Correct Way to Leave the Chair to Avoid Tipping

Incorrect Example:

There is a significant distance between the support rod and the ground, stepping on the foot pedal at this time may cause the chair to tip forward.

Correct Example:

Lower the chair to the lowest position, the support rod will close to the ground, you can safely step on the foot pedal and leave the chair.a

Trouble and Solution

NO.	Trouble	Potential Issues	Solution
1	The pump is not working.	The pump's lift function is not working properly.	Please refer to section 2 of the operation guide to check if the operation is correct.
2		Cannot swivel.	Please refer to section 3 of the operation guide to check if the operation is correct. If the chair still has difficulty rotating, please repeat lifting the foot pedal and then pressing it down while rotating the chair several times. This should make the chair easier to rotate.
3	The pump is making unusual noises.	There is air inside the pump.	Because it's brand new, there may be some air inside the pump. Please repeatedly lift and lower the chair to expel the air.
4	The chair is wobbling.	Loose connection between the pump and the base.	Please check the screws underneath the base and tighten them again.
5	Missing screws.	Some screws are pre-installed.	Most screws are pre-installed on the chair's components. Please check again to see if there are screws in the screw holes on the chair's components.
6	Missing parts.	The chair is shipped in two packages.	If your chair is shipped in two separate packages, we will send you the tracking numbers for both packages after the chair has been shipped. Please keep an eye out for them. The two packages may not arrive simultaneously.
7	Damaged	The chair leather, metal, and other accessories are damaged.	If you find any damage to the chair after receiving it, please do not rush to return it. Please contact us and provide pictures of the damage in your message so that we can quickly identify the required parts. We will promptly send you the replacement parts.
