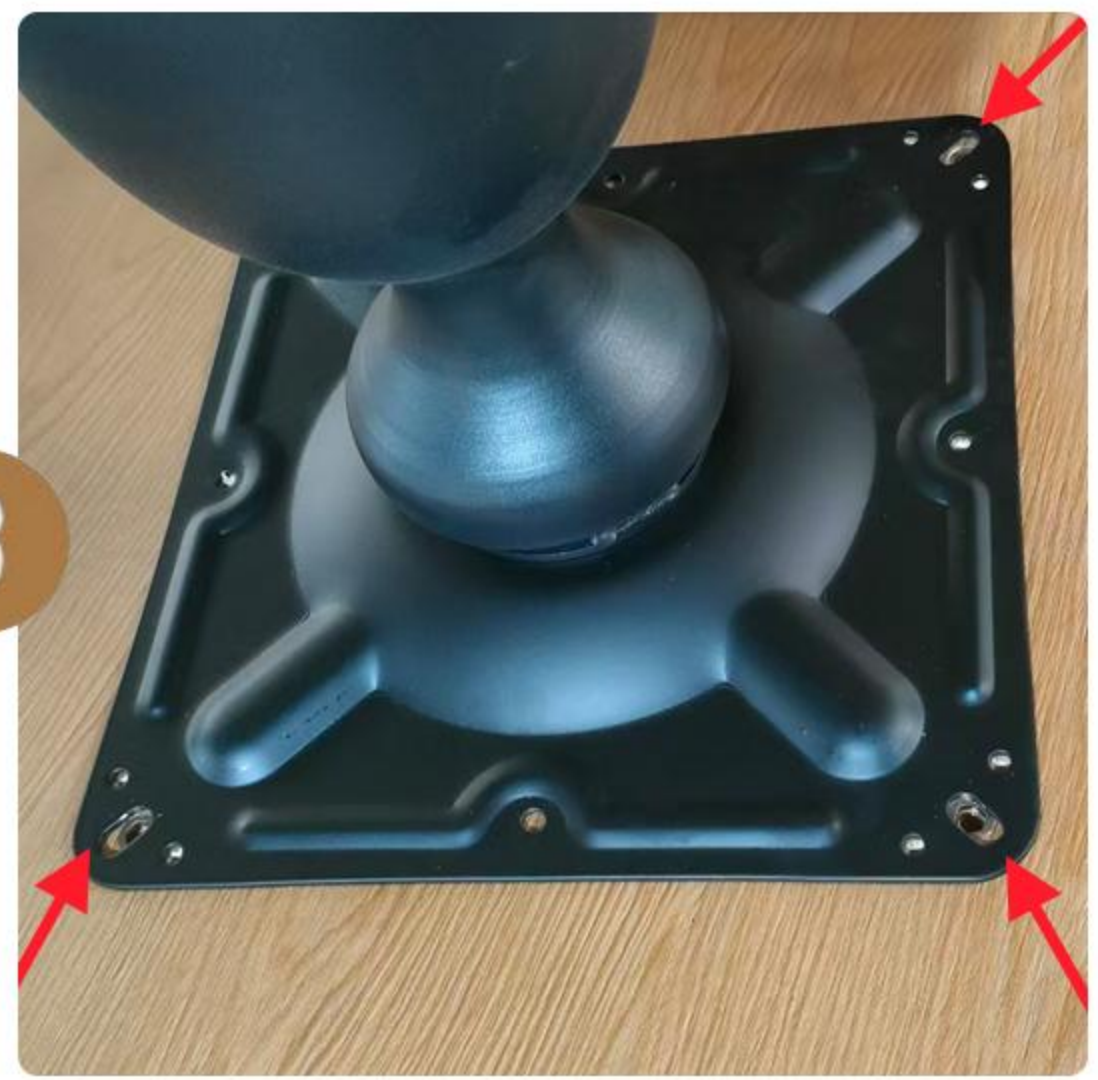

Screwdriver

INSTALLATION GUIDE

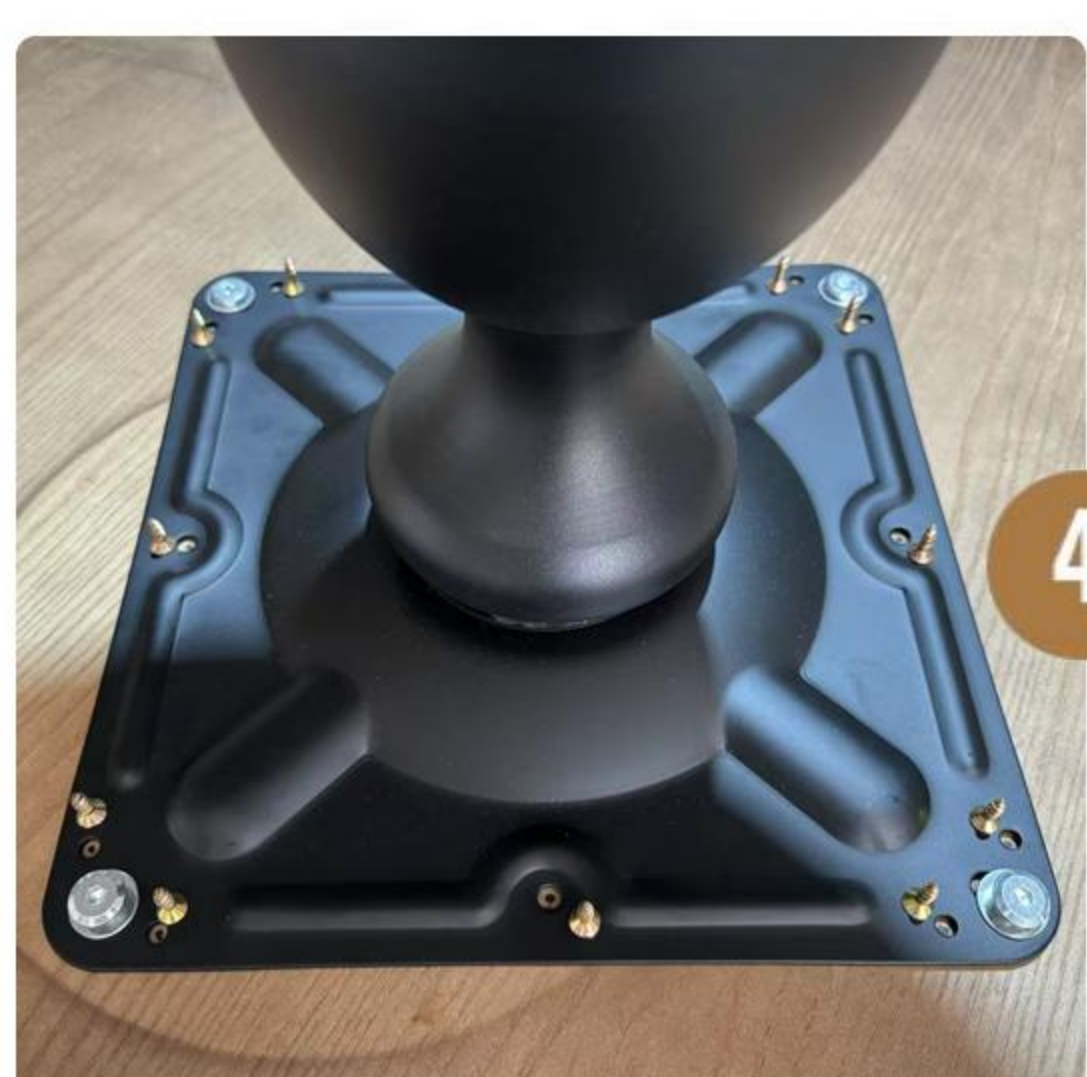

There are reserved installation holes on the back of the desktop. Place it with the back facing up.

Find the black metal base and align the four large installation holes at the corners of the base with the corresponding installation holes on the tabletop.

