- Weed-free barrier protects trees
- Made of 3.5 ounce Spunbond commercial fabric
- Just add 2 cubic feet of mulch to finish
- Promotes moisture retention
- Includes fabric stakes
- Can be used with DekoRRa 400 Block Edging Kit

Model 730-FT

TREE WEED BARRIER INSTALLATION INSTRUCTIONS

Create a beautiful landscape by following these simple instructions:

- Place fabric ring around tree base and center.
- Cut soil and grass around the outer edges of the fabric ring with a shovel or spade.
- Remove fabric and clear the sod that is found inside the area of the fabric ring.
- Reinstall fabric around tree and stake into place. Fold under the fabric flaps found in the center of the ring.
- Place ground cover of choice (stone, mulch) over entire fabric ring. Fabric ring requires about 2 cubic feet of mulch.

If using Model 400 Block Edging, position blocks around outside edge of fabric ring to complete 52" diameter ring of blocks.

- Stake each block together with stakes included with block edging.
- Stake inside and outside flanges of block edging
