

# Installation Manual

## Accessory List:

## Drawer Installation:

1. Remove the drawer front cover and drawer side cover and install them with the middle screw.

2. Remove the drawer base plate and insert it along the groove.

3. Remove the drawer back cover and install it with the middle screw.

## Door mat installation:

Remove the door panel and door pad and install them with small screws.

## Installation steps:

1. Take out the bottom layer board and install the left and right side brackets with large screws (pay attention to aligning the grooves of the layer board and bracket).

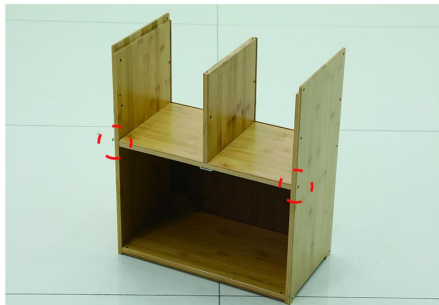

2. Take out the long backplane, insert the backplane strip along the groove.

3. Remove the door suction layer board and install the door suction with small screws.

4. Then fix it with large screws and partitions (pay attention to aligning the grooves of the laminates and partitions).

5. Then fix the door suction layer board to the side bracket (do not tighten the front screws yet).

6. Remove the door panel and install the door bolt, and finally tighten the front screws.

7. Remove the small backplane and insert it along the groove.

8. Remove the small layer board and install it with large screws.

9. Remove the small backplane and insert the middle backplane along the groove.

10. Remove the top layer board and install it with large screws.

11. Remove the plug and insert it into the hole.

12. Finally, insert the installed drawer.