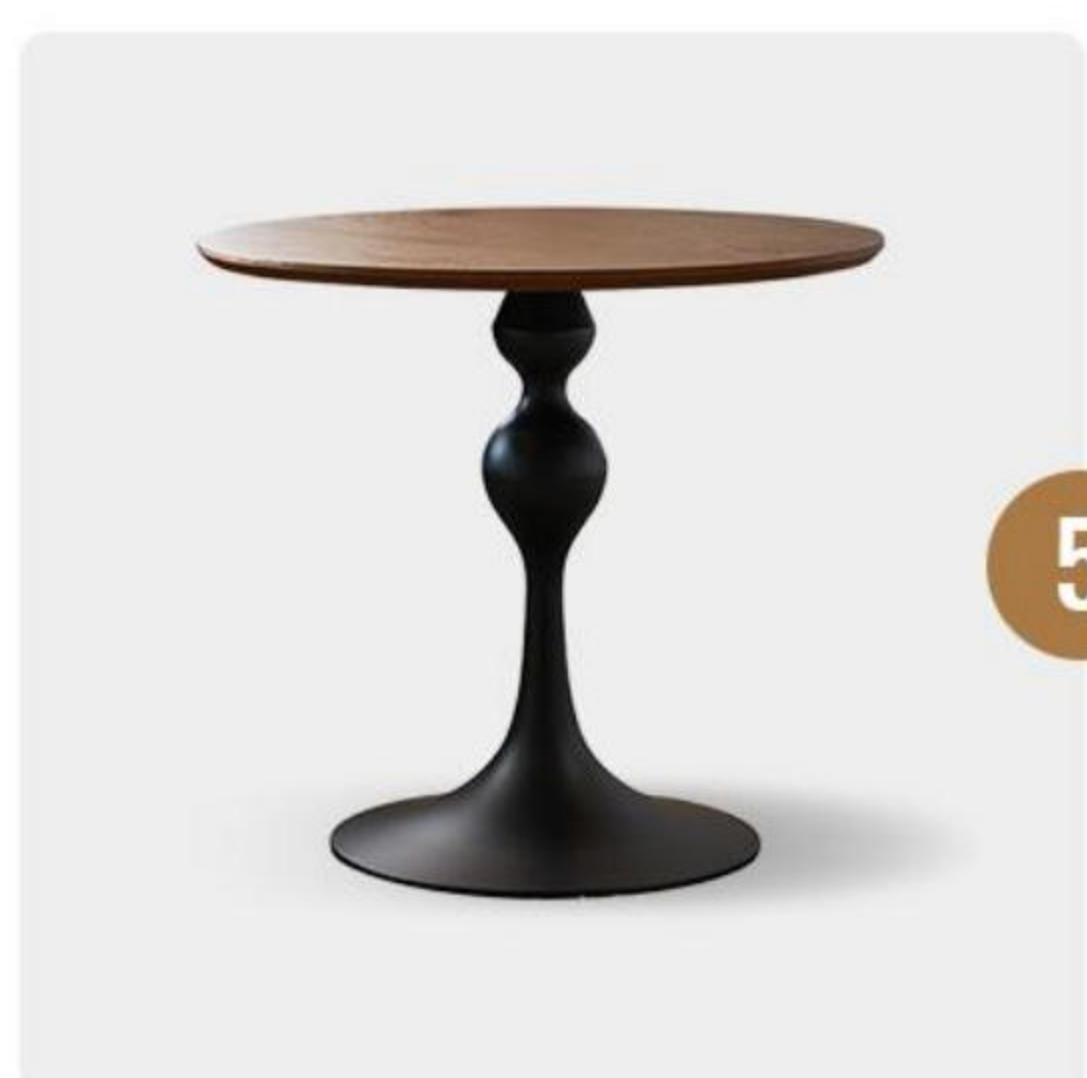

And use large bolts to screw in through the holes on the base, and tighten them with an electric screwdriver.

INSTALLATION GUIDE

Secure with Screws:

After finding the correct center position, use the golden self-tapping screws to pass through the round holes on the base and screw them into the tabletop. You can directly use an electric screwdriver to drive the screws into the tabletop.

Completion:

The installation is now finished.
