

LED Dusk to Dawn Sensor Bulb

SKU: HLBA19B1
[Instruction Manual]

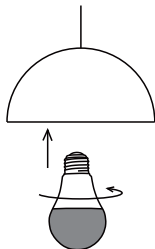

Please pay attention to the warning signs
Read the instructions with caution before operating
and keep it properly

Warning: To reduce the risk of fire, electric shock or personal injury, please strictly follow the instructions.

1. Before replacing the bulb, turn off the power and wait for the bulb cooling down to avoid electrical shock or burn.
2. Do not install the led bulb with wet hands.
3. Do not expose the light bulb to water.
4. The bulbs are not compatible with dimmers.
5. Not for use with emergency lights or in emergency exit fixtures.

Installation

1. Cut off the power of the light socket. (The safest way to do this is to switch the large red power button on the fuse box to 'OFF'.)
2. Install the LED bulb as shown in the figure.

Note:

1. Let the sensor (the red disc on the bulb) face towards sunlight when installation.
2. If the bulb is in a ceiling fixture, don't try to balance on an unsteady chair or something similar. Use a sturdy stepladder. That way you can reach the light bulb without falling.

Product Feature

The product is in automatic sensing mode once power on. Built-in sensor turns on the bulb automatically at dusk and turns it off when it's dawn. (Note: When the environment brightness reaches a certain range over 3 minutes at night, this light bulb will also be turned off.)

Specifications

Input Voltage: 120V 60Hz

Wattage: 9W

Lumen: 800lm

Color Temperature: 5000K

Base Type: E26

Bulb Type: A19
